

DRAWING-BOOK EXERCISE VIII.

A Glass Goblet: Fig. 11.

DIRECTIONS FOR FIG. 11. — Draw the construction lines in the order of the numerals. Make 31 and 34 equal; also 35 and 36. Observe the same equality with the other ellipses. As the goblet is supposed to be below the level of the eye, the ellipses must be drawn broader as they descend. Make the thickness of the rim at 4 somewhat greater than at 1, since the rim at 1 is not only farther from the eye than it is at 4, but is foreshortened more. Also make the rim at 5 and 6 considerably thicker than at 4. The pupils should not measure, without your permission, and then only to test their work.
