BROOKES' FUNNEL MEASURE.

The engravings show an ingenious apparatus for measuring liquids, lately patented by Mr. THOMAS BROOKES.

Fig. 1, on right, is a gallon measure with three legs, two being portable, the third forming the spout; a piece of glass with figures on either side shows the quantity of liquid contained, while the small handle at the top, by being pressed, opens a valve at the bottom which allows it to pass through.

Fig. 2, on left, is the same kind of apparatus, the valve being opened by pulling the handle. By this contrivance the merchant may possess a Measure and Funnel combined which will save him considerable expense and no end of trouble and annoyance.

The articles may be obtained from Mr. THOMAS BROOKES, 27 King street, Toronto, and from his authorized Agents. Toronto, May 30, 1863.
