Ald. Low, in regard to paying Col. Shaw \$12 doctor's bill which he psid on account of injuries received from a fall on a bad crossing, said, why is it our inspectors do not inspect these crossings? Ald. Ryan said those who do not pay their water rates at the proper date can receive no discount. Now we have had their water rates at the proper date can receive no discount. Now we have had many cases of a very urgent nature. Poor people have come, a few days after their rent was due, but there was no alternative, they had to pay, and I think that the same stringency should be exercised by the executive committee. This plea that he was not served with the paper than a surround with the paper and we should be exercised by the executive committee. This plea that he was not served with the paper and we should be executed as a line of the piece from beginning to end. On Thursday, 24th Angust, Mr. Costsworth went to the Muter street sewer and found them lowering a defective pipe This defect could not easily be discovered. The city commissioner rejected the pipe and ordered it to be laid aside. Then Mr. Trimble gave orders to his men that no more pipe should be laid until the appointment of a new inspector. On the grounds of the club on Front treet west a rather small but select gather ing, as the phrase goes, assembled yesterday to see the first day's play of the tournament at tennis, the fashionable game of the hour. As yet Canadians are not adepts, but they are improving. A band was on the ground and discoursed some very good music during the afternoon. Some, however, think it a mistake to allow music during the play.

Mr. Harry Gamble and Mr. Gamble Geddes elicited the admiration of good judges by their play. Miss Bradshaw played cleverly and with grace. Also a young lady from Quebec. The remainder of the players seemed to be beginners. Today, however, some fine play may be exected in the single matches, as the entries Mr Goldwin Smith, Miss McCaul, Miss

String with the claim now generally believed by the most scientific men that the disease is due to the presence of living parisites in the tissue, Mr. Dixon at once adapted his cure to their extermination—this accomplished, he claims the catarrh is practically cured and the nermanency is unquestioned, as cures effected by him two years ago are cures still. No one else has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh.
