We feel that we should watch the bent of the mind of the orphaned child placed in our care. If the orphan's mind shows a bent towards music then we will endeavor to make him or her a musician of the highest possible attainments. If we find a boy of a mechanical turn of mind like myself we will not spoil a good mechanic by trying to make him a doctor or a lawyer or a supreme chief ranger. (Laughter.) And if we find a boy, and I am not saying this lightly, whose bent is towards religion, like my esteemed colleague, we will endeavor to make him the supreme chief secretary. We will endeavor to educate him in that direction.

wife and for myself for the very kind and most high and excellent work you have done, and I hope you may have very many years to carry on this noble and excellent work to the full fruition, and I can say as one who knows somewhat of your work, that you are a very noble man behind. (Loud applause.)

The proceedings concluded with the singing of the hymn, "O! Save the King," and "My Country 'Tis of Thee," after which those present were invited to break bread with the supreme chief present.

**Among Those Present.**

Among the guests were William Lloyd Wise and Lady Wise of London, Eng.; Dr. Morris Montague, of London, Eng.; Mr. J. W. McGillicvery, Rev. Alexander McGillicvery, F. S. Mearns, high chief ranger; Mr. J. W. McGillicvery, high chief; Dr. D. Whitley, A. Stewart, J. P. Haskett, M. A. Hadley, J. Ash, J. W. McGillicvery, J. W. McGillicvery, A. Preston, Dr. Nidrie, high secretary; Alexander Stewart, high treasurer; Alexander Cowan, high physician; Dr. Cameron, high physician; Dr. Gentle, Annie D. Oxtley, Mrs. J. W. McGillicvery, Dr. L. M. Lamener, R. E. Hillyer, H. Boyd, A. Maguire, A. Fuller, H. McFarlane, J. W. McGillicvery, Dr. W. Springer, N. Fisher, M. Quigley, H. Turk, E. E. Gallenier, M. Quigley, J. W. McGillicvery, Dr. W. Springer, A. A. Hugheson of Grand Valley, A. A. Hugheson of Grand Valley, M. C. McGee, C. Barker, J. W. McGillicvery, Dr. W. Springer, Dr. Huron, Mrs. William Springer of Grand Valley, Dr. W. Springer of Detroit, E. Hinds of Detroit, Dr. Gaudon, Miss E. Tocque, Miss C. Tocque, Dr. W. Springer, Dr. W. J. Hudson of Bellevue, Mrs. W.

Early Every Country in the World  
Sends Them to U.S.

one in a thousand New Yorkers is so poor that the importation of this corn is the only way to keep the city from starving and freezing in the winter. It is a fact that the corn is being used for the footwear from nearly every country in the globe and that the corn is being used as gunpowder, carefully packed and hived away as part of the valuable cargoes of the big transatlantic liners. This importation has been going on for years and years and it has never attracted the attention of the alert financiers of events, for the old shrewd and experienced financiers of the United States have never noticed the corn on the manifest of the steamships coming from the West Indies, even when they have eagerly paid the freight. Apparently, the cause for this strange importation is the fact that the corn is being used for the footwear in America, which has practically completely destroyed the shoe industry of Europe. Every year new uses have been

and for the stretchable article. A few years ago, when electricity was not in so general a use as it is to-day, the demand from electricians for rubber was not very heavy. To-day, when every modern apartment house has electric light installation,

...demand for rubber for insulation purposes is something enormous. The ever-increasing number of electric traction routes, electric elevated railways, electric trolleys, electric elevators, have added to the demand for gutta-percha, and then come the automobiles, with their huge rubber tires, compared to which the rubber tires of the old bicycle are as nothing, and

When the supply available from South America seemed to be getting seriously low, the rubber men got their heads together and caused it to be known in foreign countries that America was in the market for rubber, any kind of rubber, old, new or between and betwixt, as long as it was rubber.

It was rubber. Immediately every rag-picker in Europe began putting aside his trade in his cellar for rubber shoes, discarded rubber coats, goloshes and broken rubber balls. These were shipped separately to houses which began making it their business to gather nothing but old rubber, and finally the gathered rubber was sent in huge consignments to America, when they were not sufficient for the Indian, decimated by a large epidemic, than the great fall in rubber prices makes it will decide.

The old rubber shoes come in bales, thousands of them every week, for the home consumption of rubber in Europe is not one-tenth of what it is in America, and they have an idea there that rather than pay a stiff price for a rare article they can do without it. That is where they are different on this side of the Atlantic, for

the rarer the article gets to be, the more the American wants it.

All the old rubber shoes are gathered and shipped to Liverpool, which is, so far, the only shipping point from which the rubber has come to this side, altho most of the old shoes have come in on German steamers.

**A Related Explanation.**  
An innocent-looking German boy walked to a drug store the other day and faced the proprietor.  
"Hay you got some bees' stings for rheumatisms?" he slyly enquired.  
"Bees' stings for rheumatism," the proprietor repeated. "Where did you hear

"Why, nuthur was reating it by de news-pers," replied the lad. The proprietor laughed. "I've seen something of that kind in the news-pers," he said, "but I won't attempt to fer you anything just as good. Where is he rheumatism?" "In de handt and in de arm," the boy

"Well, see here," said the proprietor with sudden smile. "I haven't got the pure in my shelves, but I keep it in my back yard. You go out thru this door and walk around my flower beds. When you see four or five bees resting on a flower just try to catch them up."

The boy nodded and went out. He was

When he came back his face was red and his nose—where an angry bee had stung—was beginning to swell. He held out his hand.

"I picked me some of dose bees oop," he acidly remarked.

"Did you?" said the amused proprietor.

"Yes, and your hand feel any better?"

Now that the Republican campaign managers are printing 250,000 copies of Bryan's remarks on Parker's nomination, to be circulated in the west, it looks as if they are doing this with having more in-

were creating a  
gence than they were willing to admit a  
w weeks ago.—Boston Herald.
