"These are a series of works adapted to elementary instruction entirely new, and upon a plan which combines conciseness, precision, and accuracy.—The Catechetical form admits of many advantages, which are not overlooked in these excellent treatises, which are illustrated where necessary with cuts. The price of each is only ninepence!"—*Asiatic Journal*.

"We venture to predict that they must soon find their way, generally into nurseries and our national schools, where they may be made the vehicles of much useful instruction both to the children of the rich and poor."—*Athenæum*.

"A complete treatise on a science for ninepence, is what the world has not often seen; but Messrs Oliver and Boyd have published several, and announce more.—They are well got up; they bear the names of known and responsible authors; and they appear to be decidedly superior to any which we have hitherto seen. The Catechism of Geography is on the plan of Goldsmith's, but it is greatly superior in point of execution, and contains as much matter at a fourth of the price.—The Catechism on English Grammar is a good abridgment—quite as clear as Murray's, and better, because shorter."—*Examiner*.
