SQUARE MILES OF PAPER. out over 1,675 square miles of paper, or enough to cover the whole town of Fort Fairfield with more than 23 thicknesses of paper, or enough to cover 6,700 farms of 160 acres each. The strip of paper produced for the year would be more than 736,000 miles long or enough to go more than 29 times entirely around the globe. Some mill—and some product.—Fort Fairfield Review.

Here and There

During the past season the Canadian Pacific Railway used on all its lines approximately 6,500,000 ties, according to a report just issued. The woods used include British Columbia fir, hemlock, tamarac, jack pine, spruce, maple and birch.

Tourist traffic in New Brunswick during the past summer left nearly \$3,000,000 in the province, an amount almost equal to the total provincial revenue, according to an estimate of the New Brunswick Tourist Association. Approximately 70,000 tourists visited the province.

One thousand British Columbia rose bushes are being shipped to Portland, Ore., "the Rose City." Portland, famous all over the continent for its roses, buys the varieties produced in British Columbia because they are the hardiest and best suited for growing in North America.

Silver production in Ontario for 1924 will not vary materially from that of 1923, judging by figures available for the first nine months of the year from the reports of several operating companies, though some increases will be shown. Production to date has amounted to about \$19,500 a day.

Caribou have been seen in very large numbers this season in the northern part of Yukon territory. Old-timers say that the main herd must have numbered tens of thousands, while in some of the smaller herds that had broken temporarily from the main herd there were hundreds and sometimes thousands.

The very first aerial stowaway ever known was discovered recently aboard a plane in the Laurentide Air Service, Limited, operating on its Rouyn gold fields service in association with the Canadian Pacific Railway. The serious effect of the extra weight on the flying powers of the machine was so noticeable that it led to the man's discovery. As he had hidden himself with a desire to see his sick wife and child, he was not punished.

The enormous contribution to the wealth of Canada made by the Canadian Pacific Railway was alluded to by E. W. Beatty, K.C., Chairman and President of the Company, when, speaking at Welland, Ont., on November 7th, at the celebration of the 100th anniversary of the building of the first Welland Canal, he stated that the company in 1923 dispersed in the Dominion \$202,000,000 in wages and materials, and \$7,000,000 in taxes of all kinds.

November 7th was the 39th anniversary of the driving of the last spike in the main line of the Canadian Pacific Railway, an event which completed the Dominion's first transcontinental railroad, fulfilled the terms of Confederation and made Canada a nation. A stone monument now marks the spot at Craigellachie, in the Rocky Mountains, where Lord Strathcona (then Sir Donald A. Smith) wielded the hammer which united East and West.
