Medicinal Fluid Extracts.

Our list of **FLUID EXTRACTS** embraces not only those official in our Pharmacopoeia, but also those whose therapeutical value has induced their use among physicians.

Our many years' experience as practical pharmacutists, thorough knowledge of the character and properties of each drug, together with appliances for manufacturing (which for completeness and economy of working cannot be excelled), enable us to produce a line of Fluid Extracts of unsurpassed purity, activity and reliability. We ask for them the most careful and critical examination and comparison, claiming, as we do, their superiority over almost all other similar preparations in the market. We feel confident our claims will be sustained by any unprejudiced and experienced druggist.

Every detail of their manufacture, from the crude drug to the completion of the operation, is based upon the most extended and intelligent knowledge of the characteristics of each drug.

Chlorate of Potash Tablets,

For Sore Throat, Diphtheria, Hoarseness, Bronchial Irritation, Croup, Etc., Etc.

The advantages we claim for administering Chlorate of Potash in the form of a Compressed Tablet, is daily being demonstrated in the experience of medical men. The value of this salt is so well established, and the benefit to be derived from this mode of exhibiting it, cannot be exaggerated, when compared with its action as a gargle, for the inert and nauseating compounds of gum arabic, sugar, starch, flavoring, etc., so much in vogue. The superiority of our Compressed Tablet over other forms, is the entire absence of extraneous substances, composed simply of the pure salt; freedom from unpleasant taste; slow and uniform solubility; thus forming a continuous and direct action on the affected organs, or in other words, a long continued gargle. In no form can this valuable remedy be so advantageously and agreeably administered.

We will take pleasure in furnishing samples for the profession who may desire to test their efficacy and confirm our representations.

Dialyzed Iron.

The **DIALYZED IRON** manufactured by our house is now recognized throughout this country and Great Britain as the **standard preparation**, and its value as a chalybeate is becoming more pronounced every day. The testimony of our most prominent medical men has demonstrated its superiority over the other preparations in use, in the rapidity with which it increases the globular richness of the blood, in not deranging the most sensitive stomach, and freedom from injurious effects on the teeth. Dr. Armory, in the *Boston Medical and Surgical Journal*, April 3rd, 1879, says:—"Many of these solutions are valueless, many very dilute; if, therefore, physicians use a worthless preparation, they need not expect an improvement in the anemia."
