NEED OF BANKING REFORM. Speculative Business Now Catered

of the Merchant." Commencing with the fact that merchants buy and sell goods on credit, and, therefore, require a mercantile banking service, the speaker then raised the point that the chartered banks are continuing, sub ject to interest payments, the debts contracted by them when discounting mercantile paper, and also the debts which result from speculative investments. This practice was not sound banking and caused retailers to have an unnecessarily long list of slow and

The speaker said the merchants should insist on the mercantile banking service, as they do on other services, being up to the mark. Speculative business was now being catered to by the banks at the expense of mercantile interests, and action should be taken by their association to secure for retail merchants much needed banking reform

banking reform.

W. M. Hall, on being called on by the chairman, said that unfortunately the merchants of Canada were, as a class, unaware that the banking system was responsible for business conditions. Good banking would result in good conditions of life, while bad or evil conditions were caused by our bad systems, of which the banking system was the foundation, Among those who spoke in favor of action being taken to bring the banking needs of the merchants prominently before the association were the following: Messrs. Necessity of Labor.

I believe there is an abundance of capital ready to come in to develop the resources of Canada if only the necessary labor can be obtained. An abundant supply of cheap labor would also appear to be a condition precedent to the demand for highly-paid labor, such as that which the skilled artisans of Toronto can supply, and if You are doing a great work in making Canada the half-way house of empire, and in straining every nerve by means of your transcontinental rail-ways to shorten the transit between England and the orient and you have every reason to be proud of what you, with your comparatively small population, have accomplished and are accomplishing.

In addition to these services which you have contributed to the empirethere is another service which you are in a position to render to the empire, and for which the genius of your people is peculiarly adapted. The School Cadets.

If every school in Canada gave the same drill which is already given by the best schools of Winnipeg and Toronto, to the great benefit of all concerned, then Canada would be able to contribute in moments of emergency thousands of soldiers who, by reason of their character and efficiency, would be able to reader the measure to emitted. Gentlemen, arrested development for want of labor, a stricken population for want of sanitation, are both evils which it is in the power of man to remove. There is another danger hanging over parts of the Northwest, against which it is more difficult to combat, and that is the possible recurrence of a cycle of dry years. We must always remember that Canada has been blessed by an exceptionally long run of exceptionally favorable seasons, and the experience of the past leads us to fear that the fat
