NOTE.—In reference to the difference between the present and former Estimate, the following reasons are assigned.
 “Administration of Justice” reduced £600, no second Circuit or Special Commission having been deemed requisite.
 “Government office” increased £100, and “Executive Council office” increased £50, the expenses of the first six months having exceeded a moiety of the sum named in the former Estimate.
 “Surveyor General's office” reduced £300—the
 “Register's and Secretaries offices” reduced £50—and
 “Casual. &c. Expenses” reduced £250, the sums now named as necessary, it is thought will be adequate to the Expenses of the last six months of the year.
 “Printing the Laws” reduced £420—owing to the very few acts passed during the last Session and the service being performed by contract, this item has been contracted for at less than £30.
