To meet the above liabilities there is now subscribed \$3,361.76; but as the subscription list has not been completed, in all probability the sum of \$3,500, will be realized, which, in addition to the twenty shares in the Building Society when matured, will pay off the whole debt; but as the monthly payments to the Building Society have to be provided for, the special quarterly collection in the Church will have to be continued until the shares are matured.
