

## PRECAUTION AGAINST CHINESE MIGRATION

Recently the internal disturbances in China have driven large hordes of immigrants into Mongolia and Manchuria, thereby threatening the advance of our migration. For the sake of our activities in this field we should not fail to take precautions. The fact that the Chinese government welcomes this migration and does nothing to hold back the tide oppresses our policy even the more seriously. A noted American sinologue has made the statement that the Mukden authorities are carrying out such effective government that all people are moving into their territory. Therefore, the influx of immigrants is looked upon as a mark of effective government of Mukden authorities. We, of course, are concerned. Unless we put a stop to it, in less than ten years our own policy of emigration will prove an instrument for China to crush us with. Politically we must use police force to check this tendency as much as possible and economically our financiers should drive the Chinese out with low wages. Furthermore, we must develop and expand electric power to displace human labor. This will keep out Chinese immigrants as well as monopolize the control of motor force as a first step toward controlling the industrial development of this vast region.

## HOSPITALS AND SCHOOLS

Hospitals and Schools in Manchurira must be independent of the South Manchuria Railway. For the people have often considered these as institutions of imperialism and refuse to have anything to do with them. When these are separated and made independent institutions we shall be able to make the people realize our goodness so that they will feel thankful to us. . . . But in establishing schools emphasis should be laid on normal schools for men and women. Through these in educational work we may build up a substantial good-will among the people towards Japan. This is our first principle of cultural structure.
