BY CRESCENT CREAMERY CO.

Ottawa, June 2.—W. F. O'Connor, acting chairman of the board of commerce, received information from Winnipeg this morning that the appeal court of Maintoba had dismissed the appeals made by the Crescent Creamery Company, of Winnipeg, from convictions of breach of board of commerce orders dealing with profits upon the sale of milk. Counsel for both parties conserted. The Crescent Creamery Company and the City Daity Company have paid the costs of the board of commerce investigations into milk conditions in Winnipeg. Mr. O'Connor said the terms of the board or orders against these companies having been complied with, the board rescinds the order.

CALL

Delay in Planting Another Bullish Influence-Oats Are Also Strong.

Chicago, June 2.—Material fresh upturns in the price of corn resulted today from continued faiture of railroad efforts to enlarge receipts here. The close was unsettled, but 2c to 2½c net higher, with July \$1.75 to \$1.75½ and Sept. \$1.61½ to \$1.61½. Oats gained 1½c to 1½c. In provisions the outcome ranged from 20c decline to a rise of 12c. Announcement that only 95 cars of corn had arrived in Chicago today brought about immediate and persistent buying on the part of big commission houses. The advance which prices quickly showed was soon given further impetus thru reports that the 1920 grain season was uniformly ten to twenty days late in all the states that as a rule have surplus yield. Besides, in some important sections, where planting of corn still remained to be done, excessive moisture was threatening additional delay. Word of liberal new export business in wheat tended subsequently to prevent any notable reaction in the corn market, althoprofit-taking sales reached considerable volume at times.

Oats, like corn, appeared to be chiefly influenced by the lack of a free movement of supplies to distributing centres.

Provisions were somewhat depressed.

CHICAGO MARKETS.

Massey-Harris

Two Rows at a Time

Cultivating two rows at a time, makes this implement a great time and labor saver, and a boon to raisers of corn on a large scale. The high Arch of the Massey-Harris Two-Row Corn Cultivator gives plenty of clearance in tall corn, and the Teeth can be easily set at the proper depth and angles for thorough cultivation, without injury to the roots, by

means of convenient Levers. It is easily guided in crooked rows by the feet of the operator, and either Gang may be readily adjusted for widening

The width of tread is adjustable—the Wheels may be adjusted from 32 to 52 inches apart.

It is built almost entirely of or narrowing rows by a conven-ient hand Lever. By moving this Lever the Gang can be adjusted for rows from 28 to 44 inches apart.

It is built almost entirely of Steel, making a strong but light machine. The Steel Wheels have Malleable Hubs fitted with Removable Bushings or Sleeves.
