IN CHOOSING A HARROW

INVESTIGATE THE GANGS

Whenever Disk Harrow gangs crowd, you have trouble. In most Out Throw Harrows they bump together, rock and sway; they are heavy on the horses and when the land is tough or hard, they rise out of the ground. Bissell Disks are a different construction from others. The gangs do not butt together. They have no rocking motion. The draught is steady and even. The team will travel faster, do more work and do it easier. Bissell Disks will work land which is too hard for any other make to handle and have wider field of usefulness. They do not fail where the most work is required.

The Cleaners are built of steel throughout, riveted to stay, and are operated by a locking device—No castings to break, no coil springs to get out of order.

The Bissell Scrapers are the only Scrapers on which the steel clod bars are moveable endwise by a lever, thus keeping the spaces between the plates free from clods. The cutting edges of the plates are kept clean by the steel blades.

AXLES ON BISSELL GANGS

The axles are heavy—malleable nuts and washers are used so that the complete gang can be drawn up so tight that the axles can not spring or allow the disks to work loose.

The Bissell Bearing is a success. The body parts are all in one piece, manufactured without the use of bolts. No holes to break out. No crevices for dirt to work in. The journal being tapered, the pressure is toward the balls which are elevated on a heavy durable base. This is why Bissell Disk Harrows excel in light draught. The end of the bearing opposite the balls is protected by malleable rings or sand bands, making it impossible for dirt to enter.

The success of Bissell Disk Harrows is beyond dispute—only one is genuine—the one with the name Bissell.

AGENTS FOR THE

HUBER Light-Four TRACTOR

Let No Man or Beast Do Work a Machine Can Do

Farm labor costs more than ever before. Feed is high and going up. Horses were never so valuable. Don't use skilled men and expensive teams to do work that can be done more quickly, more efficiently and more economically by a machine. Don't keep more horses than you need most of the year, just to have enough power during the rush season.

The Huber Light Four does the work of 4 men and 12 horses. Does it better. Easily pulls three 14-inch bottoms set 8 inches deep in any land where a good team can pull one bottom. Enables you to plow deeper, make a better seed bed and get more crops. Does it cheaper. Burns gasoline, kerosene or distillate. Economical in fuel consumption.

The Huber Light Four does most of the work horses can do and many things

that horses cannot do at all. Furnishes power for plowing, pulling the harrow, the seeder, the manure spreader; runs the ensilage cutter, buzzes wood, hauls loads, pulls stumps, helps in a road construction. Unlike most farm machinery, it works every month in the year.

The Huber Light Four is the most efficient unit of farm power. Built by manufacturers having forty years' experience in the making of tractor engines and threshing outfits. Delivers 12 h.p. at the draw-bar, 25 h.p. at the belt. 4-Cylinder Waukesha Motor, water cooled; never runs hot. Automatic splash lubrication. Cut steel gear transmission. Heat treated, running in oil bath. Hyatt Roller and Gurney Ball Bearings. In the 5,000-pound class—does not pack the ground. Turns in a six-foot radius. Road speed, 2 1/4 miles an hour in low; 4 miles an hour in high.

Be sure and see the HUBER at the Cobourg Demonstration, Sept. 17, 18, 19, 20*

"MACHINES MUST TAKE THE PLACE OF MEN"

Let the "Alpha" do your work

Grind Feed
Saw Wood
Pump Water
Run Separator,
Churn or Wash-
ing Machine.

AN ALPHA Engine is almost indispensable on the farm these days when labor is so hard to get. It's so reliable, too. Always on the job. Never quits. Never gets laid up. You can always depend on an "Alpha."

Thousands of Canadian engine-owners swear by the ALPHA, because they have found that it is reliable at all times and under all conditions. It is sturdily built. It is simple in construction. It is powerful. It runs on either gasoline or kerosene, and develops its full published horsepower on a minimum amount of either. If you want an engine that you will be thoroughly satisfied with, put your money into an ALPHA.

Ask for catalogue, prices and complete information. Made in twelve sizes, 1 1/2 to 25 H. P. Each furnished in stationary, semi-portable or portable style, and with hopper or tank-cooled cylinder.

THE DE LAVAL COMPANY, Limited

LARGEST MANUFACTURERS OF DAIRY SUPPLIES IN CANADA.
Sole manufacturers in Canada of the famous De Laval Cream Separators and Ideal Green Feed Silos. Alpha Gas Engines, Alpha Churns and Butterworkers. Catalogues of any of our lines mailed on request.

A Woman's Duty

A woman's first duty to her family and to herself is to maintain her health, and, as far as possible, her youth.

The heavy labor of washing is destructive of health. A woman who does work of that kind ages rapidly. Such work should be done by a machine.

In the "Dowsell" line, you will find a washer to fit your needs. The one illustrated is the

Patriot Hand Power Washer

We make other models
for gasoline, wind
engine, electric
and foot
power.
