Well Drilling Machinery

You can make big money making wells. This is one of the few lines of work that are not over-crowded. The demand for wells is far greater than can be supplied by the machines now at work. Well Drillers command their own prices. We build the celebrated HOWELL line of Well Machinery, for making deep or shallow wells of all sizes, for all purposes and in all kinds of ground. Our machines are the most up-to-date on the market, contain all the latest improvements, are extremely strong and simple, do perfect work, are easily operated and are very FAST WORKERS. Write to-day for our Free Catalog A.

R. R. HOWELL & CO., Minneapolis, Minn.

POLYURIA

I am working a three-year-old horse colt, broke this spring. Am working him on a disk and not very hard. He wants to urinate from eight to twelve times a day. Sometimes he will make water and sometimes just stretch out and strain. He gets fresh water, is running on good pasture, gets chopped oats, about two gallons at a feed three times a day.

C. B. S.
Alta.

Ans.—You do not say how long your horse has been ailing but we presume it is only since he has been on pasture. As you inform us, he has been running on good pasture. The grasses would likely be very succulent, containing a large amount of water hence a greater quantity of urine would be passed. Or, as very often is the case with many horses, a change of feed, from hay and oats to grass for instance, disturbs the digestive system to such an extent, that the kidneys become involved.

They are over stimulated to action, by an excess of certain products of indigestion, which are in the system, and the kidneys try to get rid of it. We recommend you to keep him off the grass until his condition becomes normal, then, if it is desired that he should be turned out, put him on the poorest pasture you have for a while until his digestive organs become accustomed to the change. But should he continue to pass urine too often he must be prepared for a physic by feeding for twelve hours on bran mash only, then administer a physic ball containing bar-badoes aloes, from eight to ten drams, according to size of the horse, calomel one dram, powdered ginger one dram, soft soap sufficient to combine and make a ball. Roll up in soft paper to about two and one-half inches in length and three-quarters of an inch in diameter. Continue to feed bran mashes, only, until he commences to purge. Then give half his usual allowance of hay and oats increasing the amount to his usual allowance as purging ceases. If by this time he is still urinating too freely, give the following medicine morning and evening. Powdered sulphate of iron, twelve drams, iodide of potash, six drams, iodine crystals six drams, divide into twelve doses each dose to be given in a capsule or rolled up in paper with enough powdered gentian to fill the capsule, or make a ball of the proper size.

HIRE OF HORSE

What would be a fair and reasonable price to charge per day for a work horse? Sask. L. J.

Ans.—About _____ per day, the user to keep him in good condition.

FOUNDATIONS

Which makes the best foundation for a barn, wood, cement or stone, not taking cost into consideration, only durability. Sask. W. J. N.

Ans.—For durability alone nothing is better than concrete made with quite a large proportion of cement.

ARGENTINE HOMESTEAD

Can homesteads or grants of land be had in the Argentine Republic and to whom should one write for information. A. A.

Ans.—We are not aware what system of settlement is in vogue in the Argentine, but you might write to the government offices, Buenos Ayres.

LOST ROBE

A and B are partners. C is a neighbor and is hired with A and B. In moving to their homesteads they shipped together and all joined in hauling out to the farms. One day all went to town and as B was not well he took a large robe from C's house. After loading up in town D was started home and the robe was thrown on his load. On the way home the robe was lost but A and B made no effort to find it. Who is responsible. Sask. E. R.

Ans.—Since a man is responsible for the return of articles borrowed B and A should consider themselves liable for the robe. D is not to blame nor is C, although both should have been careful to see that it was not lost.
