Nature's Way Is The Best.

Buried deep in our American forest we find bloodroot, queen's root, mandrake and stone root, golden seal, Oregon grape root and cherrybark. Of these Dr. R. V. Pierce made a pure glyceric extract which has been favorably known for over forty years. He called it "Golden Medical Discovery."

This "Discovery" purifies the blood and tones up the stomach and the entire system in Nature' own way. It's just the tissue builder and tonic you require when recovering from a hard cold, grip, or pneumonia. No matter how strong the constitution the stomach is apt to be "out of kilter" at times; in consequence the blood is disordered, for the stomach is the laboratory for the constant manufacture of blood. Dr. Pierce's Golden Medical Discovery strengthens the stomach—puts it in shape to make pure, rich blood—helps the liver and kidneys to expel the poisons from the body. The weak, nervous, run-down, debilitated condition which so many people experience at this time of the year is usually the effect of poisons in the blood; it is often indicated by pimples or boils appearing on the skin, the face becomes thin—you feel "blue."

"More than a week ago I was suffering with an awful cold in my head, thr at, breast, and body," writes Mr. JAMES G. KENT, of 710 L. Street, S. E., Washington, D. C. "Some called it La Gripp, come pneumonia. I was advised by a friend to try a bottle of your 'Golden Medical Discovery.' I tried a bottle and it did me so much good that I feel safe in saying it is the greatest and best medicine that I ever took. My health is much better than it was before using your medicine. It does all you claim for it and is satisfactory."

Fashions and Fads.

Crepe weaves are high in favor, particularly in silk and in cotton. The finger tip and wrist length jack-

et are expected to dominate. Brocades have already established themselves in evening costumes.

Sashes of bright colored velvet are edged with small silk or satin roses. A deap pleating of white or black net is a pretty finish to short elbow

sleeves. The new separte coats are generally three-quarter and seven-eight length. The new suit coats are cut in odd fashions, with skirts frequently drap-

A FAULTLESS FOOD PRODUCT

ON raw cold mornings EPPS'S Cocoa gives you a glow of generous warmth which makes you defy the cold. It contains the most nutritive product of the finest cocoa beans, viz., the cocoa butter. "Epps's" is a favourite throughout the world, and is as strengthening as it is delightful to the palace. Children Thrive on "EP. S'S"

longer exists. The pronounced change in skirt

draperies is the lifting of the fullness in the front. Sheer batiste in new embriodered designs bid fair to be a favorite this

coming season The Russian styles bid fair to be quite a pronuonced feature in the

spring fashions. A new and attractive material 'serge Ottoman," composes many new

chic tailor suits. Many lace-draped gowns have an

underdress of rich broche, ivory or white satin souple. In addition to the draped skirts, many models have pleats in the sides,

Dresses of white serge are again featured in smart Russian blouse and

coat dress styles. An important point in the new cot-

ton cloth is the use of colored embroidered trimming. Worsted rep in one-color and two

toned effects is being very much used for cloaking. There is a tendencey in the new suits for spring to get away from the

strictly tailored effect. The new browns are of grayish an rose tones, and the grays are both brown and rose in effect.

Adopt Fire Director

London, January, 2.-The Daily Telegraph says the Baronetcy conferred by King George upon Vice-Admiral Sir Percy Scott, which was announced in the New Year's honors, is egarded as confirming the report that the Admiralty has decided to adopt Admiral Scott's invention, "fire director," for the entire fleet.

It is said by the Telegraph that the guns on the battleship Thunderer which is fitted with a Scott director have been fired with an accuracy 30' to 400 per cent. greater than those or the Orion, which has no director. The invention enables the simultaneous lischarge of the ten heavy guns of

SOPER & MOORE

Arrested for Book Frauds.

Michael J. Powers, of St. John's For-merly, Held at Boston in \$15,000 Bail.

clusively referred to the arrest at Boston, Mass., of a man named Powers, charged with frauds in connection with the publication of a book. It is the sensation of the "Hub" at the present time, and is of interest to our citizens inasmuch as that Powers is a native of St. John's, Nfld. The subjoined article was taken from a Boston contemporary of a couple of days

Arrest Powers for Book Fraud; Held in \$15,000. Michael J. Powers, alias James T. Clark, alias James Powers, forty-nine years old, of No. 1242 Commonwealth avenue, Allston, was arrested to-day by Inspector Wait, of Police Headquarters, on a secret indictment warbook frauds.

Powers is charged with the larceny of \$87,075 on November 29, last. from Mrs. Mary Rogers of No. 906 Beacon Street, Boston, in a book

ransaction. The prisoner is charged also with conspiracy to steal this sum, in two counts; also conspiracy to obtain the signature of Mary L. Rogers to a written instrument, the false making of which constitutes forgery.

He is also charged with conspiracy in two counts to steal in a book transaction \$2,306.50 on October 19, 1909, from Kate M. Eager of No. 637 Dudley

Powers was arraigned before Judge Brown of the First Session of the Superior Criminal Court. He pleaded not guilty and was held in \$15,000 bail. Mr. McIsaac, assistant district

attorney, said: "This man Powers is one of the nost offensive of the de luxe agents under indictment. I ask that his bail be fixed at \$15,000."

Lawyer Lucy, who represented Powers, said that the two other men arrested in the book frauds had been held in \$5,000 bail and he did not understand why his client had been picked out for increased bail.

Lucy explained to the reporters that Powers is a globe trotter, speaks several languages, and lives in a \$70 a month apartment. He said that Powers was one time connected with A. C. Burrage, the copper man.

Raising A Twenty-Flat Building.

It seems no job is too hard for the Chicago house-mover. If the owner of a building wants it removed or raised and can pay the bill, the work will be done, no matter how large the building may be or how much stone and iron is used in its composition. A twelve-flat building with a front of nearly one hundred feet was raised recently so that four stores could be constructed under the flats. While his work was in progress, the twelve flats were continuously occupied by the tenants, who experienced no in convenience whatever.

The work of cutting the building from the foundation, and inserting heavy beams and iron rails is the first work done and when the jackscrews are all in places, of which there are hundreds, the building is then gradually raised inch by inch by the men, each man turing a few jacks when the superintendent blows his whistle. So exact is the process that the brick work is not even cracked.
