Hamilton seems to be shaping up and one of the track habitues indited retty well with its hockey team this rhyme to Starter Dwyer in particular:
There is a place where starters go;
The not above, nor yet below;
But 'tis a section set apart
For men who make that kind of start.
It is a place, where, on their knees,
You'll find a bunch of referees.
Some baseball umpires here do dwell;

In the evening the Ramblers' team crossed bats with the Sarnia boys and made a very poor showing. Mc-Cart's pitching puzzled the binycle riders, who were unable to bat, while the visitors pounded both Crawford and Adams. Both teams fielded fairly well. The Sarnia nine played in the same positions as in the afternoon, and the same umpires officiated. The score was:

Yachtsmen Beat Sarnia.

The crack indoor baseball team of Sarnia played two games here yesterday with local teams in the Palace Rink. In the afternoon the team's opponents were the Victoria Yacht Club nine and the game was fast and exciting, although there was a good deal of wranging over rules. The visitors insisted on playing under the revised rules, according to which a foul tip off a bat when caught is out, and that on three strikes the batter is not out unless the ball is caught or thrown to first before he arrives there. This naturally put the home team to a disadvantage, as many of the bat-

THE RING.

Bernstein Got Decision.

St. Louis, Jan. 2.—Joe Bernstein, of New York, was awarded the decision over Tommy White, of Chicago, by Referee Stewart yesterday at the end of the firteenth round of fighting, before the West-end Club. The decision, in the opinion of many at the ringside, was an injustice to the Chicago boxer. White landed repeatedly with left jabs throughout the fight. In the early rounds Bernstein attempted to rush, but left counters, beautifully timed, stopped him. In every round White landed with his left on Bernstein's face. Bernstein would rush and rough matters, doing, however, little or no damage to White. The men fought at 126 pounds,

Waterbury, Conn., Jan. 2.—Before 2,000 people, at the boxing exhibition of the National Athletic Club at Jacques Auditorium yesterday afternson, Young Peter Jackson, 'of Baltimore and California, defeated Jimmy Handler, the Newark welterweight, in three rounds Handler acted like a novice in the first round. In the second he improved a trifle, but was clearly outclassed. In the third round Jackson sent the Newark man to the platform with a crash. He struggled to his feet, but Jackson smashed him all over the ring. A left inside hook to the jaw sent Handler to the ropes, which saved him from going down again. He was groping helplessly around the ring when Referee Charley White stopped the fight.

"There is no truth in the report," said Mr. Johnson. "Cleveland is a strong, husky city, the largest in Ohlo, and supports baseball good enough for our league. Last season Cleveland had a losing team, yet the club made money. Under the circumstances, all things being considered, the club did better proportionately than almost any other club in the league. We would not consider taking in Omaha, or its club for a moment."

Johnson disclaimed any knowledge.

## THE SECRET OF LIFE.

is it Now Within the Power of

Mankind?

Chicago, Jan. 1.—Prof. Jacques
Loeb, at the fourteenth annual meeting of the American Physiological Soclety at the University of Chicago,
in a paper entitled "On the Prolongation of Life of Unfertilized Eggs
of the Sea Urchin by Potassium Cyanide," told a group of the foremost
physiologists in America that by
means of observation of the effects of
certain chemicals upon eggs of the
lower marine animals he was ready
to make a tentative definition of the
ineretofore unknown nature of death.
Death, he affirmed, was not a negative process, a simple breaking down
of the tissues, as it has been regarded up to this time, but an active
agent born with the birth of the egg
axid destined, if not checked, to gain
the upper hand of the life instinct and
bring about extinction. But greater
even than the apparent discovery of
this death agent in all substances
is Processes announcement that he
has been able to check it, in the
eggs of the sea urchin at least, by
means of chemical agents. This, it
is claimed, means nothing less than
that on a minute scale the secret of
etermal life is in the power of mankind.

The experiments, the professor

eternal life is in the power of mankind.

The experiments, the professor
says, were simple. Unfertilized eggs
of the sea urchin were placed in a
weak-solution of potassium cyanide
and abandoned for several days. In
ordinary conditions an unfertilized
egg dies in a few hours, destroyed
by the death agents born with it.
At the end of several days the eggs
were again examined and were
found to be still capable of fertilization and of producing healthy animais in explaining the results. Prof.
Loeb said that the "mortiferous processes" were due to the actions of
certain ferments of an unknown nature, whose destructive tendency
was counteracted by the potassium
saits.

The police ordered both of them to move on. She took him into Thirty-first street and pushed him up against a wall. For a moment she argued with the man that it is unwise to rob a woman who has accurred muscle as well as science, and she proceeded to show him what the combination meant. He could not see. She had closed both his eyes, and he ran blindly down the street.

New York, Jan. 1.—Reports to R. G. Dun & Co. show that failures for the year 1901 were 11,002 in number, and \$113,092,376 in amount of liabilities, while, of banking and other fiduciary institutions, there were 74 insolvencies, involving \$18,018,774, a total of 11,076 defaults, and \$131,-111,150 liabilities.

In many ways, the prosperous conditions in the United States were shared across the border, for commercial failures in the Dominion of Canada were fewer in number and smaller in amount of liabilities than in five of the preceding seven years. As to banking insolvencies, the statement was even more favorable, no one of the earlier years making as good an exhibit. All commercial defaults numbered 1,341, with liabilities of \$10,111,671, which compares good an exhibit. All commercial defaults numbered 1,341, which compares with 1,355 in 1900, owing \$11,613,-208. In manufacturing there were 289 failures, for \$3,595,095, against 308 in the previous year, with liabilities of \$3,201,605. Trading failures numbered 1,029, with a total indebtedness of \$6,845,329, compared with 1,010 in the previous year, for \$7,252,840.
