

D3.

I recognize the soldier today and witness points to Gen Sullivan. I was standing in front of the accused Sullivan and my son was standing beside him and while writing asked my son for a glass of water. My son fetched a glass of water for him, while the accused Sullivan was drinking the water he was hiding the upper part of his face with his arms, he returned to my son and at the same time I heard some one running down stairs and then out of the house. The accused Sullivan then gave the paper to my son and left the house without saying a word. I examined the paper and found only a few scribbled marks on it. I recognize "EX A" as the paper in question by the pencil marks and the typing on the paper. The typing was on the paper before I gave it to my son for the accused Sullivan. The Sgt returned at 2:00 hrs. and I informed him what had happened in his absence. The Sgt went up stairs to his room and then came down and stated to me a bottle was missing from his room. The Sgt then left the house, and returned a short time later. We all went to our bed rooms.
