

AMERICA'S EAGLE LIPTON'S MASCOT

Sir Thomas Lipton holding his mascot, the wooden eagle with coat-of-arms of the United States, that once graced the salon of the yacht America, winner of the America's Cup in 1851. In Sir Thomas' recollection it has never before been photographed. It was aboard the Shamrock IV in the races for the America's Cup.

GO WEST, YOUNG MAN GO WEST

Take Horace Greely's advice, of "Go West, and grow up with the country."

Harvest time is at hand. The Canadian Pacific Railway will inaugurate their first Farm Laborer's Excursion, on August 9, following by a later one on August 16.

The abnormal crop conditions of Western Canada this year call for an army of harvesters. Not only the enticing wages that will be offered have to be considered, but the harvesting of the wheat from the view of a patriotic Canadian must be taken into consideration. It is estimated that between 30,000 and 40,000 farm help is necessary to gather the grain. In order to facilitate the harvesting, the Canadian Pacific Railway, has provided special trains to Winnipeg, and beyond, giving excellent connections to harvest fields and are prepared to handle any number desiring to take advantage of the cheap rates in effect.

The rates to Winnipeg will be, \$15 with 1/2 cent a mile from Winnipeg to destination the same fare applying on the return to Winnipeg and \$20 from Winnipeg to originating point.

In the past, the Canadian Pacific Railway, has provided superior service, and with a view to keeping its record better than ever. No change of cars between east and west on the C.P.R.

The presence of male birds in the flock during the summer months has a decidedly detrimental effect upon the quality of eggs and poultry producers lose many thousands of dollars annually through the presence of partially incubated and bad eggs in the produce they market. Reports are now being received from all parts of the country of the number of partially incubated eggs appearing in current receipts. Producers do not realize that it is unnecessary for a fertile egg to be placed under a broody hen to cause the germ to grow; a temperature of seventy degrees is sufficient to start incubation. If the heat is constant the development of the chick will continue, but if it ceases or is intermittent, putrefaction at once sets in and the egg becomes bad. Such eggs have no place or value in shipments, and should they get to the consumer the consumptive demand immediately falls off.

The male bird is not essential in egg production, his usefulness is over when the supply of fertile eggs for the season has been secured. The hens will lay just as many eggs when the male bird has been removed and the eggs will be more suitable for consumption, packing or storing. Further there is a distinct financial gain to the producer who markets infertile eggs, because the best trade in many cities offers a premium of from one to five cents a dozen for infertile eggs.

Then there is the question of feed. It costs money to feed poultry, and with feed at its present value, the consumption of feed by males kept for no particular purpose is a serious economic waste. The reason for this is that the best prices for live and dressed fowl prevail in the spring and early summer. During the summer the price declines, and by the early fall when many producers decide to market their male birds, a lower price than prevailed in the spring has to be accepted; the producer thus losing the amount per pound the market has declined plus the value of the feed consumed by the birds during the summer months. This financial loss takes on a more serious aspect when it is coupled with the amount charged back by the wholesaler for the bad and partially incubated eggs that have been marketed.

Farmers and others selling eggs for market should, therefore, need no urging to kill off, dispose of, or at least remove the male birds from the flock after the breeding season.

A new edition of a map of Manitoba, Saskatchewan and Alberta giving the number of quarter-sections available for homestead entry in each township with the boundaries and offices of government land agencies has been issued by the Natural Resources Intelligence Branch of the Interior. This new edition clearly indicates all railways, forest reserves parks and Indian reserves, also the land which has been reserved for soldier settlement purpose. The size of the map is 24x36in, and the scale 35 miles to one inch.

The importance of the new edition at the present time is apparent to prospective settlers, officials of

banks, railway companies and land agencies in fact everyone interested in the development of land in the Western provinces. A copy of this publication which is known as the "Small Land Map of Manitoba, Saskatchewan and Alberta," may be obtained free of charge by applying to the Superintendent of the Natural Resources Intelligence Branch of the Department of the Interior, at Ottawa.

Masqueraded as Man for Five Months in Travelling Around Country.

Mrs. Ivy Nasur, 21 years old, of Columbus, O., photographed in the Harlem Prison, N.Y. city to-day, where she is being held charged with masquerading as a man. Mrs. Nasur was arrested at 24th St. and 2nd Ave. by two detectives who noticed something peculiar in her appearance. She was accompanied by her five-year-old son. She told the court she left her husband five months ago, taking her son with her. Having difficulty finding work in travelling as a woman, she adopted male attire. She had less difficulty getting along this way, she added. An entry in the diary found on the young woman told she had travelled more than 700 miles with only 10 cents in her pocket. The diary also told of how she had worked as a bell boy in a Buffalo hotel, as a bus boy in Cleveland, and as a waiter with Barnum & Bailey's circus. She told the magistrate she was tired of travelling about and wanted to go home to her parents in Columbus. It is said the young woman's husband lives in Detroit. A woman probation officer is investigating Mrs. Nasur's story and will try to arrange to send her back to Columbus.
