

CALIFORNIA'S PLANT

It was Run Yesterday and Operated Satisfactorily.

WORK ON ORO DENORO MINE

Annual Meeting of the Mystery Gold Mining Company—Directors and Officers Elected—Books of the Hall Mines are to be Gave Over.

At the California yesterday the new 10-drill compressor was started and worked in a perfect manner. There was not a single hitch in any portion of the machinery, and Mr. W. Y. Williams, the superintendent, expressed himself as pleased with the manner in which it operated. It is a very handsome plant, and one in which the Jencks Machine company, which constructed it, may well feel proud. The air was turned on, and one of the power drills operated, and it was found to operate very satisfactorily. The force on the California has been increased to 25 men, and from now on it is certain that the work will be pushed rapidly. The first work will consist of the deepening of the shaft and the extension of the tunnel.

The Oro Denoro.

Mr. Ross Thompson has returned from a visit to the Boundary creek country, and while there he inspected the Oro Denoro, which is being operated by the King Mining company. There are 25 men employed on the mine. One tunnel is in for a distance of 150 feet, 60 feet of which is in ore, commencing at the surface. On this same level over 100 feet of drifting has been done. Another tunnel is now in about 200 feet, and it is expected hourly that it will tap the ledge at a vertical depth from the surface of 250 feet. The 60 feet of ore encountered on the upper level will average about \$20 to the ton, most of the values being in copper. The ore carries only a small quantity of gold. Within a short time after the ore has been found on the lower tunnel the property will be in a position to ship from 50 to 60 tons of ore per day.

Mr. Thompson reports that the Zala M in Sheridan camp, on the reservation, is looking remarkably well. Drifting is in progress on the lower level, where the ledge is five feet in width and carries ore of a very high grade. One car load of ore was sent to Midway, and from there to Northport, but the roads are in such a condition at present that no more will be hauled out until the ground becomes hard. Then the intention is to make other shipments.

The annual meeting of the Mystery Gold Mining company was held in its offices in this city yesterday, and the following board of directors elected: Messrs. John Thompson, Frank Asprey, J. E. Saucier, M. Becker and E. M. Quimette. The directors elected the following officers: President, Frank Asprey; vice-president, J. E. Saucier; secretary-treasurer, E. N. Quimette.

The report of the secretary showed that 415 feet of work had been done. In addition to this, rails had been made and cabins and blacksmith shop constructed. Counting all the expense of this in with the cost of the tunneling and the total is only \$7 per foot, which the directors considered to be extremely low.

Mr. John Thompson, the managing director, reported that the tunnel which is being driven towards the ledge is now in for a distance of 145 feet, and will have to be pushed from 40 to 50 feet further before the ledge is met.

Will Be Investigated.

It is said that the directors of the Hall Mines, Limited, have decided to send out an expert accountant from London to "go through" the books in the Nelson office of the company. It is said that considerable of the company's money has been paid out for other things than mining and smelting ores.

Mining Around Silverton

At the Wakefield concentrator they have got through experimenting with the ore, and the mill has settled down to a run. Concentrates are now rapidly accumulating at the mill and before long shipments will be commenced to the smelter.

One of the crosscuts being driven on the Torpedo claim to tap the parallel ledge, at a distance of 95 feet, reached the vein, and is now being driven into it. Although the tunnel has as yet only just broken into the vein enough ore has already been encountered to show that the vein is a good one. This crosscut taps the vein at a depth of 75 feet. The other crosscut that is being driven to tap this same vein has as yet reached the ledge, which it will tap at a depth of over 150 feet.

A full force of miners are again at work on the Hewett mine, and the ore works are kept busy sorting and sacking up ore that runs from 125 to 500 ounces in silver to the ton. The main working tunnel on this property is now in over 400 feet and in the face of the tunnel is three feet of good shipping ore. About two carloads of ore is now sacked up at the mine, awaiting transportation, and the ore piles on the dump are rapidly increasing in size.

Assays made on the ore being taken out of the Old Maid tunnel gives returns of 60 ounces in silver to the ton. The tunnel is now in nearly 100 feet and all in ore. The vein is over 12 feet wide, and the Old Maid promises to be the big strike of the season in the silver bearing portion of our district.

That Proposed Consolidation.

Editor Miner: With your permission I would like to take exception to some statements that appeared in the columns of your paper Friday over the signature of W. L. Orde, secretary of the Brandon & Golden Crown Co. Mr. Orde is imbued with the laudable purpose of disabusing the public mind of the thought that the Brandon & Golden Crown company would stoop to seek consolidation with the Winnipeg and further enlightens us with the statement that the whole scheme originated with the Winnipeg people. On the contrary, I

have been given to understand that several of the largest shareholders of the Brandon & Golden Crown Co. were responsible for the inception of the scheme, and that after it had been informally endorsed by them Mr. McIntosh, the president of the Winnipeg company, was approached and a proposition made to him for the consolidation of the two properties on a share for share basis in the new company. The directors and officers of the Winnipeg other than Mr. McIntosh were not consulted, as it is quite possible that the consolidation scheme will not get beyond the embryonic stage, as on Mr. Orde's authority no such proposals were made by the Brandon people, and even if they were it is by no means certain that they would be endorsed by the Winnipeg shareholders.

Mr. Orde also makes the extraordinary statement that it is certain that no consolidation will take place "without great concessions being made by the Winnipeg." I take it for granted, of course, that this statement is made authoritatively, and that Mr. Orde, as secretary of the Brandon & Golden Crown Co., is but voicing the opinions of the directorate of that company. The Winnipeg company is not going to make "great concessions" to the Brandon & Golden Crown. The idea is simply preposterous and it would be a mere waste of time to talk of consolidation of the two companies on any such ridiculous terms as Mr. Orde would indicate. "Comparisons are odious," so I will refrain from any comparison of the Golden Crown and Winnipeg properties, though the slur cast upon the latter by Mr. Orde would perfectly warrant me in so doing. The shareholders of the Winnipeg have just as high an opinion of their property as Mr. Orde has of the Golden Crown, and many of them are not disposed to agree to amalgamation of the two properties even on a share for share basis. Thanking you for your space, I am, yours truly,

RICHARD PLEWMAN.

THE MAPLE LEAF CLAIM.

It Is Probable That the Rathmullen Company May Sell It.

The special general meeting called by the Rathmullen company for the 25th of April next is for the purpose of submitting to the shareholders, and if deemed desirable, forming a subsidiary company to buy and develop the Maple Leaf claim. The proposal made in this connection by the Hon. G. E. Foster, a member of the Rathmullen board, is so favorable to the Rathmullen company that it is believed it will be accepted without opposition. If the subsidiary company is formed, it is proposed by the Rathmullen company to start development work at once upon the Ben Hur claim. Any stockholder desiring further information can obtain it by applying to the secretary at the Rossland office of the company.

An Important Cutoff.

An important piece of construction work is about complete on the Spokane Falls & Northern road. It is a cutoff from Dragon station to Dragon junction, three and a half miles in all, which cuts off 16 miles of the old road. When the cutoff is opened for traffic the Spokane Falls & Northern will save the distance specified and the maintenance of the road bed and bridge, an important item of expense. The work was done by Foley Brothers & Larsen.

Kuskanook Is Gratified.

Mayor Goodeve yesterday received the following dispatch from Kuskanook in response to the money and goods sent to the people of that city: Mayor Goodeve, Rossland. The citizens of Kuskanook send their most sincere thanks to the people of Rossland for their most liberal contributions in aid of the fire sufferers. All necessity for further aid is past. J. C. Blandy, chairman of the relief committee.

IMPORTANT

That People Should Know Just What.

Paine's Celery Compound

Can Do For Them in Spring Time.

It Begins Its Good Work at the Root of Trouble and Disease.

It Feeds and Braces the Nerves and Drives Impurities From the Blood.

With the ushering in of a new season, it is important that people should know just what Paine's Celery Compound can do for tired, half-sick, nervous, sleepless, irritable and despondent people of all ages.

Spring is the time when thousands have the "blues," and go about in misery and wretchedness. The nerves of such victims require nourishment and their blood must be purified. As soon as this all-important work is begun by nature's blood purifier and system builder, Paine's Celery Compound, the seeds of lurking disease are expelled from the body, and health and true vitality are manifested in the face and in every movement of the limbs.

To win back refreshing sleep, good appetite, natural digestion and continued good health, the best remedy in the world is not too much for any one to insist on getting. If you have the slightest doubt about the power and efficacy of Paine's Celery Compound, have at least as much faith as some of your friends and neighbors who have tried a bottle and are now praising its virtues and life-giving power. Paine's Celery Compound cures when all other medicines fail.

THE BIG HOIST FOR THE LE ROI

CONTRACT FOR FURNISHING IT GIVEN TO FRASER & CHALMERS.

A Lucky Snowslide—A Letter Concerning the Brandon & Golden Crown and the Proposed Consolidation.

The contract for furnishing the 700 horse power hoist for the main shaft of the Le Roi has been let to Fraser & Chalmers, of London and Chicago. The hoist will be driven by steam. It will be a Corliss direct driven hoist. The contractors have promised to turn out a first class hoist, and one that will easily do the work required of it. The firm of Fraser & Chalmers has the reputation of doing as it contracts to, and will make no exception to the rule in the present instance.

A Lucky Snowslide.

A short time ago the directors of the Pactus Gold Mines decided to run a crosscut to strike the lead on the Champion claim, one of the Pactus group, says the Nelson Miner. The foreman in charge of the work, however, reported that the spot chosen as the proper place to start the tunnel was buried in 40 feet of snow, it being a bad place for drifting, the work could not be proceeded with as arranged. However, yesterday another report was received to the effect that an immense slide had come down, cleared the snow away and the work had commenced. Slides are sometimes very useful, and this one was decidedly timely. The Champion gives every indication of being very rich in gold.

Brandon & Golden Crown and Winnipeg.

Editor Miner: I was rather surprised to read the paragraph in your mining column of yesterday's issue concerning the proposed consolidation of the Brandon & Golden Crown and Winnipeg. I am sure it is desirable to disabuse the public mind of the idea sought to be conveyed by the language used in this paragraph, that it is the Brandon & Golden Crown who are seeking consolidation. I wish to say for the information of the public that the idea of consolidation originated entirely with the Winnipeg people, and it is the manager of that company who has been forcing the issue, and it was he who gave publicity to the matter.

The question of consolidation has not even been considered at a meeting of our directors, and beyond preliminary discussion, has not reached a stage at which it can be said that the directors will entertain the proposition. If, as stated in the paragraphs in question, "there is a growing sentiment among the shareholders of the Winnipeg which is strongly opposed to the consolidation of these two properties," I can only say that I feel satisfied that there is an overwhelming sentiment among a large number of the shareholders of the Brandon & Golden Crown at even entertaining the idea of consolidation. Certainly, no consolidation can take place without great concessions being made by the Winnipeg. The Golden Crown is working at full blast, and raising 25 tons of ore every day, which is averaging \$25 a ton. We have nearly 200,000 shares still left in our treasury, and consequently ample capital for carrying out development work; our ore bins have been completed, and we are ready to ship at least one car of ore per diem as soon as the Columbia & Western railway will lay its track into our ground. As to the stock of the Golden Crown falling, I suppose it is falling in sympathy with other stocks. There can certainly be no justification for this lowering of price, as the mine never looked better or showed more promise of being what all those who are interested in it have always claimed, namely, that for its development the Brandon & Golden Crown has so far disclosed the largest bodies of high grade ore of any property in the Boundary. Thanking you for your space, I am, sir, yours truly,

W. L. ORDE.

Sec. Trees B. & G. C. Mining Co. Rossland, B. C., March 23, 1900.

ANSWERS TO INQUIRIES.

The Old Gold Quartz and Placer Mining (Arduous)

Editor Miner: I would like to know, through your paper if you could give me any information about the Old Gold Quartz and Placer Mining company, in the Lardeau country? Are they at work on the mine, and what are the prospects of it being a share property. I am interested. Yours truly,

W. MacLEOD.

The Old Gold quartz and Placer Mining company has a number of claims. It owns a group of four claims on the north fork of the Salmon river, a group of two claims on Whiskey creek. Besides the foregoing the company owns the Silver King and Silver Queen claims, situated in the Duncan-Lardo district, four miles from the Duncan river. On these latter properties considerable work has been done. The property has been developed by about 170 feet of tunnel and a crosscut. The ledge on this property is very wide and the paystreak on the hanging wall is from 18 inches to two feet in width of galena, carrying gold. A smelter test of the ore shows that it carries the following values: \$3.20 in gold, 150 ounces in silver and 55 per cent. lead. A contract for certain development work was closed up a few days since, and work is to be resumed as soon as a new contract is let. The railroads which are being built into that country and which will be finished this summer will give the Old Gold company the necessary facilities for shipping and the intention is to commence sending the ore to the smelter this summer. Some rich ore shoots have been exposed by the development that has so far been done.

Concerning the Lily May.

Phoenix, B. C., March 2.—Editor Miner: Please let me know how the stock in the Lily May stands at present, and oblige, Yours, etc.,

M. McBEAN.

The assets of the Lily May Gold Mining & Smelting company were transferred some time since to the English-Canadian company, limited, of London, England. Operations were carried on for a short

time by the latter company, but have now ceased for several months. This same British Canadian company acquired the properties of the Fourteen Gold Mines Consolidated, limited. Mr. M. A. Green is the local representative of the English-Canadian company, and a letter addressed to him in relation to the Lily May would doubtless bring you the information which you desire.

ACCIDENT AT THE LE ROI.

Hugh A. Macdonald, While Shaking Timber, ets His Leg Broken.

An accident occurred Thursday afternoon at the Le Roi to a teamster, Hugh A. Macdonald, who is in the employ of the mine. Macdonald, who was engaged in dragging timber to the construction works that are proceeding on the hillside, found that he was on the lower side of the timber which was being dragged. Flitting the team, he attempted to get on the upper side of the load by stepping across it. Unfortunately, the team being fractious, the horses started off just as he was in the very act. The logs rolled over and caught him by the feet. Assistance was at hand, and the injured man was brought straight down to the offices of Drs. Bowes and Kenning.

On examination it was found that the leg injured had become so much swollen in the interval that it was impossible to ascertain which of the bones had been broken, as the fracture had occurred at the ankle itself. It is probable that it is the lower part of the tibia. This will mean that Macdonald may make up his mind to a six weeks' stay. He has been taken to the Sisters' hospital.

AN ORE COLLECTION.

Mr. Liljegan's Collection Bought by Governor Mackintosh.

A fine collection of ore belonging to Mr. E. W. Liljegan was lately brought to the notice of the Board of Trade by its secretary, Mr. H. W. C. Jackson. It was offered for sale at the low figure of \$75 as an alternative to its being taken out of the city. Unfortunately the Board of Trade possesses no funds which would have enabled it to purchase the cabinet. Mr. Liljegan went to Spokane and left orders to have his collection forwarded to him this morning. Governor Mackintosh, hearing of the matter, decided that the collection was too valuable to allow it to be permitted to leave the city. He therefore purchased it. The dispirited of the collection, which was packed and ready for shipment at the depot, had been countermanded by wire.

Violets, hyacinths, carnations, jonquils, at the Bon Ton, the leading confectioners.

THE SMALLPOX.

No Fresh Cases—Think That They Have the Epidemic Corralled.

Since the seizure of Mr. Lorne Becher the smallpox has claimed no fresh victims in the town. There are at present only two patients in the hospital. These are Amos Chisholm and the gentleman already named. The former is on the high road to recovery, and the latter is progressing favorably. He may bear a mark or two to ever remind him of his disagreeable and dangerous experience, but there are not likely to be further ulterior results.

No case having thus occurred for 10 days, the health committee are trusting that if no more exhibit themselves within the next week the epidemic may be said to be over as far as this city is concerned. The immunity of the city in the immediate future will be owing, say those who have been combatting the dread scourge, not to the exertions of the city alone but to the energy shown by the neighboring towns. As soon as these were awake to the gravity of the circumstances and began to set to work vigorously enforcing all the necessary remedies and precautions, just so soon, according to general report from the various centres, has the epidemic abated its ravages.

NEGOTIATIONS.

Ralph Smith Arrives in the City—A Friendly Luncheon at Hotel Allan.

On the arrival of Mr. Ralph Smith, ex-member from Nanaimo to the provincial legislature, he was early found to be in touch with the officers of the labor union and with the minister of mines, the Hon. Smith Curtis. The latter invited a select party to a quiet lunch at the Allan. There were present Messrs. C. Foley, W. Devine, McLaren, James Martin, Ralph Smith and Smith Curtis. It is understood that although no definite conclusion was actually arrived at, yet the negotiations for a settlement of the mining difficulty are proceeding on a friendly basis, and it is hoped that they may soon result in a satisfactory conclusion.

Home Made Mats and Rugs.

A Fascinating Work for the Home.

DIAMOND DYES

Always Take the Lead.

Every woman and girl in Canada should have the new illustrated "Diamond Dye Rug Book." This useful little book shows rich colored patterns of Door Mats and Floor Rugs that can be made from rags of any kind. The book will tell you how to set any of the lovely designs. Send for it to any address. Write to Wells & Richardson Co., 200 Mountain Street, Montreal.

The attendance at the evangelistic services in the Methodist church last evening was exceptionally good for Monday night. To night Mr. Lewtas will preach a special service to young women. Everybody is cordially invited to be present.

THE MARKET IS FAIRLY ACTIVE

EASTERN INVESTORS HAVE PLENTY OF CAPITAL.

Money Is Tight But Can Be Found For a Really Good Proposition—The Stock Slump.

Mr. Percy Galt, on business connected with the big suit between the Centre Star and Iron Mask companies, has just arrived in the city from Toronto. He is the brother of Mr. A. C. Galt, a well known lawyer of this city.

A representative of the Miner waited upon him Friday to obtain his views as to the present financial situation in the East, especially as regards Rossland mining stocks. Mr. Galt said that after all the financial situation was one that only indirectly concerned him as a lawyer, and he consequently felt that he could not speak with any degree of authority. It appeared to him that there were several things, each, perhaps, small in itself, but which when taken in conjunction were amply sufficient to explain the reasons of the quietude of the stock market.

There had been through the winter much stringency in the money market. This, of course, was due to the war in South Africa. Then there was the semi-failure of some mining propositions in the Rainy river district. These had nothing to do with Rossland, but there was this similarity that they were both places which traded largely in mining stocks. The people of the East were by no means au fait with the methods of mining and anything that hurt the stocks of one district was likely to affect another. Again the present close down of the mines had undoubtedly a prejudicial tendency. Investors were turning their attention to other more purely industrial schemes. A large company, the Carter-Crume syndicate, had floated a big concern, which is to handle in a large way binding, blank books, ledgers, etc. That had absorbed a certain amount of loose capital. Again a large bicycle company had been started, and there were a good many other schemes, all of which had touched the pockets of the investors.

Investments had to take their turn. At one period mining stocks were all the go. At another new industrial concerns would take their turn. There really was plenty of money East; the past year had been a good one for trade. Let the present war come to a satisfactory ending and let the mines be started up again and the temporarily alienated confidence would quickly return. But the Toronto man and the public generally of the East, however, were not so easily won over. They understood a dividend paying proposition, and they were not unwilling to invest when they thought that returns were not too speculative.

Fractured His Right Arm.

On Sunday Robert Zeillinger, boiler-maker at the B. A. C. shops, fractured his right arm in two places. He was working at the punching machine and put a bar in it to move the punch a little. This he failed to take out, and was holding a piece of iron under the machine for the purpose of punching it. The bar came around with the pulley and struck him on the arm, above the elbow, fracturing the bone in two places. He was taken to the Sisters' hospital. Dr. Bowes was summoned and the fracture was reduced. It will be six weeks or two months before Mr. Zeillinger will again have his free use of his right arm.

A Dangerous Building.

The old War Eagle stables, long in a tumble down condition, and dangerous from their situation on the bank overhanging the Le Roi avenue between Spokane and Earl streets have at length been removed. An enterprising citizen bought up the lumber for a song, and yesterday removed the dilapidated erection, which, through the late winter, has been a menace to the public safety.

Mrs. Pauline Peterson died on Sunday of embolism of the heart. Mrs. Peterson was 29 years of age and leaves a husband and three children to mourn her loss. The funeral takes place at 2:30 p. m. today from the annex to the Central hotel.

Mr. H. G. Pratt, a C. P. R. man from Revelstoke, is in the city.

CERTIFICATE OF IMPROVEMENTS.

Notice. Parker Fraction and Cecil Rhodes mineral claims, situated in the Trail Creek mineral division of Kootenay district.

Where located: On the summit of Sophie mountain.

Take notice that I, J. A. Kirk, acting as agent for Arthur H. Greene, free miner's certificate No. 29034, intend, 60 days from the date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements.

Dated this 10th day of March, 1900.

THE RATHMULLEN CONSOLIDATED MINING AND DEVELOPMENT COMPANY, LIMITED.

Notice is hereby given that a special general meeting of The Rathmullen Consolidated Mining and Development Company, Limited, will be held at the office of the company, 126 Columbia avenue East, on Wednesday, the 25th day of April, 1900, at the hour of 8 o'clock in the evening for the purpose of considering, and if thought fit, passing resolutions authorizing the sale of the whole or some portion of the assets of the company, and entering into an agreement to that end with some person or persons on behalf of a new company about to be incorporated under the Companies Act, 1897.

Dated 17th March, 1900.

By order of the directors.

3-22-4t. L. H. MOFFATT, Secretary.

THE RATHMULLEN CONSOLIDATED MINING AND DEVELOPMENT COMPANY, LIMITED.

Take notice that the annual general meeting of The Rathmullen Consolidated Mining and Development Company, Limited, will be held at the office of the company, 126 Columbia avenue East, Rossland, B. C., on Wednesday, the 25th day of April, 1900, at 3 o'clock in the afternoon, for the election of directors and for the transaction of such other business as may be brought before the meeting.

The transfer books will be closed from the 11th to 25th April, both inclusive.

Dated 17th March, 1900.

3-22-4t. L. H. MOFFATT, Secretary.

THE IRON COLT GOLD MINING COMPANY, Limited Liability, IN LIQUIDATION—Below Referred to as the Old Company.

NOTICE.

All holders of stock in the above company who have not yet made application for allotment of shares in the IRON COLT MINES, LIMITED, ARE HEREBY NOTIFIED that the time allowed for such application has expired, and that the shares in the Iron Colt Mines, Limited, to which such holders would have been entitled on application will be sold by public auction at the office of the company, Bank of Montreal Chambers, Rossland, B. C., on Tuesday, the 17th day of April, A. D., 1900, at 4 o'clock in the afternoon, to the highest bidder, and the proceeds, after paying the cost of sale and call No. 1 of two and one-half (2 1/2) cents per share (if any) will be held in trust for such holders unless before such auction, applications for allotment, together with old company stock certificates and funds, payable at par here, for call No. 1, have been received.

THOMAS ANDERSON, Liquidator.

The Iron Colt Gold Mining Company, Limited—Liability.

All delinquent stock in the Iron Colt Mines, Limited, on which call No. 1 has not been paid on or before the 17th of April, 1900, will also be sold as above.

THOMAS ANDERSON,

Secretary Iron Colt Mines, Limited.
