## THE WESLEYAN, FRIDAY, NOVI MBER 26, 1880.

the food to assimilate properly-thus the system is nourished. /It also, by its tonic action on the digestive organs, induces more copious and regular evacuations. The rapidity with which patients take on flesh while under the influence of the Syrup, of itself indicates that no other preparation can be better adapted to help and nourish the constitution, and hence be more efficacious in all depression of spirits, shaking or trembling of the hands or body, cough, shortness of breath, or consumptive habit. The nerves and muscles become strengthened, and the blood purified.

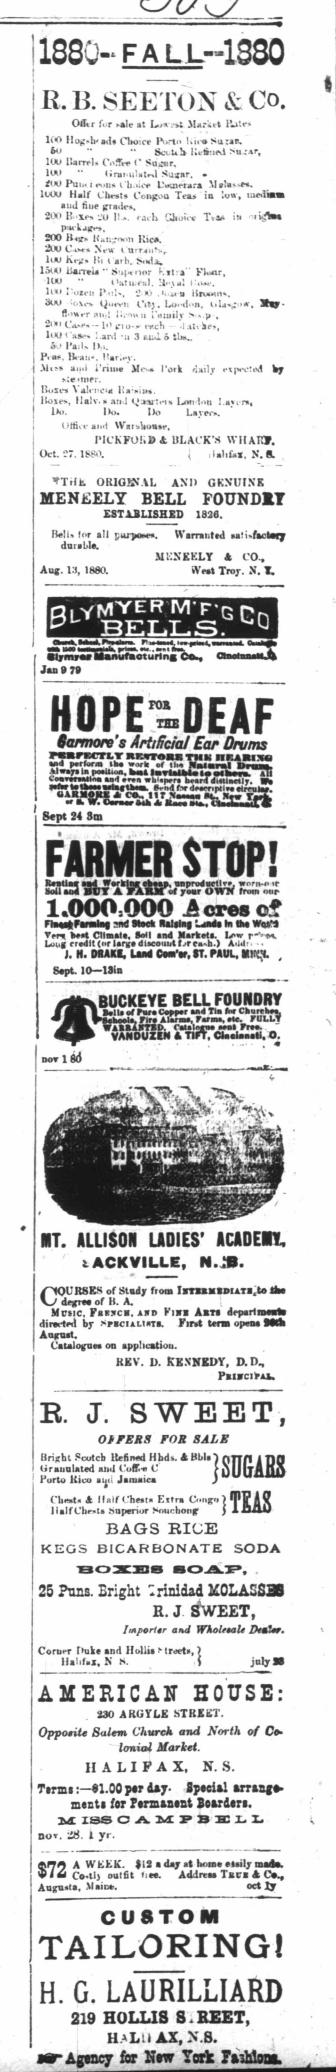

READ WHAT THE INVENTOR, MR. FELLOWS, HAS TO SAY ABOUT HIS SYRUP OF THE HYPOPHOSPHITES.

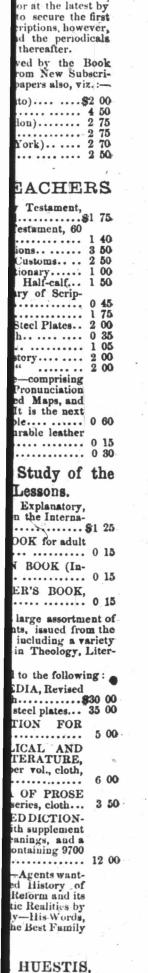

In the summer of 1864, I was suddenly effected by a copious expectoration of muco-purulent matter. I had been declining in health for some months, and, being exceedingly nervous, the symptoms caused alarm. As my business was that of a dispensing chemist, the shop was constantly visited by medical men, all of whom tendered their advice. During 1864 and 1865 my chest was examined by ten first class physicians, some of whom pronounced the case Bronchitis ; some, not wishing to cause alarm, or unwilling to venture an opinion, gave no decision ; some stated unequivocally that I had Tubercular Disease of the Lungs, and located the trouble where the pains were felt. By professional advice, I used, in turn, horse-back exereine, country life, eggs and ale in the morning, tonics, Bourbon whiskey, cod-liver oil, electricity, tar, and various inhalents, but the trouble increased. Expectoration became more profuse and offensive. Night-sweets set in. Cold chills, diarrhosa, dyrpuces, cough, blood-streaked expectorations, loss of sleep, loss of appetite, loss of memory, loss of ambition, accompanied by general prostration, showed themselves. Under the microscope the blood was found to contain but a small portion of vitalized corpuscles ; the heart's action was feeble ; the pulse intermittent ; the stomach could not digest properly, so that flatulency and saidity was the result. Finding the symptoms indicated Consumption, I determined to use every effort to stay its progress, and, if possible, to care it. I selected the most powerful tonics and moderators, and combined them with the vital constituents of the human body. For months I endeavored to amalgamate them before my efforts were crowned with success. I car not speak too plainly or too strongly of the effects produced, and the benefits I was ed from the composition.

At first my appetite increased ; the expected ation bedame cany, in the in view? the faces became more copious and less frequent; cold sillis ceased ; night-sweats lessened; I gained i, w ight; the lacking cough left ma; refreshing sleep returned; my spirits became buoy int, the min lactive and vigorous. I continued taking the
