

THE WAIL OF THE WASTEFUL

"I can't afford to buy a Cream Separator," is the occasional cry that reaches us. No one who keeps cows can afford to be without the genuine

De Laval Cream Separator

The machine that saves from \$10 to \$15 per cow each year—the Separator that is so largely imitated but never equalled. There's an easy way to pay.

The Importance of Long Fibred Wool Felt.

Why many roofings wear fairly well for a year or two, and then suddenly rot to pieces, may have mystified you.

The truth, however, is that the wood pulp, jute, cotton cloth or cotton felt, etc., used as the basis of the roofing does not possess the power to become completely saturated, but merely becomes coated with the

tar, oil or whatever material is selected. When the coating wears off, the basis of the roofing is left unprotected, and quickly rots away.

Brantford Roofing

For the basis of Brantford Roofing we use a very superior grade of wool felt. This felt has long fibres, and it's long-fibred wool, you know, which has the power to absorb most greedily, and which retains longest whatever it absorbs. Now this long-fibred wool felt is completely saturated, through and through, with asphaltum—a material which is closely related to the asphalt (that tremendously strong and wear-resisting material), with which streets are paved.

This combination of wool felt and asphaltum produces a roofing which has no peer for resisting heat, frost, rain, snow or acids. It makes Brantford Roofing a better investment than any you will be offered. We would like you to get samples from your hardware dealer, or, if preferred, will on request mail them direct.

Small Animals

are as effectually imprisoned as the larger ones, for we make "Maritime" Wire Fence with spaces too small for the little, wee piggies to squeeze through.

The absolute regularity of the weaving, the stiffness and springiness of the English high-carbon, hard-drawn steel wire, the remarkable gripping-strength of our lock, make "Maritime" Wire Fence a decidedly stronger fence—one that you ought to know more about.

Just write for our **Free Catalogue**

It contains many valuable pointers on fencing.

New Brunswick Wire Fence Co., Limited.

London Fence

STRETCHES UP EASIEST, NEATEST, BEST

A wonderful improvement in woven fencing—that's the verdict of all who have examined the new London Woven Fence. With our improved Factory Looms we produce all even length strands—which means a far neater fence—one more easily erected—with a total strength unequalled by any other fence.

When up, the London Woven

Fence presents an appearance that for neatness and symmetry is not approached by any fence in your neighborhood. Every lateral, stay and lock of heavily galvanized

No. 9 steel wire, of the same temper, elasticity and strength that have earned for London Fence such a high reputation. Stays are remarkably stiff and straight—will not warp or curl. The lock is beautifully simple. Requires no weakening of wires by indenting or bruising. And you never saw a lock with a grip so marvelously tight. By long odds the biggest fence value on the market.

NOTICE THE TEETH

In considering the purchase of a Spring-Tooth Cultivator notice the Teeth very carefully. They are one of the most important parts of this kind of an implement. It depends upon the Teeth as to how well it does its work. See that they are of proper length, proper shape and temper; that the points are reversible, for that means double value to you. Next see that the Frame is simple and strongly built of steel and malleable iron so that it will stand the strain and wear well. Ask our agent about a

FROST & WOOD

"CHAMPION" SPRING TOOTH CULTIVATOR

and you will see a machine that embodies all these good points. He will tell you that the Teeth are tempered in oil and tested; that they are made of Crucible Spring Steel, and the reversible points are an especial advantage as when one becomes worn by hard, stony ground it can instantly be reversed, and you have a new sharp point. Teeth can be spread or taken off when used for corn or root crop cultivation. It is an implement that gives perfect satisfaction, because it does perfect work and stands rough wear. Our Free Catalog "F" gives more good points. Write for it, or get it from our nearest agent.
