JOHN, N. B. J. S. Robertson and Bros., Publishers. Nov 5

PASTURES AND MILK.

Improved Temporary Pasture and Milk Production.

Some may think we have said enough about pasture during the past five years, and that experiments are now conclusive as to what can be done for its improvement. It seems, however, to be desirable to close the season with some additional facts and under new aspects.

Hitherto our work in testing mixtures of grasses and clovers has been termed permanent pasture, because the object is the maintenance of such a crop for many years, perhaps even for all the time that several generations can remember, of which we have examples in older lands. But, as it is difficult to grasp the full significance of what goes so far away from our yearly practice, we shall look at this class of pasture as if it had been connected with an ordinary rotation of crops, where after two years' hay there is usually two or three years' pasturing before breaking up for another succession. Thus we hope to bring home to everybody one of the duties of the day in connection with Canadian dairying.

We seeded in 1884 without a grain crop, and took hay the same year, it could as well have been with a crop of grain. In 1885 we grazed and obtained 7,800 lbs. of milk per acre; it could as well have been another crop of hay. We also grazed in 1886 and obtained 6,670 lbs. of milk. This, therefore, would be a system of one year's hay and two year's pasture, applicable to some soils and grain growing districts. The result here would have been a mean annual milk crop of 7,235 lbs. per acre, with $61 for butter and skim milk. Had the same land been laid down to timothy and clover, and an average of the Province realised (that is 1,300 lbs. of milk per acre), the revenue would stand $11 per acre. Against the mixture of grasses is the sum of $3.50 as the difference between $5 for seed and the ordinary $1.50 for timothy and red clover, for there should not be any for management and manures. Hence, during two years, the improved pasture gave $96 per acre over all the profits of the ordinary cultivated runs for Ontario cows.

But, possibly, neither of these pastures are at their best in three years, and a longer rotation may be desirable.

The same fields were kept in sod during 1887—the driest season in Ontario for many years. As part of good management in continuing temporary pasture, as well as permanent, under heavy stocking, for three years, we applied $22 value of manures per acre in preparation for 1887; hence we must debit with $10 per acre as a proportion for that year, in addition to the extra cost of seeding. As this is our closing point at present, take the following statement:—

	lbs.
Milk per acre in 1885	7,800
Milk per acre in 1886	6,670
Milk per acre in 1887	4,010
Yearly average	6,160

Value of milk per acre	$156 50
Extra cost of seeding	$ 3 50
Manures	10 00
Allowance for extra management	3 00
	$16 50
Net revenue for three years	$139 50
Ordinary pasture for same period	33 00
Difference in favor of improved pasture or $35 50 better per acre per annum.	$106 50

The account is now closed, and sod may be broken for a crop of peas or oats.

What more need be advanced meantime? If it is necessary that a sample of the soil, the pasture, the cow, the milk and the manure should be submitted to all our farmers in order to convince and convert, then our national future in dairying will be a slow and third-rate one indeed.

Were the average farm of 150 acres in Ontario in possession of ten acres of such improved temporary pasture the annual difference would amount to about $350, and consequently to about $15,000,000 for the Province.

It is a pertinent fact in nearly all civilized agriculture everywhere—in older times as well as now—that propitious conditions in nature make men indifferent and unprogressive; in other words, they are too well off. Unquestionably our province is full of many fat things, and while it may be somewhat uncharitable to draw an inference in this connection, and knowing how easy it is to find fault, I desire most seriously to say to our farmers that individual and provincial co-operation and emulation are as much desirable as the wider lines of international union. For the sake of self, then, let us have something approaching to 6,000 lbs of milk per acre, in place of the 17½ lbs per cow per day and the 900 lbs. per acre per annum. (See Mr. Blue's paper to Dairymen's Association, 1886-7.)

W. BROWN.
Ontario Agricultural College.

Religious Gleanings.

Messrs. Moody and Sankey will begin a series of meetings in Pittsburg Dec 1.

The New York Chinese mission has now between 4,000 and 5,000 Celestials in its Sabbath schools.

The week beginning Nov. 13 is set apart as one of special prayer for young men and Young Men's Christian associations.

The Black Hills Methodist Episcopal college is to be located at Hot Springs. That town gives the land and $10,907 in money.

The first christian church in the Congo Free State was organized in November last year, and there are now 1,062 converts in the Congo mission.

A union between the Peresbyterian and Congregational churches has been proposed, and gone as far as a formal agreement, set forth by a committee for the consideration of the churches.

In Denmark, where there were no Catholics before 1848, there are now nearly 10,000, with 30 priests, 30 sisters, 3 hospitals and 10 schools, and the Jesuits have a flourishing college in Copenhagen.

The Methodist Episcopal church in Germany reports: Members, 7,107; on trial, 2,166; travelling preachers, 59; on trial, 10; local preachers, 80; preaching places, 526; Sunday schools, 244; officers and teachers, 819; scholars, 10,592; library volumes, 10,209.

The Salvation Army in Canada do not intend to be behind in this year of jubilee. Commissioner Coombs has is sued a manifesto asking the soldiers and their friends to raise $25,000 to establish two new barracks as a fitting memorial to fifty years' beneficent reign.

COUNTRY DISTRICT NEWS,

As Given From Magundy, Tay Creek and Grand Falls.

Another Lot of Young Men Join the Exodus.

Improvements at Grand Falls and Tay Creek--Other Items.

MAGUNDY.

Hearts' Harvest—Church Notes—Business Notes—Personal.

MAGUNDY, Nov. 4.—A very pleasant event took place at Lake George Nov. 2nd, in the shape of a double wedding. Mr. John Kelly and Miss Bertha Matthews, and Mr. Thomas Kelly and Miss Lizzie Love were the happy couples. The nuptial knot was tied by Rev. A. J. Mowatt, at 8 o'clock, a. m. More than one hundred guests were present, and the brides were the recipients of numerous presents.

If fortune-telling is to be believed in we may be expecting another pleasant event in this neighborhood before long, as some of the young wedding guests went next evening and had their fortunes told.

Mr. and Mrs. George Molton, and Mrs. Eaton, of Meredith Villa, N. H., have been here visiting their friends. They returned home to-day.

Mr. W. Henry has finished his new store, but will not begin business until spring.

The Bishop Coadjutor of Fredericton, preached the harvest thanksgiving in the St. John's Church Oct. 30th. Miss A. Henry presided at the organ.

The young folks of this place spent a pleasant Hallowe'en at J. Henry's. Miss Mary Lockart and Malcom L. Davis furnished music on the organ and violin.

TAY CREEK, NASHWAAK.

The Milling Business—An Old Lumberman—The Exodus—General Notes.

TAY CREEK, Nov. 4.—Mr. Thomas McNutt has given his mills a general repair this fall. His mills consists of a rotary saw, one Dunbar shingle machine and grist. The latter cannot be surpassed in the country for making meal. Mr. McNutt is a man who gives general satisfaction to all who patronize him, in his line of business. Besides milling he keeps a grocery and dry goods store, which is a great convenience to the public generally.

Mr. John Delucry, formerly of the firm of Delucry & Sons, has gone as foreman for Mr. James Boyd, on the upper St. John. He is a man who has had about forty years experience in the lumber woods, and his services will no doubt be greatly appreciated by his employer.

Mrs. McKeown and family have sold their goods and chattels. They intend to make an exodus to the United States, which will make considerable of an increase in Uncle Sam's family.

Several of the young women of this place have left here for Boston, hoping in time to catch a flying yankee; we wish them every success in their hazardous attempt.

Mr. Harry Stone is about to commence operations on the South Tay. He intends his cut of lumber to be more extensive than that of last year. He has been fortunate in securing for foreman the services of Mr. William McLean, formerly foreman for Mr. Saunders. At present he is busily engaging men and teams for his operation in the woods.

The people of this vicinity are about to build a blacksmith shop instead of the one vacated by Mr. Parent. It is a good stand and any good blacksmith will get the new shop, rent free, for one year.

Mr. Robert Tomilson had an auction of some of his live stock, grain and chattles, from which he realized the sum of $300. Mr. Joseph Hawkes was auctioneer, and much credit is due him for the able manner in which he disposed of the various articles, besides keeping the accounts on a shingle. It being his first effort, no doubt in time he will become one of the ablest auctioneer of the day.

GRAND FALLS.

An Increasing Exodus—Lumber Operations—Town Improvements—Skating on the River.

GRAND FALLS, Nov. 7.—Quite a number of the residents of this place have gone away to the United States this fall. Some of the young men who had worked on the Short Line in Maine during the summer have returned, but are preparing to leave again, and are taking some of their companions with them.

The Grand Falls fife and drum band are practising for a social dance to be held on the 24th inst. in Arsenault's hall. The band has made considerable progress during the summer.

Rev. W. B. Armstrong, episcopal clergyman of the town, who has been spending a well earned vacation in England during the past summer, is expected home in a few days. His parishioners here will give him a hearty welcome.

There is a good deal of activity here lumbering operations. Several parties have gone to the woods with large crews and more are to follow. If the winter is favorable a large quantity of lumber will be cut.

The town has been somewhat improved during the summer.

The new Roman Catholic Church spire is about completed and presents a fine appearance. It is turned over in good style, the fund for this purpose being raised by the ladies of the church.

Mr. Arsenault has built a large new store with a commodious hall overhead.

Mr. P. McMillan, the past master is modernizing his dwelling.

The lumbermen of the Upper St. John are about devising a plan to dam the river a short distance above the Falls for the double purpose of holding their lumber in spring, till the booms are swung and to assist in driving the lumber in low water. There is talk of a joint company for this purpose. Mr. Pond of the sheer boom notoriety, is the principal mover in the project.

The weather here is very cold. Friday night was rainy but the winds veered on Saturday morning and was intensely cold. The river is frozen over above the railway bridge and the basin just above the falls forms a fine skating surface for the young people who enjoyed it all day Sunday. The ground is frozen hard and there is every appearance of snow with an early set in of winter. The river was not frozen last year here till after the 20th inst.

A PUGILIST'S RECEPTION.

John L. Sullivan's Friends in Liverpool Turn Out to Welcome Him.

LONDON, Nov. 6.—John L. Sullivan, the American pugilist, was met by his friends in a special tug on his arrival at Liverpool. On landing an enthusiastic crowd tried to unharness the four horses in the carriage in waiting. A reception was given at the Grand Hotel this afternoon, attended by many fighters. The customs officers retain Sullivan's belt pending payment of duty, and Sullivan starts for London to-morrow.

A Woman's Sweet Will.

She is prematurely deprived of her charms of face and form, and made unattractive by the wasting effects of ailments and irregularities peculiar to her sex. To check this drain upon, not only her health and strength, but upon her amiable qualities as well, is her first duty. This is safely and speedily accomplished by a course of self-treatment with Dr. Pierce's Favorite Prescription, a nervine and tonic of wonderful efficacy, and prepared especially for the alleviation of those suffering from "dragging-down" pains, sensations of nausea, and weakness incident to women—a boon in her sex. Druggists.
