## Do You Eat Bread?

If so, do you not think that you might as well eat THE BEST? The best bread is that which contains the MOST nutriment and the LEAST waste matter and is absolutely pure. You cannot have good bread, however, unless you have good flour.

## "Five Roses" Flour

Contains more gluten and nutriment, in more easily digestible form, than any ordinary brands, whilst it contains practically no cellulose or waste matter. In addition it is more economical, as pound for pound it will make more bread and better bread than the flours so-called "just as good."

Its purity is insured by the care with which it is made, and users of it can rely upon getting the best flour for bread which the world offers.
