

birds and insects will be another attraction. There will be special provision for the Primary Department, beginning with a set of lessons on Number Work. Notes for lessons on English History, to accompany and supplement the text-book in the lower grades, are also planned.

It is to be hoped that many teachers will take advantage of the opportunities offered by the Summer Schools. Our readers will find detailed information about the Summer School of Science meeting at Halifax in another column. Three weeks could hardly be better spent than in attendance there. For those who can give a longer time, there is the Rural Science School at Truro. The University of Toronto has a Summer Session from July 2nd until August 8th, including special courses for teachers. The fee for one course is \$10; for three courses \$8.00. Board in one of the University Residences is \$5.00 a week.

The Summer School of Harvard University offers its usual great variety of courses with many attractions in the way of evening lectures, and excursions to interesting places. The minimum expense is reckoned at \$70.00 for the six weeks. This does not include travelling expenses.

The Summer Courses in French offered by McGill University are to be given at MacDonald College.

McGill also has a Summer School for Librarians. June 23rd to July 19th. The estimated minimum expense, not including travelling expenses, is \$35.00.

#### TO SUBSCRIBERS.

##### The Future Management of the Review.

It will be exceedingly gratifying to all readers of the REVIEW to know that the paper which for a quarter of a century has been so closely connected with the life and personality of Dr. G. U. Hay, is to be continued under the direction and control of his wife, Mrs. Frances Anetta Hay, whose sympathies and ideals were identical with his own. Closely associated with Mrs. Hay in the administration of the paper will be Miss Eleanor Robinson, of 174 Waterloo Street, St. John, who becomes its new editor and manager. Miss Robinson, both on account of her educational experience and former association with Dr. Hay, is well qualified for this work, and it was the desire of the late editor that this arrangement should be made. Co-operating with Miss Robinson in the general supervision of

the paper, there will be an Advisory Committee, composed of Mrs. G. U. Hay, Mr. J. Vroom, Superintendent A. H. Mackay, Principal David Soloan, Dr. W. S. Carter, Rev. W. O. Raymond and Professor H. G. Perry.

By this arrangement it is assured that the highest interests both of the paper and of education will be fostered and conserved.

F. S. P.

#### THE RURAL SCIENCE SCHOOL.

The Rural Science School, which meets in Truro, July 9 to August 8, promises to be of more than usual interest. The faculty of the N. S. Provincial Normal College selected over thirty of their most promising nature students in April, and allowed them to begin their Rural Science course then. These students will remain during the present summer course. The presence of such a group will be an inspiration to others who may join us in July.

Teachers of all grades may qualify for the certificate in Physical Training. Those holding Class "A" or "B" License; and those of Class "C," if they have a "B" certificate, may qualify for certificates in Science work which lead to increased Provincial grant.

Anyone wishing to become more efficient as a Nature teacher; or who wishes to know more about Insects, Plants, Birds, School Gardens, etc., will do well to avail herself of all opportunities this Rural Science School offers.

Class work, field excursions and good-fellowship are combined in such proportions as to make the summer a pleasant one and profitable.

There is a probability of the money grants to teachers being increased this year, but that will not be definitely settled for a few days yet.

#### JUNE.

Sunbeams dancing with the daisies,  
South wind swinging in the grasses  
Butterflies' bewildering mazes,  
Gentle croon,  
Where the dimpled brooklet passes—  
This is June.

Insects humming in the meadow,  
Azure haze where vision closes,  
Cloudless light, alluring shadow;  
Dreamy noon  
Filled with scent of hay and roses—  
This is June.
