HALL'S
VEGETABLE SICILIAN
HAIR
RENEWER.

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfect preparation for restoring GRAY or FADED HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality, and I consider it the BEST PREPARATION for its intended purposes." Sold by all Druggists, and Dealers in Medicines. Price One Dollar.

Buckingham's Dye.
FOR THE WHISKERS.
As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents. Manufactured by R. P. HALL & CO., NASHUA, N. H.

Ayer's Hair Vigor,
For restoring Gray Hair to its natural Vitality and Color.

A dressing which is so valuable, healthy, and effectual for preserving the hair. Faded or gray hair is soon restored to its original color, with the gloss and freshness of youth. Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous, and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

HAIR DRESSING,
nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy lustre and a grateful perfume.

Ayer's Cathartic Pills,
For all the purposes of a Family Physic, and for curing Constipation, Indigestion, Foul Stomach, Breath, Headache, Irritability, Rheumatism, Eruptions and Skin Diseases, Biliousness, Dropsy, Tumors, Worms, Neuralgia, and all other ailments arising from a disordered Stomach, and for Purifying the Blood.

Are the most effective and congenial purgatives ever discovered. They are mild, but effectual in their operation, moving the bowels surely and without pain. Although gentle in their operation, they are still the most thorough and searching cathartic medicine that can be employed, cleansing the stomach and bowels, and even the blood. In small doses of one pill a day, they stimulate the digestive organs and promote vigorous health.

AYER'S PILLS have been known for more than a quarter of a century, and have obtained a world-wide reputation for their virtues. They correct diseased action in the several assimilative organs of the body, and are so composed that obstructions within their range can rarely withstand or evade them. Not only do they cure the every-day complaints of everybody, but also formidable and dangerous diseases that have baffled the best of human skill. While they produce powerful effects, they are, at the same time, the safest and best physic for children. By their aperient action they gripe much less than the common purgatives, and never give pain when the bowels are not inflamed. They reach the vital fountains of the blood, and strengthen the system by freeing it from the elements of weakness.

Adapted to all ages and conditions in all climates, containing neither calomel nor any deleterious drug, these PILLS may be taken with safety by anybody. Their sugar-coating preserves them ever fresh, and makes them pleasant to take; while being purely vegetable, no harm can arise from their use in any quantity.

PREPARED BY
Dr. J. C. AYER & CO., Lowell, Mass.,
Practical and Analytical Chemists.
SOLD BY ALL DRUGGISTS EVERYWHERE.

Exhibition.

An Exhibition of Live Stock, Farm Produce, Manufactures and Arts, open to the Maritime Provinces, will be held in St John on TUESDAY, WEDNESDAY, THURSDAY and FRIDAY, the

5th, 6th, 7th and 8th of OCTOBER NEXT.

The splendid new and permanent Exhibition Building, erected on the Barrack Grounds, in connexion with the extensive Drill Shed and commodious New Sheds and Stalls for Stock, will afford ample accommodation and protection for all exhibits.

The Deep Water Terminal of the Intercolonial Railroad is close to the Exhibition Grounds, and goods and stock will be landed from cars or steamboats and placed on exhibition with very little trouble or expense.

EXHIBITORS

will be required to pay the freight from any part within the Province to St. John, one half of which will be refunded to them upon presentation of the freight bill, and an order will be issued for its return free, provided it has not been sold in the meantime.

A limited number of care-takers of Live Stock will be passed free to and from St. John.

INTENDING EXHIBITORS

desiring special allotment of space for the purpose of fitting up or arranging the same, are requested to make written applications to the Secretary for Agriculture before the 15th of September.

The accommodations for holding the Exhibition, and the means of transport to and from it will be found superior to those of any former Exhibition, and the cordial support of Agriculturists, Manufacturers and of the people generally is earnestly solicited.

An office will be opened on and from the first September in the City Building, St. John, in the personal charge of the Secretary for Agriculture, and Blank Forms and all other information may be obtained on application by letter or otherwise; at that office or to the Secretaries of the different Agricultural Societies, or at the Office for Agriculture in Fredericton.

JULIUS L. INCHES
Secretary for Agriculture.

CHATHAM, N. B., SEPTEMBER 25, 1880.

PROSPECTUS.

THIS is the STAR. We have no apology for it. It must speak for itself.

And now our mission. There is an ideal press before whose shrine we bow: what that ideal is, we would have our readers know. It is that press which knows no private interest or party zeal that stands in the way of the public good. It is that press which marches on in advance of the people, thinking for the masses and moulding public opinion. It is not a press which lags in the rear, till the strongest proclaim their abhorrence, and then take up the chorus. The most sacred institution in any land is an intelligent, moral and free press, that sets up for its motto that written by Judge Story—a press

—'Unswayed by influence and unbridled by gain.'

We say we worship at that shrine—and we do so; and it shall be our constant aim to make a paper a counterpart of the model we have set up, caring less for the gains than the name, and finding a better reward in the praise of posterity than in the gold of the hour.

The duties and the responsibilities of the press are great and grave. Questions often arise suddenly that the public mind does not take the trouble to consider, but the newspaper editor must always be prepared to show some clue to the mystery or to put some interpretation upon the most involved circumstances. He must think more hastily than other men, and reach conclusions faster—then his judgment be faulty, the public, which in the end is always right, will detect his shortcomings. The duty of thinking for one's self is important enough, and the man who is able to do so is generally above the common; but how much more important is the duty of him who thinks for the thousands and fashions their opinions after his own. If the sun be eclipsed the earth will be darkened; if he whose doctrines may become the rule of the state should spread abroad insidious teachings through the press, many of the thousands who look upon him as a teacher will be misled.

The press is the first and greatest born of a free people. Before the days of the press superstition and ignorance held sway over men's minds, tyranny lorded it over the land and bad kings sent innocent men to the block for a miserable whim. But when the press once began to breathe the spirit of the people through its columns, tyranny faltered and autocrats and evil combinations trembled before it. In Russia to-day there is no free press, but there is a rule of knout and iron—a galling tyranny that we free people cannot conceive of.

In countries blessed with the glorious boon of liberty, the press is to-day the greatest power upon the face of the earth, and there is no man, no matter how high his station that does not bend his knee before it. With such a conception of the press, and of the duties of those who control the press, we give this paper to our readers. And it we have faithfully portrayed our ideal newspaper, and the duties of a proper editor we have stolen a march on our readers and given them our prospectus.

But these are only the general principles upon which a newspaper should be conducted, and while it shall be our constant aim and greatest pains to conduct the STAR upon the ideal we have set up, there remains to be specified the special objects it shall be our particular duty to achieve. First of all we shall support the liberal conservative party

because we believe their policy for Canada in her present condition is good. The moment we think the interests of the Country are subordinated to the interests of the ruling party, that moment we cut the tie that binds us and call for better men. We have had no difficulty in concluding that the much abused National Policy, under all the circumstances is by far the best for Canada. Our reasoning to this end we shall give in future issues of our paper, deeming such a subject as not belonging to this place.

We shall always to the utmost of our power oppose any measure having a tendency towards annexation or secession; and with equal force shall we oppose any steps towards the disintegration of the Dominion, by a repeal of the union. Both these are embryotic questions now; but we see them in the future with many followers. It were well to educate the public mind to deal with them when they come. To do this shall be part of our mission.

The writer has of late been through Nova Scotia, and talking there with some of its leading men he has learnt that the sister province is looking forward at no distant day to a Maritime Union. We shall be in no hurry about advocating any such a change believing that petty political nostrums for a state, goes as far towards bettering the condition of the people as the medicines of the mountebank goes to improving the human body.

Great minds within our Dominion, bursting with loyalty, think we are too far from the throne to be happy, and are looking to the day which will see a Federation of the Empire. This is a no-party idea, and among the Liberals we believe Mr. Blake is its greatest champion. Matters of this kind, like the establishment of the fulcrum at some point outside the world, whereon Archimedes might place a lever and overturn our planet; the conversion of the Sahara into an inland sea, and kindred other mighty enterprises we leave to others, professing ourselves unable to deal with them.

If our loyalty can only be preserved by crying out for the federation of the empire, then shall we have to sit and in despair watch its departure. This federation of the empire seems to us, from what we have read of it, like harnessing a horse in Fredericton to a rope attached to a log in some part of Chatham. The connexion is about as remote—or about as near, men of the Blake school will be it.

But charity ought to begin at home, and before we reached this point we should have said what our aim shall be in relation to the county whose bread we hope to eat for the next few years. We never should have come to Chatham but for the bright hopes we entertain of its near future. The grounds upon which we have based our hopes are no rosy dream, but a probable possibility to whose fulfillment we consider the STAR substantially pledged.

We now refer to the important post between the Old World and the New, which we believe Chatham is to be at a date not far distant. It is known that Newfoundland is now engaged in building a road from St. John's to George's Bay. This road will be part of the new high road from Queenstown to America; Atlantic steamers during the summer months will discharge freight and passengers at St. John's; they will be re-shipped at George's Bay; and Chatham in our theory will be the entre-port, as well as the distributing port for the Dominion and New England States. This means that a road would be built—and in any case the road will be built—up the Miramichi, from Chatham, and down the Nashwaak to Fredericton. What this would mean to Chatham, those who have some knowledge of the freight and travel by the steamers plying on this route, need not be told. We have already, by our articles, turned the eyes of our

Newfoundland friends to this scheme, and our readers may rest assured that anything we can henceforth do in the same direction, will not be wanting.

Next to the harvest of the land that of our fertile waters is most important to our people here. The question therefore of our fisheries and how that industry may best be perpetuated if not fostered, is one for grave consideration. It seems to us that in the past our dealings with this question have been more or less speculative and every process for the repopulation of our waters a mere trial one. We shall not only approve further expenditures in the search for success, but we shall ask a much larger appropriation for our Maritime seas and rivers than they have received in the past, believing that at the present they receive far short of their share. Upon our fisheries here thousands of people are dependent for support, while in other quarters where the fisheries never can be to the inhabitants what ours are to our people, lavish sums are expended with the most ridiculous results. There is a batch of useless officers in the Fishery Department that ought to be sent on "long holidays" and better men be put in their places.

Upon this fishery question we shall be on the side where lie the interests of Miramichi and the North, and we shall insist on the laws relating to the protection of our fisheries being rigidly enforced.

If to the farmer or the lumberman what we could say might ever be useful, let him depend upon our assistance; and much within newspaper scope can be said in the interest of both.

A nation's wealth consists in her natural agents, her resources and her factories. The two former this favored country has; it shall be our constant task to show our people they should have more of the latter. For this we have a National Policy.

We think in the matter of coastal telegraphic service, the important fishing settlements along the Miramichi and other parts of the North Shore have been left out in the cold. If Dr. Fortin's scheme be as advantageous as it is claimed, then we do not want to have our fishermen denied these advantages. And with the powerful friends this country has "at court," we feel assured that the privileges of the telegraphic coastal services will soon be extended to us. To this end the STAR's efforts shall also be directed.

Upon the principle that under responsible government, the country is ruled by party, and that without party responsible government is impossible, we shall be the advocate of such party politics as seem to us best for the interests of the country—of our Province and the Dominion.

We shall always deal with public men, upon their public record, save where private dealings crop out in public doings, or where the one is inseparable from the other. Then we know no man as we know no mercy. We believe there is no greater pollution than the coward who sits at the editorial desk and is afraid to speak his mind. If we are only to get bill heads and doggers to print by smothering our convictions, then we shall be pleased to starve. Yet we also know of some men presiding over newspapers who are nothing if not abusive; and who unfortunately often please and carry the crowd as does the clever ruffian on the street corner, who is overflowing with words and fertile in low smart retort. These vulgar persons degrade the press to the level of those to whom they cater. Our face shall always be set against such characters.

And now we have reached the stage whereat we cannot but express our wonder that an enterprising and intelligent people like those inhabiting the sturdy towns of the Miramichi should have remained so long without a newspaper.

There is no other part of the Dominion, that we are aware of, blessed with the natural resources, the wealth and the intelligence of Miramichi, that has not a newspaper. To fill the blank so long existing we have come here, and to publish a paper that may be worthy of the people among whom we have cast our lot shall be our loftiest aim.

Then we shall publish the semi-weekly STAR on Wednesdays and Saturdays, and send it post-paid to any address for \$2 per annum. The paper shall be sold on the streets of all the Northern towns, on the steamboats and on the railways. The day is not far, we hope, when Chatham and the North will be able to support a tri-weekly, mayhap a daily, newspaper, upon which the people may rely without having to wait for the St. John publications.

THE WEEKLY STAR will be sent postpaid for \$1 a year to any address. Our friends may, if they wish, help us much by starting clubs, the terms of which are:

To any one sending us six subscribers for the WEEKLY STAR we shall send the paper free for one year.

To any one sending us a like number of subscribers we shall send the SEMI-WEEKLY STAR for one year or allow the cash equivalent of either.

THE WEEKLY STAR will after we are once established, be one of the leading papers of the Province. We have done
