 REPORT OF THE COUNCIL.
 

---

The Council of the London Branch of the Entomological Society of Ontario, beg to submit the following:—

The prospects of the Branch are very good; the meetings have been well attended, excepting during the heat of the summer, and many valuable additions have been made to our collections.

The experiment of placing the Centennial Collection on exhibition at the rooms was so favourably received by the public, that it has been decided to take steps to the more frequent admittance of non-members, and in this way it is hoped and believed something may be done to create a wider and deeper interest in our favourite branch of science. This is a matter of great importance, and we have no doubt our members will acquit themselves creditably in it.

Submitted on behalf of the Council, by

JOSEPH WILLIAMS,  
Secretary-Treasurer.

---

 MONTREAL BRANCH OF THE ENTOMOLOGICAL SOCIETY OF ONTARIO.
 

---

The Fourth Annual General Meeting of this Branch was held on Tuesday, 1st of May at 8 o'clock p.m., at the residence of H. H. Lyman, Esq., the President, in the chair.

The following report was read and adopted:

## REPORT.

Your Council beg to present the Fourth Annual Report of the Society's operations.

They would refer with pleasure to the satisfactory progress of the Society in the study of our science, evinced by the steadiness with which the monthly meetings have been kept up, and the interesting and valuable papers read at these meetings. Solid progress has been made in the identification and classification of the insects of Montreal, and much preliminary work has been accomplished, the value of which will appear hereafter. The only cause for regret is that our number continues so small, but the zeal and perseverance of the present members go far to compensate for their paucity in number. Your Council entertain the hope that at no distant day our membership will be augmented by the addition of at least a few more students of our useful and interesting branch of natural history.

Twelve meetings were held during this year, at which the following papers were read and presented to the Society:

G. J. Bowles—"List of Eggs and Larvæ Described in the Seven Volumes of the CANADIAN ENTOMOLOGIST."

H. H. Lyman—"Notes on the Occurrence of *Argynnis idalia*."

F. B. Caulfield—"List of the Geometridæ of Montreal."

W. Couper—"On *Phyciodes tharos*."

H. H. Lyman—"List of some of the Geometridæ of Montreal."

F. B. Caulfield—"Notes on some Species of *Chrysolidæ* Occurring on the Island of Montreal."

F. B. Caulfield—"Notes on the Species of *Meloe* in Canada."

H. H. Lyman—"Entomological Rambles, Including Notes on Entomology at the Centennial Exhibition."

G. J. Bowles—"The Noctuidæ of Quebec."

G. J. Bowles—"Notes on D'Urban's Paper in the *Canadian Naturalist*, Vol. v., with Identifications of the Species."

Some progress has been made during the year in the compilation of the "Montreal Catalogue," and the names of 790 identified species are now entered on the list, comprising 385 Lepidoptera, 367 Coleoptera, 4 Diptera, 15 Orthoptera, 16 Hymenoptera and 3 Hemiptera. The earnest co-operation of the members is requested by your Council in this work. There is no doubt but that it will be of immense value to future students and will form a lasting memorial of our labours.

The finances of the Society have engaged the earnest attention of your Council. They
