EXPLANATION OF THE CALENDAR PAGES.

LEFT HAND PAGE.

Column

1 and 2—Days of the Month and of the Week.

3 “ 4—The rising and setting in *mean time* of the highest point, or of the *upper limb* of the Sun, corrected for refraction.

5—The Sun's declination for the same as the Equation, 6th column.

6—Equation of time, (or quantity by which the Sun is *slow* or *fast* of the clock at noon, apparent, not mean, time at Greenwich.) Equation of time is the difference between *mean* and *apparent* time. There are only four periods of the year when this difference is nothing, namely,—about April 15, June 15, September 1, and December 24, as may be seen by referring to this column.

7—Length of days in hours and minutes.

8—The rising of the Moon.

9—The setting of the Moon.

10—The time of the Moon's southing, or passing the meridian. This column also gives the time of high water at Parrsboro', Horton, Cornwallis, Hantsport, Windsor, Newport, Truro, &c.

11—The Moon's place in the Signs or Constellations of the Zodiac.

The top of the columns of each month gives the Moon's Phases, or times of New and Full Moon, and of the First and Last Quarters, or quadratures of the Sun.

The FARMER'S CALENDAR is placed at the foot of the columns of each month.

RIGHT HAND PAGE.

1—The days of the Month.

2—Sundays, Weather, Anniversaries, &c.

3—The time of High Water at Halifax, N. S.

4— “ “ “ “ Pietou, N. S. and Cape Tormentine, N. B.

5— “ “ “ “ Annapolis, N. S.; St. John, N. B., and Portland, Maine.

6— “ “ “ “ St. John's, Newfoundland, of that tide which immediately precedes the southing of the Moon. These four columns are computed on the supposition that the time of High Water on the days of the New and Full Moon—*L'establissement du port*—is at Halifax, 7h. 30m.; at Annapolis, St. John, N. B. and Portland, 11h. 14m.; at Pietou and Cape Tormentine, 10h.; and at St. John's, Newfoundland, 6h. 30m.

All the calculations are made to mean *solar* time.

Explanation of “Time and the Calendar,” will be found at the top of the columns of each month.
