## THE COMING ANGLO-GERMAN CONFLICT

Tells All About It.

Fatherland Will Fall and Combat-

ants Call a Draw.

Berlin, Feb. 12.-Another book describing an imaginary war between man colonies, which represent Great Great Britain and Germany will be Britain's sole tangible gain, are republished here within a few days, says turned to Germany. Both countries the Berlin correspondent of the London Standard. Its author is America has succeeded in securing the "Oh, ys," comes the faint voice, "and a high naval officer, who con- greater part of the export trade forceals his identity under the pseu- merly possessed by England and Gerdonym "Beowulf." He traces the beginning of the Anglo-German war in a man navy is already so strong that in

> During the campaign between the British troops and the rebel blacks, Bechuana and Matabele chieftains take flight across the frontier into German Southwest Africa, whereupon the British Government demands that the Germans shall extradite them for punishment. The British Government claims that the chieftains shall be regarded as criminals guilty of high treason. Germany persists in regarding them as combatants and refuses extradition. Britain regards this action as a casus belli and begins operations without a formal declaration of war, which follows two days after the British fleet has initiated the campaign.

Meanwhile this fleet attempts two bold strokes against Germany. squadron of cruisers makes a dash for Heligoland, lands bluejackets and marines under cover of darkness, and attempts to take possession of the island. This plan is frustrated by the vigilance of the garrison, which repulses the British invaders with heavy loss. During the same night a British merchant steamship, loaded with cement, and manned by officers and seamen of the navy, steams toward the western mouth of the Kaiser Wilhelm Canal, which connects the North Sea with the Baltic. The British plan is to sink a steamship at the mouth of the canal, thereby blocking the passage.

This move likewise fails, owing to the vigilance of the garrisons of the forts erected to defend the canal. The failure of these two preliminary strokes prove disastrous to Great Britain. Heligoland proves to be a most valuable basis for the German fleet, and the Kaiser Wilhelm Canal is extremely useful for the speedy passage of the German warships from the North Sea to the Baltic, and vice versa, according to the necessities of naval warfare.

After a formal declaration of war, Great Britain begins a blockade of th German North Sea coast with a fleet consisting of twenty battleships and a corresponding number of cruisers, and smaller craft. The Germans carefully avoid open engagements with the blockading fleet and confine themselves to harrying the British fleet with torpedo boats. In this work submarines play an important part. After suffering the loss of numerous torpedo boats the Germans succeed one night in sinking Doian Out With Warm Criti- Confesses to Mutilating Fourone British battleship, and damaging three others so severely that they are compelled to return home for repairs.

The British admiral thereupon withdraws his battleships to a considerable distance from the coast, and continues to blockade with his cruisers, which are, however, unable to perform the Patrick Dolan, of the local district ber" proved to be John Brady, 22 years Professor Thompson also said that the service required of them. The Germans now begin to harry the blockaders with more success. Their torpedo boats They dance in England as in Italy. This dash further out to sea and inflict more losses on the British fleet. suffer great distress. The disturbance of international trade affects England similarly, so that a grave financial and industrial crisis produces a disastrous

effect on Britain's prosperity. Great Britain seizes all the German colonies except Kiauchou, but she derives few advantages from them, since pers softly. "Is there anything I can One of Kaiser's Officers mercial development of these new marthe conditions of war prevent the comkets. The United States seizes the favorable opportunity in securing a lion's share of the trade of the captured German colonies. Britain continues the war with splendid determination, but without decisive results. A number of German cruisers are captured or destroyed, but the effects of the war Grim King can assume a different she replies fervently, but with a rush Attempts to Crush the Fleets of the continue to exercise a disastrous influence on British commerce.

Finally, after Britain gains a slight naval success, the two countries agree to terminate a useless war, and conclude peace on the terms of the restoration of the status quo ante. The Gersuffer immense losses without any many.

The author thus claims that the Gerwould be far superior, and the British fleet would be unable to gain a decisive victory. His account of this imaginary war is interspersed with elaborate arguments and strong appeals for a more rapid increase of the German fleet, which shall render an Anglo-German war still more hopeless for Britain.

#### AGING OLD WINE

Electricity Makes It Equal to the Rarest Old Vintages.

London, Feb. 11.-If the latest invention from Germany is all that is claimed for it, port wine equal in quality to the famous vintages of the sixties should soon be one of the cheapest heverages obtainable.

It is yet another instance of the magic uses to which electricity can be put. By an electrical appliance which a German inventor has just perfected. the newest wine, it is said, can be aged so skillfully that the palate of the connoisseur is unable to distinguish, say, the vintage of '95 from the choicest

port of the past half-century. The process, which hitherto age alone has wrought, is artificially accela few weeks from the date of gathering its policy in regard to the section of the grapes.
