Inherited Memories. A writer in the Nineteenth Century tells a strange story of "inherited memories." The ruins of an ancient Roman fortress rise from the grounds of a Mr. Phillips. A clergyman called upon the owner one day and asked to see the ruins. "He told me he had a distinct recollection of living there and that he held some office of a pricetive that he held some office of a priestly that he held some of the Roman occu-nature in the days of the Roman occu-pation," said Mr. Phillips. "One fact struck me as significant. He insisted on examining a ruined tower which had bodily overturned. "There used to be a socket in the top of it,' he went on, in which we used to plant a mast, and archers used to be hauled to the top in a basket protected with leather, from which they picked off the leaders among the ancient Gorlestonians. We found the socket he had indicated."

THE SUNDIAL.

It Should Be Marked For the Lati-

In an old shop in lower New York a man keeps up his trade of dial making. The dials, square, octagonal or circular, are hand chased. They do not relar, are hand chased. They do not receive a high polish, and any accidental effect of weather stain or other "tone of time" is carefully preserved if not skillfully added. These dials, fitted with the gnomon, or stylus, are then artfully slipped into the show windows of uptown curiosity shops among a selected debris of Sheffield plate, prism candlesticks, inlaid tea caddies and old blue plates.

A visitor to one of these shops asked: "How old is that brass dial over there? It's all hand work, isn't it?"

"How old is that orass dan over there!
It's all hand work," said the proprietor, whom we will call Truthful James.
"I can testify to that, for I know the man whose hands made it. It's about a month old, if you want to know. You're like lots of other people—you want an old Scotch or English dial.
Don't you know it would be useless, if
you found it, for practical Excuse me, but haven't you ever studied geography and heard of latitude? A dial ought to be marked out scientifically for the exact latitude in which tifically for the exact latitude in which it is to be set up. So unless you strike the same parallel in the states that the dial left in England it will tell lies from morning till night. You'd be surprised how many people pick up a dial that strikes their fancy which perhaps stood in the garden of an old Virginia estate, intending to hurry it off to the big grounds of some place in Minneso-

big grounds of some place in Minnesota; or they'll snatch at some quaint ta; or they'll snatch at some the idea dial from New England, with the idea of rigging it up in Texas.

"More people would make the same blunder, except that many haven't caught on to dials. Too bad. Nothing is prettier than a simple dial at the crossways of garden paths, or by a fountain or on a terrace or at the enfountain or on a terrace or at the entrance of a pergola or mear a rustic seat or arbor. You don't have to hire a head gardener and two assistants to keep a sundial. Marble platforms and keep a sundial. Marble platforms and pedestals are very grand, but unless you're running a big Italian garden with clipped hedges and yews and statues something simple is what you want. The dial will keep just as good time, once it's engraved right, if it's time, once it's engraved right, if it's mounted on a tree stump, with ivy mounted on a tree stump, with ivy planted round it, or on a bowlder, or on the coping of an old disused well, or on a column of cobbles mortared together, or on top of the old hitching post that the family doesn't use in these auto-mobile days, but doesn't want to root

up and throw away.
"You'd be surprised at the ingenuity of some people," said Truthful James, who himself seemed of ingenious bent. "I mean people who haven't much money to spend and are fond of their own old stuff for association's sake. They're the ones who get effects with They're the ones who get effects with a piece of junk, a lump of sentiment and a pocket of small change that can't be bought with a blank check. I've known people who used an old mill-stone to set the dial on, or who laid a slab over an old stone garden urn, or who saved the capitals from pillars on a house being torn down, or who even rigged up a standard from the bricks of a chimney on an old homestead that of a chimney on an old homestead that had meant a lot to them. One family made a sort of cairn out of a geology collection some ancestor had formed. Another took a flag pole for the gnomon and laid out a dial with pebbles in the graps around the pole.

grass around the pole.
"No, it doesn't require any skill to set up the dial. Get the noon mark for the gnomon on several days, nick it on the slab and then set the dial in a bed of cement. There you are."

Mozart's Quick Work. On one occasion Mozart was making merry with his friends at midnight when not a single note was written of the overture to "Don Glovanni," which was to be produced on the following evening. When he had said goodby to his friends he calmiy went to bed and slept until 5 o'clock in the morning. Awaking refreshed, he set to work on the overture, dashing off sheet after sheet with incredible rapidity and dispatching them to the copyists. The opera was to begin at 7 in the evening, and a few minutes after that hour Mozart was in his place as conductor, baton in hand, while the parts with the ink still wet on some of them were being handed to the orchestra.

Of course I like them, but I wish I could be considered as a more girl some time and not a part time for the odor of gasoline to wear off them.

She didn't tell the girl the history of

those gloves.

Five years before, when the rector was having more financial difficulties than it seemed right for one man to have, he had read the marriage service for one of the wealthiest young men in the town. It was a quiet home wedding, and the bridegroom had laughingly presented him with the bride's

gloves as a souvenir. The rector always had been in the habit of giving all wedding fees to his

even the dinner parties and ite cream festivals had failed to be particularly interesting to her—for if there were a curate or a theological student among the guests she was sure to have wife for her own personal use. When he upon his return home gave her the gloves she had tossed them into her trunk, wondering in the depth of her heart what earthly use the him assigned to her. As a schoolgirl she had stolen furtive glances at the bridegroom thought those gloves would college boys who wore their hair long and played football—there was someto her financially distressed husband.

Denver's First Stagecoach On the 17th of May, 1859, Denver turned out to welcome the first through coach of what was destined to grow into the "Overland Mail," an enterprise which for sheer American pluck and daring must be forever linked with the daring must be forever linked with the fame of the "Pony Express." Red shirts drifted to the outskirts of the hamlet and dotted the hills around. Hard faced bartenders made ready for the "hottest night that ever tore the camp loose". The artillery of holster camp loose." The artillery of holster and saddle boot was unlimbered for an ecstatic fusillade. There was lively-betting in dust and nuggets that the first through stage had been gathered in by Indians, with takers as eager to stake their faith that the scalps of driver and guard would come through intact. At length a swirl of dust showed far down the trail. It grew into a yellow cloud that crept toward the eager hamlet. Then six mules, stretched out on the gallop, emerged from this curtain, and behind them was the lumbering, swaying stage, come safely through on time, and Denver was in touch with the world where men wore white shirts and lived in real houses. cheers that roared a welcome to this heroic enterprise were echoed in every western town which hoped and longed for a link of its own with the ome country, "way back east."-Outing Magazine.
