### **Brains and Capital**

In every partnership there are two factors of great importance: the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dics the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life. which are free from all restrictions as to travel, residence or occur tion, and are absolutely indisputable on any ground wheever after the FIRST YEAR. Get the rates and all persion from any of the Company's Agents or from Head Office.
