THE TARIFF
COMES UP
IN SENATE

Amendments to Board Bill
Moved by Sir Richard
Cartwright

COMMISSIONERS' TERM

Information for Public in Cases
Where Protection is Sought—
The Vacant Senate Post—The
Government and the Car Ferry

Ottawa, March 15.—The Liberal majority in the senate today gave an intimation of its intention to make substantial amendments to the government's bill for the creation of a permanent tariff commission. Hon. Mr. Loughheed gave no indication what the government's attitude would now be in the face of an adverse majority in the upper house.

The senate took up in committee the bill for the appointment of a tariff board. Sir Richard Cartwright said he had some amendments to offer and thought the government might wish to examine them so he would give them a notice of motion. Senator Davis said he had suggested a day or two ago that one of the three commissioners should represent the agricultural interests, one the labor interests and the other the manufacturing and banking interests of Canada. He said that the farmers and working men should have a voice in the selection. He gave notice of an amendment which he will move to this effect.

On section four of the bill, which directs the tariff commission to inquire as to the price, cost and transportation of raw materials, cost of production, transportation from place of production, cost and condition of labor, prices and all conditions and factors entering into the cost of production and price to consumer, Sir Richard Cartwright moved that in addition the commission would also be directed to report "the grounds, if any, for believing that articles in question can be produced as cheaply in Canada or elsewhere within a limited period; what other industries would be affected by increase of duty; the effect of any employment in question on the health of employees, etc."

Important Amendment

He also proposed an amendment, "Provided always that in all cases where the commission reports in favor of any increase of duty, or where any application for an increase is made the commission shall, in addition to reporting upon the above matters, make a special report which in the case of any industry already established, shall state the number of factories now existing and the number of hands now employed, giving in each case the number of men, women and children respectively, and the amount actually expended in cash in erecting and equipping the same; the nominal capital and amount of bonds and liabilities, also whether any mergers or combinations have taken place and the amounts of watered stocks issued; a list of the shareholders and the number and amount of shares held by each shareholder; the dividends paid during the preceding ten years; the wages of hands and number of hours worked per diem; the total amount of goods of the industry in Canada whether home made or imported."

Robert R. Phillips died yesterday at his home, 84 Queen street, after a lingering illness. Mr. Phillips was sixty-nine years of age and is survived by his wife and two sons, Robert, Jr., of Newwood (Mass.), and George, of this city. The funeral will be held on Sunday afternoon.

Newcastle, N. B., March 15.—(Special)—The death of Michael Brennan, aged seventy, occurred in Douglastown this afternoon after several months' illness from heart trouble. He came to Lower Newcastle from County Waterford, Ireland, fifty-seven years ago and had lived in Douglastown forty-eight years. He was twice married. His first wife was Miss Nancy Maloney and they had one child, who died. His second wife, formerly Mrs. George Arbour, survives, also one older brother, John, of Bartibogue.

J. E. LeFevre, formerly of Summerside, P.E.I., is dead in Vancouver.

Children Out at Night

Chatham World.—There is no doubt that a large per cent. of the degradation, disgrace, ruin and crime among the young springs from the habit of night prowling, corner loafing and kindred acts by both sexes in city, town and hamlet all over this broad country. Any person who keeps his eyes open knows this. Hundreds of boys and girls are out at night and we all know that many influences for evil and none for good surround them continually. A curfew restriction may be devised as old fashioned and puritanical, but the fact remains that there is vastly less night prowling in towns that have a curfew ordinance and enforce it.

Last Night Saw Fruitless End
Negotiations—Government Now
to Use Legislation—Bad, Too,
in States

London, March 15.—The government's efforts to secure a settlement of the coal strike by effecting an agreement between the coal mine owners and their employees, have failed. After three days of joint conference, the negotiations were broken off this evening and legislative action now has to be invoked to secure a minimum wage for all the underground coal workers.

In making this announcement to the conference today Premier said: "The government have done all in their power to secure a settlement of the controversy by an agreement, and they have come to the conclusion, with great regret that this is impossible and that other measures must therefore be taken."

After reviewing the abortive attempts to secure a settlement of the strike by an agreement between the interested parties, the official reporter continues: "The prime minister stated that the government would ask from parliament a legislative declaration that a reasonable minimum wage, accompanied by adequate safeguards for the protection of the employer, should be made a statutory requirement of the contract of employment of people engaged in underground coal mines. An important question how such minimum wage may be ascertained for any particular area, the prime minister, without pledging the government to any precise form of machinery, indicated that district minima should be locally fixed by a point board of each district, consisting

of representatives of employers and employed with a neutral independent chairman who might be elected by the parties themselves, or, if necessary, by the government. Such a body would, in the opinion of the government, afford what they have already regarded as all-important means for securing an end to the controversy between the employers and employed.

"The proposals of the government will include provision to secure promptitude in the presentation of cases of the parties and adjudication of them."

The government's minimum wage bill will be read in the house of commons on Tuesday, and probably become a law by the end of the week.

London, March 15.—All the projected visits of King George and Queen Mary to foreign courts have been abandoned for this year. The change in the royal programme is attributed officially to the coal strike, but in all probability the tenuous Anglo-German relations and the possibility of the occurrence of unpleasant incidents if the king and queen appeared in Berlin, have more to do with it than the labor troubles in the British Isles.

New York, March 15.—"All negotiations with the anthracite coal operators are off," declared John P. White, president of the United Mine Workers of America, at the adjournment of the meeting this afternoon between the miners and operators, in which the miners declined the operators' counter proposition.

"I look for a general suspension of work on April 1," he added.

BOSTON WANTS THE C. P. R.

Boston, March 15.—An order inviting the Canadian Pacific Railroad to extend its lines to Boston was reported in the house of representatives today by the committee on railroads. The vote in the committee on the order was unanimous. The same committee has before it the petition of the Southern New England Railroad for permission to enter Boston as another New England outlet for the Grand Trunk Railroad.

We are admonished that a good name is better than great riches—but most of us keep right on hustling for riches just the same.

Citizens' Duty to Town

Chatham World.—Every man is a part of his town. The town embraces the fortunes, and in some measure at least takes on the character of the man. So loyalty to one's town is no more than loyalty to one's self; and this loyalty is in the line of all well-shaped human nature. Therefore it is right to say that the man who does not stand up for his town is in some way dwarfed. There is something wrong about him. His fellows will pass this judgment upon him, and the chances are that while he may add to the discomfort of others he will not escape making himself unhappy.

Bright plaids and mixed woolen materials trimmed with plain cloth in a contrasting color will be used for children's dresses and coats.
