

The Razor Steel

Secret Temper, Cross-Cut Saw

WE take pleasure in offering to the public a Saw manufactured of the finest quality of steel and a temper which toughens and refines the steel, gives a keener cutting edge and holds it longer than by any process known. A Saw, to cut fast, "must hold a keen cutting edge."

This secret process of temper is known and used only by ourselves.

These Saws are elliptic ground thin back, requiring less set than any Saws now made, perfect taper from tooth to back.

Now, we ask you, when you go to buy a Saw, to ask for the Maple Leaf, Razor Steel, Secret Temper Saw, and if you are told that some other Saw is as good, ask your merchant to let you take them both home and try them, and keep the one you like best.

Silver steel is no longer a guarantee of quality, as some of the poorest steel made is now branded silver steel. We have the sole right for the "Razor Steel" brand.

It does not pay to buy a Saw for one dollar less and lose 25c. per day in labor. Your Saw must hold a keen edge to do a large day's work.

Thousands of these Saws are shipped to the United States and sold at a higher price than the best American Saws.

Manufacturers and dealers in

GILT-EDGED CREAMERY BUTTER

ARCH. RUSSELL, General Manager

THE CANADIAN DAIRY SUPPLY CO., Montreal, P. Q.

Arnprior, 14th Dec., 1900.

Gentlemen,—Now that we have our Creamery in operation and all the 30 Baby Separators placed, we thought, perhaps, you would like to hear from us.

It is with pleasure we say that the Creamery outfit is most satisfactory, and to add that our patrons are "delighted" with the Baby Separators is using a mild term, more particularly as the majority of our dairymen looked upon the promised results as the "stock in trade" of the talkative agents. They have, however, got over that stage and have now settled down to solid work, which has given us encouragement and confidence in the enterprise that will be of great advantage to stock raisers who will have their own milk feed in a normal condition without artificial heating. The expert assistance you gave us was of the utmost importance to the success of the undertaking in explaining and creating confidence in the minds of our patrons, who are with us solid now.

We have the proof already of the uniformity and smoothness of the cream from the Alphas as compared with that from another make which is quite lumpy and unsatisfactory.

Yours faithfully,

ARNPRIOR CREAMERY ASSOCIATION
ARCH. RUSSELL.
