

WESTERN ONTARIO.

BRANT.

Whitlaw, Baird & Co., of Paris, received on Tuesday 300 bushels of new hardfield wheat, weighing about 58 pounds to the bushel. This is the first wheat offered for the season, and was grown on their place across the River Nith, near Paris.

The little boy Cheevers, of Brantford, who stole the \$4 from Thomas Potts, got five years in Penitentiary Reformatory, Phillips and Quinn, who got a share of the stolen goods, were fined \$5. The case against Gould was dismissed, and that against Milne deferred meantime.

ELGIN.

Chong Kee, the Chinaman charged with attempt at murder in Chelip, kept a laundry at St. Thomas for two years ago.

The Traveling Dairy will hold meetings as follows: Fingal, Aug. 1; Lawrence Station, Aug. 2; Iona, Aug. 3; Dutton, Aug. 4; West Lorne, Aug. 5; school house, three miles south of Rosary, Aug. 8.

ESSEX.

Balliff English the other evening took to the Central Prison from Windsor John Jones, four months for vagrancy; Wm. Mack, 23 months for horse stealing; John Riley, four months for stealing clothes, and James Terry, six months for stealing money.

At the recent session of the county council of Essex a resolution was passed in favor of memorializing the Local Legislature to change the statute as to make it compulsory for attending physician to placard any house in a township or municipality wherein any contagious disease exists. As the law reads at present, all that the medical man has to do is to notify the health officer or board of health of the existence of such contagious disease, when it becomes the duty of that official or body to see that the proper placarding is done.

KENT.

A. S. Hardy, of Clinton, is trying to start a piano factory at Kingston.

An effort has been made to have the Wingham postoffice removed from its present location, but contrary to this is a petition praying that it remain where it is now. The Government has the matter under consideration.

There is some talk of the formation of a league band in Clinton in connection with Company "D," Thirty-third Battalion.

Mrs. James Budge, of Beavre, has died at the advanced age of 93 years. She had been very feeble and helpless for some time. She leaves four sons and four daughters. Her husband died fifteen years ago.

KENT.

Garrison Shadd, one of the prominent farmers of Kuleigh for many years past, has passed away very unexpectedly. Deceased was a son of the late A. D. Shadd, one of the pioneers of the Buxton settlement, and a brother of I. D. Shadd, Mrs. Carey and other members of a family who have made names for themselves in this country as well as in the United States.

Mrs. Shadd was born at West Chester, Pennsylvania, in 1837, and was consequently in his 65th year. He was a leading man in his neighborhood, and held the position of school trustee for many years, but no other public office.

LAMBTON.

H. A. Fenby, Sutherland's Corners, is making a big haul in the cattle trade, having within the past few days shipped several carloads.

Early Tuesday morning, just after the marine reporter from Port Huron had met a tug opposite the waterworks at Sarnia, he heard a splash and a cry for help. He rowed around for some time but could find no trace of what he supposed to be a drowning man, but at 6 o'clock he came over to Sarnia and caused a search to be made, with the result that a sailor named Peter Coggriff was found drowned in the slip at Clark's dock. It appears that Coggriff and a number of companions had been drinking the night previous along the dock, and he remained after they had left. It is thought that the unfortunate man laid down, and slipped into the water while sleeping.

MIDDLESEX.

Gilmour Bros. shipped four carloads (72) extra tires the other evening from Dorchester Station, destined for the Glasgow market. David Gilmour and Andrew, son of James Gilmour, go with them.

The next meeting of the township council of East Williams will take place on Aug. 29.

On Thursday W. Dwyer's till was robbed while Mr. Soole was at dinner and Mr. Dwyer was at London. Mr. Dwyer was in the rear part of the store at the time the robbery was supposed to have taken place and was behind a pile of goods. Seven dollars was secured, and up to the present time the culprit has not been discovered.—[Belmont Times.]

OXFORD.

A Richwood correspondent writes: "Thomas Wilson, the famous concession, was working in the harvest field with a binder, when his 2-year-old child came out. He thought it went back to the house, but it wandered into the grain and lay down to sleep. He drove over it, cutting the thumb off one hand and cutting the wrist of the other."

Several barns have recently been destroyed by lightning in Oxford county. The barn and stables of Henry Abell, 11th line, East Zorra, were struck by lightning the other morning and consumed, together with quantity of hay, a binder and other implements. Insured in the East Zorra and South Easthope Farmers' Mutual for \$500 on building and contents.

Four cows and one steer belonging to John Leadman, 9th con. East Nissouri, were killed by lightning a few days ago.

PERTH.

Mrs. Abraham Davidson, of Carletonplace, died Sunday, aged 86 years. Among her children is County Clerk and Ald. Davidson, of Stratford.

Mrs. Wicke, of Stratford, was horrified one day last week to find her child lying on the sidewalk with a leg and arm broken. How the accident occurred it was impossible to learn, as the child was too young to tell.

Patrick Morrison, an employee of the G. T. R. shops, Stratford, has just passed through an experience which may cost him his life. He was carrying a plank, when a heavy iron screw belonging to a crane fell from a beam, a distance of about 25 feet, striking the board. The plank was driven forcibly against the side of Morrison's head, striking a terrible blow. The screw came dangerously near striking the man's head instead of the plank, and had it done so he would have been instantly killed.

E. K. Evans, late of the Clifford Advance, will in a few weeks start up a new paper in St. Marys.

A young man named Frank Vanstone met with a painful accident at St. Marys pop works, Stratford, on Tuesday afternoon. A soda water bottle which was filling burst, and a piece of glass was driven with great force against his forehead, inflicting a painful man directly over the eye.

Badulo Timmer, William Tobin, a train band in the employ of the New York Central at Black Rock, is serving a strange sentence of two years exile to the United

States, imposed on him by Police Magistrate O'Leane, of Stratford, for assaulting a fellow workman named Henry Deering in the yards of the Grand Trunk Railroad, where both were employed. At the hearing J. E. Harding, who appeared for the two men, said his client would accept the two years exile, and the magistrate warned him (Tobin) that he could not return within two years, except temporarily at the special request of his parents or his brother and with the knowledge and permission of the police. The facts in the case were brought to the attention of Inspector DeBarry, who examined the "exile" this forenoon, and found that he was entitled to stay here, having since his exile in June, 1891, acquired a domicile here in accordance with the laws of the United States.

COMPLAINTS AND PETITIONS

Dealt with by the Board of Works—Artificial Stone Walk for Carling Street.

Ald. Connor (chairman), O'Meara, Jones, Bartlett and Shaw, City Engineer, and Secretary Bell attended a meeting of the Board of Works last evening.

Petitions were granted as follows: Against block-paving Princess avenue from Victoria Park to William street, to have the name of Maple street changed to Grand avenue, Macbeth street to "The Ridgway," to have the street sweeping contractor dump no more sweepings on the boulevard on King street between Waterloo and Colborne.

The claim of Thos. E. White for \$15 for damage claimed to have been done to furniture on account of defective roadway was referred to Ald. Connor and the engineer with power.

The petition of R. J. Blackwell and others for a sidewalk on the south side of Stanley street was left with the engineer, the chairman and member for the ward.

The engineer's report on the condition of the block pavement on Dundas street between Wellington and Bidout was laid over.

Walter Richards complained of the condition of the sidewalk in front of the Foresters' hall, East London. Referred to the engineer, Ald. Jones and member for the ward.

The work of constructing an artificial stone walk on the north side of Carling street from Richmond to Talbot will be proceeded with at once.

Contractor Baldwin's account for street crossings was presented. It included curbing and this was not in accordance with the specifications. He will receive no pay for them. Ald. O'Meara and Bartlett objected.

For the erection of an abutment at the foot of Richmond street S. H. Elliot, St. Marys, tendered at \$5,749, and S. H. Craig, city, \$5,995.00. For a bridge on the Wharfedale road at the city limits Elliot tendered for \$2,149 and Craig for \$2,384.95. As neither furnished the necessary security the tenders were referred to the committee.

The pay sheet, amounting to \$636.27, was passed and the committee adjourned.

Seeing Europe for \$999. (New York Press.)

More people are going to Europe this season than ever before; but this season, as every season, there are multitudes of people who sigh because they cannot afford the expense of a transatlantic voyage. And among those whose "noble rage" for foreign travel is repressed by that "chill penny" of which Gray wrote in his "Elegy in a Country Churchyard" are countless numbers who are most fitted by intellectual tastes to appreciate what is at stake.

For them the Press has a few words of counsel, based not on theory, but on record and not infrequent experience.

Take passage either "first class on a vessel of one of the less expensive lines, or second class on a ship whose port of ultimate destination is in Germany, Holland, France or Belgium. In one case you spend a little longer time in crossing the ocean, which is no disadvantage at all to a brain weary person who loves salt water. In the other case you will find yourself in company with some of the very best society that any cultivated voyager can hope to have, for it is a universal rule on "the continent" that, whether traveling by sea or land, artists, musicians, scientists, university professors, authors, clergymen, merchants, bankers, in short all but aristocrats and a few of their snobbish imitators belonging to the class of "new rich"—make a point of usually traveling "second class."

When on land apply these latter remarks to railway journeys, with the amendment that only first class cars on the continent and in Great Britain and Ireland also are comfortable, respectable, and afford admirable opportunities for the study of human nature.

The most instructive, romantic, delightful place for temporary residence abroad is the old fashioned inn, where entertainment costs about one-third as much as at the great, new and garish hotels.

Walk. Take in your traveling bag Lou's Jennings' "Field Paths and Green Lanes," or Bayard Taylor's "Views of Europe." Health, happiness, intellectual joy and economy are all to be promoted by walking on ground where art and nature, literature and history make every square mile an enchanted garden.

A man who is in earnest, who has plenty of brains, but only a limited supply of money, can spend two months in a visit to Europe and return by the plan here suggested at a total cost not exceeding \$200.

Children Enjoy the pleasant flavor, gentle action and soothing effects of Syrup of Figs, when in need of a laxative; and if the father or mother be constipated or bilious, the most gratifying results follow its use, so that it is the best family remedy known, and every family should have a bottle.

The University of Virginia has recently decided to admit women.

We have no hesitation in saying that Dr. J. D. Kellogg's Dysentery Cordial is without doubt the best medicine ever introduced for dysentery, diarrhea, cholera and all summer complaints, sea sickness, etc. It promptly gives relief and never fails to effect a positive cure. Mothers should never be without a bottle when their children are teething.

He—Goodness! Eleven o'clock! How time flies when we're together, dear. She—Don't, I thought I know of nothing like it, except when in injurious contamination with the popular antidote to pain, throat and lung remedy and general correctives, Dr. Thomas' Electric Oil. It may be used without the slightest apprehension of any other than salutary consequences. Coughs, rheumatism, earache, hoarseness, cuts and sores succumb to its action.

It's only when a baby is very homesick that its mother can see a resemblance between it and her husband's folks.

In a Day. Mrs. J. Ringland, Kincaid street, Brockville, Ont., says: "I was confined to my bed by a severe attack of lumbago. A lady friend of mine sent me a part of a bottle of St. Jacobs Oil, which I applied. The effect was simply magical. In a day I was able to go about my household duties. I have used with splendid success for neuralgia toothache. I would not be without a bottle."

Mrs. J. Ringland, Kincaid street, Brockville, Ont., says: "I was confined to my bed by a severe attack of lumbago. A lady friend of mine sent me a part of a bottle of St. Jacobs Oil, which I applied. The effect was simply magical. In a day I was able to go about my household duties. I have used with splendid success for neuralgia toothache. I would not be without a bottle."

He Was a "Widdy" Man.

They were neighbors, both having lately purchased adjoining homes, and the fun for the lawyers commenced when the widow complained that her neighbor had built a wooden barn inside the fire limits.

The new man didn't say much. He was a grumpy old fellow and took down his barn when the city authorities commanded him to, and gave an immediate order for enough bricks to build a new one. Then, when he had surveyed the premises, he sent for a force of workmen.

"Ha, ha," he chuckled, "I own the land right up to the next house. I'll run up my new barn and shut off all the light on that side. Ha! ha!"

The widow changed her tactics from railing to tears. She wept over her garden gas as he passed it.

"Och! air, have you a heart in your bosom, and can you be so cruel as to make the only room I have to let unavailable, and I a poor lone widow?"

"Air you a widdy woman, ma'am?"

"Yes. You may know what it is yourself some day to be left alone in this cold world."

"I do, ma'am. I'm a widdy man, but that has nothing to do with the case," and he became gruff again.

"Oh! I see. You released one eye from her apron and let it beam softly upon him."

"Then you have felt the sanctifying effects of sorrow—you know w-w-what it is to bear a lonely heart—you can feel for one who has lost her natural protector?"

"Well, ma'am, I—ahem—what do you want me to do?"

A smile broke over the tear-stained face of the widow, which now emerged from the apron like the sun from a cloud.

"Come over this evening," she said slyly, "and we will see if we can't compromise on that barn."

Exactly then "compromised," for the bricks have been sent back and the habitation of his horse for the present at a livery, and the lawyers are out of a job.

Book's Cotton Root COMPOUND.

A recent discovery by a noted physician. Successfully used monthly by thousands of ladies. Is the only perfectly safe and reliable medicine for the treatment of all diseases of the female system. It is a pure vegetable compound, and is perfectly safe in all cases. It is a pure vegetable compound, and is perfectly safe in all cases. It is a pure vegetable compound, and is perfectly safe in all cases.

For the treatment of all diseases of the female system. It is a pure vegetable compound, and is perfectly safe in all cases. It is a pure vegetable compound, and is perfectly safe in all cases. It is a pure vegetable compound, and is perfectly safe in all cases.

"German Syrup"

The majority of well-read physicians now believe that Consumption is a germ disease. In other words, instead of being in the constitution itself it is caused by innumerable small creatures living in the lungs having no business there and eating them away as caterpillars do the leaves of trees.

The phlegm that is coughed up is those parts of the lungs which have been gnawed off and destroyed. These little bacilli, as the germs are called, are too small to be seen with the naked eye, but they are very much alive just the same, and enter the body in our food, in the air we breathe, and through the pores of the skin. Thence they get into the blood and finally arrive at the lungs where they fasten and increase with frightful rapidity. Then German Syrup comes in, loosens them, kills them, expels them, and so nourish and soothe that, in a short time consumptives become germ-proof and well.

A Germ Disease.
