

**To these ends, we call on Ministers:**

- (xiii) To improve the availability of information to support participation in infrastructure investment by the widest possible range of companies, including by small and medium-sized enterprises, both on a solicited and unsolicited basis.
- (xiv) To foster effective consultations to ensure that planned infrastructure meets our communities needs.

We direct the relevant Ministers to take the necessary measures to make good these declarations of intent with the express purpose of substantially and measurably increasing the participation of the private sector in infrastructure development in the APEC region and promoting infrastructure development in support of overall economic growth and development goals.
