The Latest and Best and the only Double Root Cutter Manufactured.

ALL THE WORLD LOVES A WINNER; CONSEQUENTLY

TOLTON'S NO. 1 DOUBLE ROOT CUTTER

Patented September 6th, 1894.

Is the favorite among all Pulpers, having won all the first prizes last year; also captivated the hearts of all the stockmen who have used or seen it. It is a money winner to all concerned and a saver of time and labor to the operator, and one which sells at sight after a careful inspection, as it will either pulp coarse or fine, or slice by simply turning over the centre grate and turning crank the reverse way; and is considered in either capacity superior to any single machines.

POINTS OF MERIT.

- 1st.—To change from pulping to slicing is but the work of a moment, which can be done at the one feeding, with no loss of time and no trouble.
- 2nd.—There are two separate wheels, one for pulping and the other for slicing. Each one is specially adapted for the work it has to do, with the best of knives placed in their respective wheels in a manner to obtain the very best results possible (three for slicing and six for pulping).
- 3rd.—The united force of both wheels is always used in doing the work in either capacity. This accounts for it being a steady, easy-running and rapid root cutter.
- 4th.—The Hopper being between the wheels, and having large lower pockets, prevents choking, and with the knife-wheels both internally shielded makes it perfectly safe and prevents the roots from acting as a break on the wheels, and also from jostling them about, so common in all other combined machines.
- 5th.—Hence the Latest and Best, and, what has been long looked for, a safe, rapid and easy Double Root Cutter.

Soliciting your orders for same, we are, yours truly,

TOLTON BROS., Guelph, Ont.

ONTARIO VETERINARY COLLEGE

Temperance St., Toronto, Can.
