Orser, of Boston, Mass., is interesting to all women.

"DEAR MRS. PINKHAM: - I suffered misery for several years. My back ached and I had bearing-down pains, and frequent headaches. I would often wake from a restful sleep in such pain and misery that it would be hours before I could close my eyes again. I dreaded the long nights and weary days. I could do no work. I consulted different physicians hours to get relief. could do no work. I consulted different physicians hoping to get relief, but, finding that, their medicines did not cure me, I tried Lydia E. Pinkham's Vegetable Compound, as it was highly recommended to me. I am glad that I did so, for I soon found that it was the medicine for my case. Very soon I was rid of every ache and pain and restored to perfect health. I feel splendid, have a fine appetite, and have gained in weight a lot." and have gained in weight a lot."—

of above letter proving genuineness cannot be pro-

Surely you cannot wish to remain weak, sick and discouraged, and exhausted with each day's work. Some derangement of the feminine organs is responsible for this exhaustion, following any kind of work or effort. Lydia E. Pinkham's Vegetable Compound will help you just as it has thousands of other women.

B. Picton sends this very interest-

Franklin, I see the same error occurs in the date upon which this fight took place that is in nearly all the late historical sketches of this Headstones and Monuments and all kinds of cemetery work. Any person desiring these will confer a favor by falls into the same error. They give the date upon which it took place as in 1837, whereas it was in 1838. The first fight was on Tuesday, November 13, 1838, and the second on Friday, the 16th. I was a lad of twelve years of age, living at Preswitness to the fight on the November. I also saw the first shot fired by the little steamer Experiment at the large passenger steam-boat called the United States, on the latter's return from landing sympathizers from Ogdensburg at Windmill Point. The Canadian force on Tuesday, the 13th November, 1838, consisted of one company of the 83rd regiment, regulars, under Lieutenant Johnson, who was killed; one company Royal Marines, under Lieuten ant Harper, who was wounded in his left arm; the Prescott company of volunteers, under Capt. Dr. H. D. Jessup; a company of Glengarry volunteers, under Capt. George McDon ald, and the yeoman militia from the neighboring counties, as well as those from Grenville County. Col. Fraser was, I believe, in command of the militia; Col. Plomer Young, regular army, was Commandant, stationed at Prescott at the time. The with the steamboats Cobourg, Traveler and Experiment, with a Durham boat as a gunboat. The attack failed to disledge the rebels. A guard was kept up on the river, as well as on land, to prevent their escape till reinforcements should arrive from Kingston, with heavier artillery. The whole of the 83rd regiment, under Col. Dundas, arrived on Friday, the 16th, when a second attack was made. All the surrounding buildings refuge of the rebels, the windmill, was the object of attack, the result being the final surrender of Von-shoutz and his men.—Terente Globe.

Could Not Sleep At Ri

was troubled with palpitation of the heart and loss of appetite. I was so nervous I could not sleep at night. I took MILBURN'S HEART AND NERVE PILLS. They cured me, and I have not been bothered since. Price 50c. per box, or \$ for \$1.25; all

ably lost. In this respect we believe in the conservation of material just as we have long been taught to believe in the law of conservation of energy. From a purely practical point of view, however, some things certainly may be so completely lost to further use that their loss may well be considered absolute, and one of these is the metal lost in the wear of railway rolling stock brasses. For the speculator in copper values, the promoter of a copper "corner," to use the broker's cant, the copper which has gone into railway brasses need have no terror. It is not likely ever to be available again in full measure. It is dissipated so completely, in part at least, that its practical recovery is not likely to receive much serious consideration. From the best available deductions on the subject it appears that 5 per cent of the annual copper production of the world disappears in this way every year. Flat Wheels. "Flat wheel," growled the old retired conductor as the trolley car in which he sat went thumping along at twelve miles an hour, shaking the passengers

don't flatten. Now, these fellows on

The Khyengs' First Woman. The Khyengs of Burma are probably the only race or tribe of people that have any tradition of the origin of the human race that do not have a man or male human being in some way connected with that important event. The Khyeng genesis opens in this wise: "In the beginning of the world, after the sun, moon and stars had appeared, the earth by its own inherent power of productiveness brought forth a female creature, which was called Hleeneu. She laid 100 eggs and hatched them in cotton wool, and from them sprang 100 human beings, the progenitors of the different races." The least that can be said of this curious belief is that it is a fine illustration of the multiple theory

Tools of the Ancients An investigator who lived during two years in a tomb at Gizeh collected evidence to prove that the tools used in working stone 4,000 years ago had jeweled cutting edges like modern tools. He says that the builders of the pyramids used solid and tubular tools, straight and circular saws and many other tools supposed to be modern. In some specimens of granite a drill had sunk one-tenth of an inch at each revolution, indicating that the pressure was at least two tons. Nothing is known of the material of the tools. As the diamond was scarce then, it is probable that corundum was used.

The costliest meal ever served, according to history, was a supper given by Ælius Verus, one of the most lavish a dozen guests. The cost was 6,000 sectoriia, which would amount to \$242,500. A celebrated feast given by Vitellius, a Roman emperor of those days, to his brother Lucius cast a little more than \$200,000. Suctonius says that the ban-quet consisted of 2,000 different dishes of fish and 7,000 different fowls besides

No matter of what color, heware of the eyes that have no degire to leak you full in the face.
