Wheat—Under the impetus of a demand from shorts and the longs who sold out around the close yesterday, wheat opened a full half cent higher this morning, and rapidly advanced another fall cent. Around 83c for July, profit-taking, which was the largest vitnessed for many months, cheked the advance, and held the market stealy until first before the close when a further than the steal of the state of until just before the close when a fur-ther upturn was recorded. The full appre-ciation, however, was not held. The mar-ket closed strong at an advance of 2c from last night's close. Seldom has there been an array of business so foundable as greeted traders this morning and during the session additions were nade from time to time, which kept the trading act've, and the undertone strong. The healthlest indi-

the undertone strong. The health'est indication was the general advance in foreign markets, backed by reports of an increased demand for wheat for export which resulted in large sales. Reports of damage were the worst on the exopt. The advance has attracted greater interest on the part of the outside trading public and with a centinuation of the demand from abroad higher prices should result.

tho of weakness. Cash prices were ligher in both corn and outs and the buying in evidence was of the best possible character. We look for a further advance.

Melady & Co. had the following at the close of the market:

Wheat—Continental markets were higher, the foreign advances resulting from an official German crop report. Some 50 looks were worked for export and the inquiry from the other side was the best in several months. Cash markets southwest were long and cashes are steady at 11½c to 12½c. rrom the other side was the best in several menths. Cash markets southwest were about a cent up and most of the buying came from that direction. Fractically no rain has fallen in Kaasas and the foregast is for continued fair weather. Domestic crop conditions are certainly gloomy and suggest higher rains and the foregast is for continued fair weather. Domestic crop conditions are certainly gloomy and suggest higher rains and the foregast is for continued fair weather.

City. Corn—Local receipts were again small and cables higher. There is no indication that the country are anxious to 'sell even at advanced prices and the shipping demand has become urgent from various directions. Cash prices here and in the country were a country of commission. southwest were a centup. Commission houses were liberal buyers of July, but at 50c there was a considerable amount of July for sale. Would not advise purchuses on this bulge and think some recession to Oats—Crop reports were about the worst re' received. CHICAGO, April 26.-The problem of reducing the time for unloading cars at lake ports, loaded with freight for steamship lines, was under discussion by the American Radlway Association. Forty representatives of marine lines

participated. It was estimated that 75,000 cars arrived at the lake ports with freight for steamers during the season, and the average delay in unloading the cars is six working days.

It was generally conceded that an improvement could be made in the handling of cars, and even if the average was reduced but one day it would mean the use of 75,000 cars for that time and an additional income to the

This investment will bear the closest scrutiny.

It has a foundation of absolute earning power. It is proposed to supply a demand for power which is in excess of the total possible supply. This is an unfailing source of revenue, the proceeds of which can be exactly computed, as the following schedule shows:

The Company has obtained a concession from the Canadian Government to instal a power plant on the Montreal River, which will develop electric power and light for the sowns and mines of the Cobale district.

10,000 H.P. is the maximum development. 5,000 H.P. PLANT BEGUN. CONTRACTS LET The contract has been let for a plant developing 5,000 H. P., which in distri-

supply. Three towns also require light and power.
The demand for the power which this company will supply DOES NOT HAVE TO BE CREATED—IT AL-READY EXISTS. More than this— THE DEMAND IS URGENT AND INSISTENT. In commercial terms, there is a market eagerly waiting for the goods we can supply, before the manufacture of them is begun.
