

To this end I desire you to submit an accurate estimate of the cost of removal of garbage, refuse, etc. from the reserve, two or three times a week, as you may consider necessary. It has also occurred to me that dry earth or other similar sanitary closets might be provided for public use and I desire you to submit your views on this with an estimate of the cost. The Department could not undertake to instal such toilets in each residence, but if cost was not too great might provide one for each sex in some convenient location, the same to be kept clean by the party employed to look after other sanitary conditions on the reserve.

I will expect a full report from you on this question within the next ten days.

Yours very truly,

Deputy Superintendent General.
