A Friend of the Family

Over fifty years ago a young physician practiced widely in Pennsylvania and became famous for his uniform success in the curing of disease. This was Dr. R. V. Pierce, who afterwards established himself in Buffalo, N. Y., and placed one of his prescriptions, which he called "Golden Medical Discovery," in the drug stores in the United States and Canada, so that the public could easily obtain this remarkable tonic, corrective, and blood-maker. Dr. Pierce manufactured this "Discovery" from roots and barks without alcohol—a corrective remedy, the ingredients of which nature had put in the fields and forests, for keeping us healthy. Introduce pure red blood into the system, and health is assured. When you feel run-down, out of sorts, blue and despondent try the energizing influence of this reliable tonic. You can obtain Golden Medical Discovery in tablet or liquid form at all drug stores, or send 10c for a trial package to Dr. Pierce's Laboratory in Buffalo, N. Y.

THE ANNUAL CLEAN-UP

(Experimental Farms Note)
As soon as the breeding season is over the fowl that are not intended to be retained for future breeders should be disposed of. The birds should be either put into a yard or confined to part of the yard, the rest being limed, ploughed or spaded, and seeded to green crop such as rape or rye.

All litter should be removed from the house and the ceiling, walls, and floors thoroughly swept. Movable fixtures should be taken out and the whole interior given a thorough washing. The best way to do this is to use the hose if you have one, after the hose give the building a good flooding and scrub it down with a stiff brush. If there is no hose, be even more careful about the scrubbing. After the house has been thoroughly cleaned give it a soaking with a good strong disinfectant. One of the best tar preparations will be found satisfactory for this purpose, this should be applied with a spray pump so that it will be forced into all the cracks and crevices of the building. If there is no spray pump, use a brush, but be sure to get it into these cracks and crevices.

The house should be left standing for a couple of days to dry out, leaving it wide open to allow the sun and air to enter freely. It should then be given a good application of whitewash. The fixtures, nest boxes, roosts and dropping boards which have been removed should be treated in a similar manner.

At the time of this annual house cleaning, it is a good plan to note what repairs to the houses, fixtures and fences are needed and have them made as soon as possible. Also clean up and burn any accumulation of rubbish leaving nothing under which vermin may hide. A clean house free from lice and mites is easy to keep clean. Then see that the pullets are healthy and free from lice, when they are put in, and the problem of winter eggs is more than half solved.

GEO. ROBERTSON,
Poultry Husbandman.

PUNCTUALITY

The importance of punctuality can hardly be over-rated, especially with all the hurry and scheduled exactness of modern life. In the broad and forgetful tranquillity of a medieval village, where time flowed unregarded, and it really made no difference whether you did a thing this week or next, a precise observance of the clock probably did not exist. But when your neighbors all eat and breathe by the time-table, you too, must do it or suffer. Yet it is astonishing how punctuality is neglected. The world is divided into punctual and unpunctual people, and the latter live on the former. The habit of perpetual looking at clocks and watches is instinctive in some minds. Others never see a dial, even when it is staring them in the face. It is probable that punctuality can be taught, although after desperate and repeated efforts some of us are tempted to believe the task impossible. You must catch the delinquent young and impress him, or her, by constant and repeated admonition and injunction, and even then the result is not always satisfactory. The worst thing about unpunctuality is its utter selfishness. Procrastination is the thief of time, but the procrastinator generally steals other peoples time and saves his own. Washington had occasion to reprimand an officer for being late at a council of war. "But, general, I lost only five minutes," urged the culprit. "There are twelve of us here," answered Washington. "We have each lost five minutes. You have wasted an hour." Perhaps the most trying offenders are those who can be and are nicely prompt in large matters that concern themselves and their own interests but who are transparently indifferent when all that is at stake is the small occasions of others. There are many such people. Are you one of them? In large and small matters the most useful and the greatest men practice an essentially precise exactitude.

Sores Flee Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

What's a Guarantee?

Our idea of a guarantee is that the manufacturer who gives one—which hasn't any tags and loopholes—believes in his product.

So much so that he stands ready to make good any loss suffered by the purchaser through defective material or workmanship.

It's mainly because of the guarantee that goes with them that we are selling and recommending Ames Holden "Auto-Shoes."

Of course, we know they give the cheapest mileage too—that they are dependable tires for any make of car, anywhere. But it's the guarantee that we talk about most. It's the straight and clean-cut, without time or mileage limits. It shifts our responsibility on to the manufacturer and he lives up to every letter of it. Come in and let us tell you about the guarantee that goes with
