Mills at Winnipeg, Goderich and Brandon

WHY WAIT TILL SPRING

Why Waste Cream and Butter all the Winter?

SIZES 1 TO 6.
Capacity
400 to 1,300 Lbs.

We say and can prove that the Melotte will pay for itself in increased cream and butter yield alone (at least 20%) before spring comes, to say nothing of improved quality of warm and sweet skim milk for calves and pigs, and the saving in time, labor, space and utensils.

Why not allow us to send you a Melotte on free trial, and let the machine speak for itself? If you have less milk now, remember it is more valuable, as butter is making better prices, and 20% more cream and butter every week is surely well worth saving.

The universal advice of Melotte users to friends and neighbors is

Be Sure and Get a "Melotte"

This is why the Melotte has to-day by far the largest sale in Canada.

Why not allow us to send you a Melotte on trial? State the number of cows and we will tell you the best size to try. There is no risk, no trouble, no expense to you, and cash or credit terms can be arranged.

We ask again: Why wait? Why not commence getting that extra butter yield at once? It is yours for the asking. Write to-day for illustrated catalogue.

R. A. LISTER & CO., LIMITED

HEAD OFFICE AND FACTORY: STEWART STREET, TORONTO.

Farmers make their own tile. Send for descriptive catalogue of Cement Brick Machinery, Block Machines, etc.

THE LONDON CONCRETE MACHINERY CO'Y,
28 Redan Street, London, Ontario.

IS YOUR ROOF ALL RIGHT, and are YOU All Right on the Roofing Question?

IF YOU cannot answer the above questions with a vigorous "Yes!" send at once for a Free Sample of Carey's Roofing and learn about its common-sense construction and practical use. Carey's Roofing gives far better satisfaction than shingles, metal or other composition roofings.

Carey's Roofing is suitable for all buildings about the farm, is adapted to flat or steep surfaces, and may be applied over old shingles without removing same. Being a perfect non-conductor, it makes the very best siding for live stock sheds and poultry houses.

CAREY'S Flexible Cement ROOFING

differs from all other composition roofings. In durability, this difference runs from ten to twenty years in favor of Carey's. Quality and durability are stamped on the very face, base and body of Carey's Roofing.

The body of Carey's Roofing is composed of an always Flexible Asphalt Cement, which for 80 years has stood all manner of severe tests. Carey's Asphalt is imitated, but never duplicated by other manufacturers. This Asphalt Cement body is protected by a heavy felt foundation and strong bur-lap imbedded in the upper surface. The three layers are compressed into indivisible sheets, the weather side of which is thoroughly treated with Carey's Fire-resisting Cement Compound.

The Carey Patent Lap covers and protects nail heads, insuring a neat, permanent, absolutely moisture-proof and wind-proof union. The recent Gulf Coast storm played havoc with tin and shingle roofs. A Carey Roof has never been known to blow off--it lasts as long as the roof boards hold.

Carey's Roofing is sold from shipping points conveniently located all over the country, insuring lowest freight rates.
