

HON. DR. J. B. M. BAXTER IS GUEST OF HONOR AT COMPLIMENTARY DINNER

(Continued from page 8)

They were not. People, both French and English, were leaving the country. Premier Veniot might quote figures and statistics as much as he liked, but he would better produce a policy that would give work and prosperity to St. John and the Maritimes. The policy offered by his Federal leader he would find was no help.

Speaking of freight rates, Dr. Baxter said that measures could have been introduced to render them equitable to all parts of the country, so that the fish of the Maritimes, the coal of Nova Scotia and the products of New Brunswick, could have been moved forward in equal competition with those of the central provinces. But what had happened? In order to get the support of the grain growers of the West, every dollar available for freight rate reduction went to get that support.

The Liberals might say that he was making a political question of Maritime rights.

"In the name of Heaven, why should it not be made a political question?" asked the speaker.

The grain growers could come to Ottawa and have the report of a commission, which was the result of months of research and labor, torn up and something else substituted, while Nova Scotia's "silent states" remained ignored as Maritime rights were ignored and these provinces robbed of their birthright, said Dr. Baxter.

That was why the Government lost Halifax and Kent, and that was why the Liberal party's position was reversed at Ottawa in the next election.

Wants Taxation Reduction.

The lightning of the heavy load of taxation, said Dr. Baxter, was a heavy task which called for the attention of a capable party.

Such a party must be placed in power, if the steady flow of taxation was to be turned back from a country where the lighter load of taxation now attracted them. If Canada's Federal government had been a party to this load, a task which the present Government had failed to do, but instead of adding millions to the national debt, he said, heavy expenditures necessitated by the war were not warranted today.

E. W. Beatty, President of the C. P. R., had said:

"The time has come to stop all capital expenditures in Canada except those which would be immediately profitable."

"He is right," said Dr. Baxter. "His words apply not only to Ottawa but to every form of Government in the Dominion."

"The ordinary man will reduce his expenditure, when he finds that he cannot afford it, to at least the equal of that income. If not for the fact that this, in Parliamentary language, was 'balancing the budget,' it is right for the Government to do so. But instead it is steadily increasing the national debt," Dr. Baxter declared.

It was apparent that the task was beyond their feeble powers, and every day showed that they must be forced to call in the aid of the Conservative party to solve a problem with which they were unable to cope, he said. (Loud cheers.)

Will Be Economical, He Says.

"Economy can be practised and that is to be our policy," he said. "But the wasteful expenditure must be cut out. We must say good-bye to 'big dreams' such as the Hudson Bay Railway. Parties must stand on their own feet and stop paying for the Progressive vote which they will never get," Dr. Baxter asserted.

"Transportation is another watchword of the Conservative party. Canada has the biggest railway system in the world, and the cost of running it at the expense of the people. We have to make it pay, but how, is the question," said Dr. Baxter.

Speaking of Hon. W. C. Kennedy, late Minister of Railways, he said that his death was a loss to the Liberals and people of Canada. He would have faced the problem as a business proposition which was not being done today with Sir Henry Thornton and his board of directors who never saw a railway before, were doing.

He had suggested to Mr. Kennedy that he should cut down competition between roads where they ran parallel to each other. "When there are four lines, the same business, cut them down to two and save some money for the people," he said. (Loud cheers.)

Let the C. P. R. and C. N. R. get together and between them cut out all unnecessary transportation. The money of the people invested in them must be saved to both lines. A middle way could and must be found, he said. If this was done freight rates must come down and thus the Maritimes would be able to seek their markets in the outside world. All this should be done without injury to the people of the west, he said.

Limited Preference.

Another matter he described as particularly Maritime. What the Maritime Provinces wanted was a limitation in the British preference and all goods imported through Canadian ports. "If the must must grow in the outside world. The rust is growing here very comfortably and why should it be asked, 'Has the west right to use foreign rails to export their goods?' "Unless," he said, "the policy of Canada is broad enough to give the Maritimes their due, then the Federation has failed. What is necessary is for us to set our faces against the selfish policy of the west. They are not

Stomach Comfort For Good Eaters

No Sour Risings, Gassiness, Heartburn and Distress of Indigestion If You Follow Meals With Stuart's Dyspepsia Tablets.

They may talk about balanced rations, calories and all that, but most people enjoy eating the good things of life.

"Why did we win in Kent?" asked the speaker. "Because public opinion prevented a trip being made from Kent county to St. John in less than three days. In consequence the doctor, because he was the sole physician attending to a large section of the country, was obliged to stay home, although he was sure he was present in spirit."

"Public opinion," he said, had been formed in the Maritime Provinces on three notable occasions. In 1867 when a railroad has been guaranteed from Halifax to Riviere du Loup as a means of carrying the manufactures, produce and fish of the Maritimes to Upper and Central Canada.

Again, it was manifested when the Hon. A. G. Blair had been the means of continuing that railroad to Montreal, and the third occasion occurred when it fell to him to do so. They had time and time again gone out of power by keeping their pledges. This time they had to go into St. John and turn to the party which was the only one which would give them what they desired. He spoke of his going to Ottawa to hear and see Lloyd George, who had a lowly start in life and who reached the highest position in the British Empire.

Dr. Baxter said he had a lowly start himself and although he had not gone far, yet what he had accomplished owed to his fellow-townsmen. He was grateful for the friendships at the first time he had ever been honored by his friends. He thanked them all most heartily.

Dr. Baxter was greeted with prolonged cheering as he resumed his seat, many of the audience rising in their places waving napkins and handkerchiefs. The orchestra struck up and the assembly sang "For He's a Jolly Good Fellow."

Makes Presentation.

George B. Jones, M.P. for Royal, on behalf of the company and the Conservative Party in the province, made the presentation of a beautiful silver tea service which was inscribed to the Hon. J. B. M. Baxter, M.P., and Mrs. Baxter.

The tribute he paid his old political chieftain was interspersed with a series of witty remarks that afforded much merriment.

Dr. Baxter, in reply, thanked the donors of the gift in an appropriate manner and spoke of Baxter's election to the House of Commons as a tribute to the Hon. J. B. M. Baxter, M.P., and Mrs. Baxter.

C. D. Richards, leader of the Opposition in the House, proposed the toast to "Our Party in New Brunswick."

In opening, he paid a tribute to the loyalty of the members of local Legislature, whom he had the honor to lead.

Knowing Dr. Baxter for many years, he could truly say that, despite his great success in many fields, he still remained a counsellor and friend to all as he had been in the province. New Brunswick had long been one of Canada's outstanding nations, and he was the same friend to all as he had been in the province.

At the gathering was representative of the whole province, he said. It was a symbol of renewed courage in the face of adversity. It was a symbol of the border of a new era. This was only a small indication, he said, of what the rest of the province felt. The present Government was concerned, what had been said of the home life of the province was true also of the Provincial Government. The New Brunswick Government had been a source of great extravagance, he charged. They came in on pledges of economy and retrenchment, and in seven years they had raised the home debt of the province from \$17,000,000 to \$28,000,000. That was not all, he said, of its extravagance, but he was the cause of the increase in the public debt, an interest charge of 40 per cent. of its revenue, he said. He was responsible for anything, but he took his figures from the statements of the Government itself.

Useful He Says.

The Liberals said his cry did not amount to very much but, he said, there was a time when this would be true, but under present conditions it was a cry for help. He was a man who was not afraid to carry on the way they were doing, when the cry from one end of Canada to the other was "Useful He Says."

The expenditures were beginning to be felt in the province, and the present Government was a better business administration.

One of the outstanding needs in the province today was economy and retrenchment, he continued.

He said that when the election came, and it would in his probability come this year, the Conservative party would be ready and willing to go out and win.

With the united party the province now had, there should be no doubt, he said, as to what was the decision would go.

The toast was pledged to the music of "Hail, Hail, the Gang's All Here."

New Member.

Loud cries of "Doubt, he's all right!" followed Mr. Richards' speech, while the member-elect of Kent was called upon by the chairman amidst hearty cheers which continued for several minutes.

Mr. Doucet, in response, called upon his hearers to bear him witness that while he was the instrument through which the good old Conservative party had been returned to Kent, he would ask them to remember that this did not constitute him a fluent speaker. He gratefully appreciated the opportunity afforded him as the representative of the people of Kent to respond to the toast, "Our Party."

It was a pleasure for him, he said, to be present and pay tribute, with the distinguished gathering, to the Hon. Dr. Baxter, who had on many occasions showed he could help the cause, and particularly in the late campaign in Kent.

Criticizes Railways.

Mr. Doucet said he regarded the absence of Dr. Landry, one of the leading Conservatives and staunchest supporters

THE INCESSANT NIGHT COUGH

Not only does it rasp and tear at the chest, but it breaks up the night's rest, and renders the patient less able to resist its ravages. It is the worst of all.

IS EXONERATED ON AN ARSON CHARGE

Flourens, Jan. 29.—(Special)—Sheriff Foster brought James McDonald from the Woodstock jail recently to have his preliminary hearing before Police Magistrate Weldon Melville on a charge of arson.

Frederic Squires, of Woodstock, was present in the interests of the prisoner while Mr. Montgomery, of Hartland, was the plaintiff's lawyer. Several witnesses were heard and it was definitely proved that the prisoner was at the home of O. N. Miller at the time of the fire. Magistrate Melville dismissed the case and Mr. McDonald will now proceed to Juniper to work, as he was on his way there when arrested.

Simple Application That Dissolves Blackheads

No more squeezing and pinching to get rid of those unsightly, blackheads. There is one simple, safe, and sure way to get them out, and that is to dissolve them. Get about two ounces of sorbic powder in a hot, wet, cottony pad, and rub it over the face for a few seconds—wash the parts, and every blackhead will be gone. Sorbic powder is a natural skin cleanser, and it dissolves all blackheads, whiteheads, and every kind of skin impurity. It is a simple, safe, and sure way to get them out, and that is to dissolve them. Get about two ounces of sorbic powder in a hot, wet, cottony pad, and rub it over the face for a few seconds—wash the parts, and every blackhead will be gone. Sorbic powder is a natural skin cleanser, and it dissolves all blackheads, whiteheads, and every kind of skin impurity. It is a simple, safe, and sure way to get them out, and that is to dissolve them. Get about two ounces of sorbic powder in a hot, wet, cottony pad, and rub it over the face for a few seconds—wash the parts, and every blackhead will be gone.
