

SUBJECT—INDEX.

- APPLIED KNOWLEDGE:** in science and life, 24-5; in the school, 91, 109; methods of, 25, 43-5, 53.
- BAGLEY**, on formal discipline, 11-3; on educational aims, 20.
- BAILEY**, on nature study, 20.
- CLASSIFICATION:** criticism of, 96; scheme of, 97-8.
- COMTE**, on discovery and learning, 35.
- CORRELATION**, in an undifferentiated course, 56-7, 60, 99-100.
- CREW AND JONES**, on a science curriculum, 52.
- CUMMING**, on scientific discovery, 82.
- CURRICULUM:** character of, 47-53; criticism of, 60-4, 74-8, 94-6; makers of, 54-5, 64-5; method training in, 107-9; organization of, 55-9, 98-100; popular investigation of, 103-7; subject matter of, 109-14.
- DICTATED EXPERIMENTS**, 40, 72, 82-7.
- DESCRIPTIVE OBSERVATION:** methods of, 37-8; in the curriculum, 77, 81-2; and classification, 97.
- DEVELOPMENT**, as an educational ideal, 7-8.
- DEWEY**, on methods of science, 19.
- ELIOT:** on scientific training, 14; on probable reasoning, 31; on primary education, 46.
- EXPERIENCE:** in science and life, 23; as a test of hypotheses, 23, 34.
- EXPERIMENTAL OBSERVATION**, forms of, 39.
- EXPERIMENT**, the devising of, 40, 72, 82-3, 85-7.
- FITCH**, on methods of science, 20.
- FORMAL DISCIPLINE**, discussion of, 11-4.
- GENERAL AND SPECIAL:** methods, 26-7; science course, 62-4; in education, 9-10, 67-8; in the curriculum, 44, 50-1, 58, 66, 76-7, 93, 98-9.
- GENERAL EDUCATION:** character of, 10-4; and elementary science, 10-6, 62; and the state, 69.
- HARPER**, on functions of universities, 65, 68.
- HODGE**, on subject matter, 48.
- HUXLEY**, on science teaching, 15.
- HYPOTHESES:** in science and life, 22; the development of, 22, 34-43, 82, 88-90.
- INFORMATION**, and discipline, 35-41, 76, 101-2.
- INTEREST:** and the science course, 11, 49-52, 62, 77-8; and problem-finding, 29-30.
