The frauds that have been perpetrated on the spectacle wearing public by most spectacle dealers and peddlars by giving assumed and fancy names to ordinary glass, speaks for the ignorance of the public generally, in the all-important subject of the preservation of sight. there are only two articles from which the spectacles lenses; can be manufactured viz : Pebble and glass-call glass by any other name, it still remains glass. Pebble, on the other hand, is from 'nature's own manufactory. It is a natural crystal found generally in freestone formation, and is harder than the ruby and emerald, and nearly as hardas the diamond. The Pebble is not more or less than a transparent stone, cut by aid of diamond dust; and the greatest amount of power is placed immediately over the centre of the grain found in all pebble. It will give to the spectacle wearer the coolness, freshness and a pleasant feeling that the ordinary spectacle lenses cannot by any possibility impart. All spectacles and eyeglasses are stamped B.
