## Cooper's New Buggy

### FOR 1897 IS A BEAUTY!

It is three inches lower than ever. Particular pains taken with the painting. Wheels are best quality and have been well seasoned. Can give you SOLID BACK SEAT or open back. Both are high and comfortable. Tops are made of better material and finished nicer. In fact our buggy for 97 is without doubt the best for the money ever sold in Fredericton.

If you are going to buy a buggy call and see ours before you buy.

### ST. JOHN LETTER.

#### A Hard Road to Travel-General News-The Markets, etc.

United States Immigrant Inspector Miller, who spends a considerable portion of his time at Vancouber and St. John, unless he is belied, is a man of colossal intellect, a man who knows his duty and does it, and one who should occupy the great chair that was sent on to Washington a few months ago by Mr. Willis, of the Duffin, instead of President McKinley. The United States has produced some great men, among whom may be recalled the names of Washington, Jackson, Lincoln, Grant, Sheridan, and a few others, but for unalloyed patriotism, discretion and devotion to duty, Immigration Inspector Miller, of Vancouber and St. John towers head and shoulders above them, and it is hoped before he dies, his merits will be duly recognized and rewarded. It is necessary to recall but one of Immigration Inspector Miller's recent acts to show how much he merits the gratitude of his countrymen and the respect of the people of Canada. A few weeks ago, a lady, who with her husband and children had lived in Massachusetts for fifteen or twenty years, where they had prospered, decided to revisit her parents. She found them on the old farm in Nova Scotia, alone, but in comfortable circumstances. They had money in the bank, but all of their descendants were in the States and the shadows of age were over them. She desired that the closing days of their lives might be spent among their children and grandchildren, (they were of good Scotch stock) and persuaded them to dispose of their effects, leave their farm and return with her to Massachusetts where a good home was ready for them. They settled their affairs, bid adieu to their old home and with tickets for Boston and several hundred dollars in money started on their journey. But Immigration Inspector Miller was at Vancouber and he was on the alert. Neither the respectability of their appearance, nor the weight of their several purses had any influence with him; it was no use to talk; they could not cross the line that divides Canada from the United States. They returned to St. John and purchased tickets to Boston by the International line, but at the wharf they were again met by Immigration Inspector Miller, and a passage to the land of the free and the home of the oppressed denied them. But the will of a woman is hard to subdue. In spite of Immigration Inspector Miller, who for his heroic devotion to duty deserves a leather medal, the lady is with her husband and children in Massachusetts and her parents are with her.

An illuminated clock has been placed on the Union depot.

The Campbell fish fair will be held Oct. 14.

After Oct. 4th, the Prince Rupert will sail for Digby every Monday, Wednesday, Thursday and Saturday, returning the same day.

Influenza is very prevalent in the city and several deaths are reported from congestion of the lungs.

On the west side of the harbor typhoid and scarlet fever are causing considerable alarm. Some cases of diphtheria are reported.

Most of the plants and shrubs in the public squares and old burial ground would have furnished more bloom and presented a more attractive appearance had the flowers been cut from time to time and sent to the hospitals and other public institutions. A little thoughtfulness on the part of the Association might have sent a flood of sunshine where it was most needed.

Farmers in Ontario and Quebec after a comparison of notes at the fall fairs have decided that Albert's Thomas Phosphate is the fertilizer of the century. Several carload lots have been ordered from those provinces during the last week.

The markets are unchanged and strong with slight advances on a few staple goods. McDonald has advanced another cent, on some of his tobaccos, and some refiners are asking a cent advance on lard. Chicago houses generally have very limited offerings of beef, pork, and lard and everything points to still higher prices on provisions generally. Pepper, cassia, and cream of tartar are from two to four cents per pound higher. Nova Scotia apples are in limited supply and it is not always possible to fill orders. Eggs will sell at 14 cents, but they are arriving freely and prices are likely to weaken. Butter is quoted at 16 cents. Messrs. DeForest have just received a carload of choice stock from Carleton Co. Canso herring this season are extra large and fat; best July fish sell at \$5 per barrel, \$2.90 per half barrel. The price of sugar is likely to continue low owing to importations of the bounty fed German product.

**EDWARD EDWARDS.**

St. John, Oct. 1.

### The Stock Sale.

FREDERICTON, Oct. 1.—The sale of cattle yesterday aggregated about \$6,500, which is understood to be a little more than the cost of the animals to the government.

Yesterday morning's sale totalled about \$500, instead of \$2,500. Between eighty and ninety of the sheep were sold this morning. The highest price paid was \$29 for a Shorthorn ram, while \$2 was the lowest figure at which any were bought. The average price was about \$15. Members of the government express themselves as well satisfied with the sale. It is reported that several Jerseys which were not offered yesterday were found to be affected with tuberculosis, and they were examined by Mr. McCreary and Veterinary Surgeon Henry, who are said to have reported symptoms of the disease present. The report has naturally given rise to some apprehensions as to whether any of the animals sold can become affected from contact with the diseased animals.

### Talk on Tuberculosis.

FREDERICTON, Sept. 30.—There was a large gathering of farmers and others interested in agriculture, at the Church Hall tonight to hear Professor D. McCreary address on tuberculosis in cattle. The Commission of Agriculture, and it is introduced the lecturer, Mr. Governor McLaughlin occupied a seat on the platform and all the members of the assembly were in the city. The lecturer, Mr. McCreary, was sent here by Hon. Sidney Fisher, Minister of Agriculture, at the request of the local government.

The professor spoke first of New Brunswick being specially well adapted for stock raising. We were favored with having rich green pastures all summer, while in Ontario at present much of the pasture land is dry and burnt-up. This country is also specially fitted for the growth of roots, mangels and turnips, and with such advantages there is no reason why New Brunswick should not send to Britain as good well fattened cattle and sheep as are sent from any part of the American continent. Our cattle in Canada are specially free from disease, but there is one disease which is not known in some parts and which it is very necessary should be quickly stamped out from all herds where it may have unfortunately obtained a lodgment. This is tuberculosis or consumption, and it is almost identical in man and animals. It is very prevalent in many parts of Europe and, in fact, over the whole of the old world. Four hundred years ago laws were passed to prevent its spread amongst cattle in Europe. It is frequently found in some of the States of the American Union. Both Massachusetts and Michigan have been taking active steps to stamp it out of their herds. Milking cows of the dairy breeds were more subject to this disease than young animals. Of late years German scientists have discovered that tuberculosis injected under the skin of an animal will indicate from the temperature in a few hours whether the animal be affected with the disease or not. If in a herd this test be carefully applied, and any animal found diseased, they should be carefully separated from the healthy animals, the whole of the stable disinfected and white-washed. Prof. Bang, of Denmark, has succeeded in exterminating the disease from a large dairy herd in that country. This was done by thorough separation of the healthy from the unhealthy animals, removing the calves at birth from their diseased mother and boiling the milk upon which they were fed. The animals diseased were fed, slaughtered and inspected by the state inspector. In every case the meat was found fit for human food and the loss to the owner was, therefore, comparatively small. There is more danger from the milk of cows suffering from the disease, but all danger may be removed by boiling the milk before being used for food of any kind. The disease was not hereditary. Many animals take it and are able from their strong constitution to completely throw off the disease. Others may have it for years and keep in fairly good condition, but these later are always dangerous and may infect others in the herd. Stock must be kept very careful in noting any signs of this disease and using every effort to have it stamped out. It is not safe to allow a herd of cattle to have an animal suffer from consumption because such men frequently are careless and spit about the buildings. The dry spittle is very dangerous to both man and animals, and it is a great cause to the spread of this disease.

After the talk on tuberculosis there were a great many questions put by the audience to the speaker with reference to the growing of roots and corn, the culture of clover, the feeding of cattle, the handling of manure and other kindred farm subjects, which were of great interest to the audience and elicited much valuable information.

At the close of Mr. McCreary's address the Lieut. Governor made a brief address expressing his pleasure at seeing so many farmers present from different sections of the province and of the profitable character of the evening's meeting.

## THE CARELESS AND INDIFFERENT

### Suffer Intense Agonies This Month.

Many Men and Women in Great Danger.

To Such Mortals Paine's Celery Compound Guarantees a New Life.

The Great Medicine a Sure Cure for Rheumatism and Sciatica.

Thousands of people die annually of rheumatism, yet every case could have been cured if Paine's Celery Compound had been used in time.

Two many men and women show a marked indifference when, in some form, the dread disease commences its agonizing work. Some foolishly imagine that bright, warm and dry weather will banish the intruder, and they determine to trust themselves to time and circumstances. When placed their hope in warmer clothing, and the frequent use of liniments, while some experiment with electricity and baths.

As the days pass, the careless and indifferent find themselves deeper in the mire of suffering, and they experience all the countless twinges and agonies of the disease. They have chills, pain in the back, quickened pulse, constipation, loss of appetite, coated tongue, and the joints swell—usually the knees, elbows and wrists.

Now is the time of extreme danger. Now the sufferers realize that they are paying the penalty of their carelessness. Many will soon be helpless and useless. We shall see them with stiffened muscles and joints, and limbs twisted and drawn up.

Some will ask the question, "Is there truly a cure for such helpless rheumatism?" We say unhesitatingly there is. The agent that can effectually and scientifically cure Paine's Celery Compound. It has cured thousands in the past—men and women of the highest standing in every community—and there has been the strongest testimony for the encouragement of others. Besides removing the cause of rheumatism, Paine's Celery Compound is the only medicine in the world that guarantees a permanent cure.

Will you, sufferer, continue in agony and danger of death when such a mighty remedy as Paine's Celery Compound is offered to you?

Let us assure you, poor rheumatic sufferer, that the use of one bottle of Paine's Celery Compound will quickly dispel any doubts that you have. The effects will be so encouraging that you will be forced to continue with the life-giving medicine till you are sound, well and happy.

### Lower Salmon Creek.

Oct. 2.—The sudden death of Mr. Hugh McLean has cast a gloom over this community.

Miss Della Braunscombe, of the Range, is visiting her many relatives and friends of this place, this week.

Miss Daisy Higgins, accompanied by her brother, Arthur, left here on Thursday morning for Millerton, to visit their sister, Mrs. H. Parlee. On Monday morning she will start for Boston.

Miss Maud Higgins will leave here Thursday morning for Boston.

Mr. and Mrs. E. F. Gale are visiting Mrs. Gale's parents, Mr. and Mrs. N. Fowler.

Mr. Murray Starkey spent last Sunday in this section of country, the guest of Miss Esther Baird.

A very happy event took place at the Baptist parsonage, Chipman, on Wednesday last, when Miss Cassie Stevens, of this place, and Mr. Melvin Keady, of Hartwood Ridge, were united in the holy bonds of matrimony by Rev. W. E. McIntyre.

The new Baptist church at Hartwood Ridge will be dedicated on Sunday, Oct. 4th.

### Linton's.

Sept. 26.—Threshing has commenced. Oats are not doing very well but buckwheat is good.

Miss Evelyn Robb has come home from the States where she has been for two years. All are glad to see her return.

Levi Nightengall our splendid carpenter has done his part as a faithful friend to our church which looks fine.

The people of this place are very busy with their grain but we are having splendid weather to harvest.

Martin Fareshier had a narrow escape of being devoured by a wild beast which he thought was a wolf only it was good with the stick.

"Brother," said the minister gently, "you should read your Bible more assiduously."

Brother Burroughs—Your next door neighbor by the way—never lets a day pass without a perusal, at least, of his copy of Holy Writ.

"He may read his Bible all right," said the delinquent, "but he always borrows my newspapers."

## NORTH END SHOE STORE.

Now for Fall and Winter Footwear.

We have everything you require to keep you Warm and Dry.

LONG BOOTS IN KIP AND GRAY.

SEE OUR WEATHER KING KIP BOOTS the Best Made.

Boys' Long Boots all kinds. Women's Grain Boots good for fall wear. If you want warm boots that give you felt lined or all felt. Misses in the above kinds. We do not like to talk of OVERSHOES yet but we have them. Also RUBBERS and RUBBER BOOTS the celebrated GRABBY MAKE.
