**CHARLOTTE**—Highest-Grade Manitoba Flour, at a rate, go above 3,000 feet, and even when migrating he sticks nearer 1,000 than 2,000. A flight of wild geese sometimes reaches 2,000 feet, but not invariably. But no aviator has yet outdistanced the highest birds, for the great condor of the Andes is able to attain a height of 27,000 feet.

Mr. Hawker, an English aviator, has just broken a record by flying to a height of 20,000 feet. The average English bird does not, at a rate, go above 3,000 feet, and even when migrating he sticks nearer 1,000 than 2,000. A flight of wild geese sometimes reaches 2,000 feet, but not invariably. But no aviator has yet outdistanced the highest birds, for the great condor of the Andes is able to attain a height of 27,000 feet.

### BANISH BILE!

A bilious condition of the system is the result of inaction of the liver, often causing severe headache through the eyes and temples, culminating sometimes in nausea and vomiting, which is frequently followed by a bilious diarrhoea.

Abbey's Effervescent Salt, when taken as directed stimulates the people's glands of the stomach and increases the contraction of its muscles from above downward. This action is communicated to the intestines and increases the flow of the intestinal juices, thus stimulating the ducts of the liver to pour out the bile, when it can be carried downward by the laxative action of the Salt, instead of remaining to clog up the liver and flow back into the stomach.

Thus, if a person who is subject to Biliousness and Bilious Headache will use Abbey's Effervescent Salt, the natural action of the stomach, liver and intestine will be kept up and so bile can accumulate in the system. Sold everywhere at 25c. and 40c.

Sold by E. CLINTON BROWN, 217 Union Street.

### ANOTHER NEW BRUNSWICK SOLDIER WOUNDED AND IN HANDS OF GERMANS

### Various Forms Of Headache

"It is necessary in order to treat headaches properly to understand the causes which produce the different types. Dr. W. H. of Brockton, Ala. Continuing, he says: 'Nothing is better than the anti-kamnia when it has been the least sign of an oncoming attack; it should be taken two or three times a day. Such patients should always be instructed to carry a few anti-kamnia tablets, so as to have them ready for instant use. These tablets are prompt in action, and can be depended on to produce relief in a very few minutes. Anti-kamnia Tablets can be obtained small drugists.'
