

PULMONARY CONSUMPTION

(THE TREATMENT BY THE SHURLY-GIBBES METHOD.)

THE experiments and results, obtained by Heneage Gibbes, M. D., Professor of Pathology, Michigan University, and E. L. Shurly, M. D., Professor of Clinical Medicine and Laryngology at the Detroit College of Medicine, in the treatment of Pulmonary Consumption with solutions of chemically pure iodine and chloride of gold and sodium are already well known to the Medical Profession.

It is not claiming too much for this method to state that the results from its employment have been far more promising than those obtained from tuberculin, or from any method for the treatment of pulmonary consumption hitherto attempted.

It gives us much pleasure therefore to announce that we are now prepared to supply the necessary solutions in any quantity desired (with the endorsement of Drs. Shurly and Gibbes), and to guarantee their purity and uniform quality.

Reprints of recorded methods of using these solutions, with clinical reports, will be mailed physicians on request.

The solutions are put up in one-ounce bottles. Price per ounce of each solution, \$1.00.
