

How to Prepare a Manuscript.

When preparing manuscripts use plain white paper and good black ink. Don't use paper that is flimsy, transparent or so spongy that the ink is likely to bleed through, nor sheets that are of different sizes or that have been torn out of a notebook and left with the ragged edges untrimmed. The two sizes of sheets most generally used are commercial note book letter paper. If you have to send out handwritten copy never write it in pale ink or in lead pencil, or in backhand, which as a rule is extremely difficult to make out. Cultivate a round, clear, well-sized, almost vertical hand, and form the habit of leaving a wide space between the lines. Write, of course, on only one side of the paper, and if you are writing near the end, that you are going to run a few lines over what you thought would be the last line, don't squeeze the final lines together at the bottom of the page or write them on the back of it in order to save another sheet. In both handwritten and typewritten copy leave a margin of at least an inch at both sides of the sheet as well as at the top and bottom.—Franklin B. Wiley, in the *Ladies' Home Journal*.

HONEY EXCHANGE.

(SOMETHING BETTER.)

I will contract now for what you may have of next season's clover honey, or possibly there may be someone near you who breaks down the market and interferes with your trade. I can afford to pay more when bought in advance, as I will find containers and can plan accordingly.

Pen and Pencil Stamp—One-line 25 cts., Two-lines 30 cts., Three-lines 35 cts.

SPECIAL TO BEE-KEEPERS

Every Bee-keeper should have a Rubber Stamp and stamp his name and address on every section of honey, also on his envelopes. I will make a three-line stamp, 2 inches long, and send prepaid, with pad, to any bee-keeper in the United States or Canada, for 40 cents cash with order, if this paper is mentioned. Catalogue free. Agents wanted to sell rubber stamps.
