Chapter Eight

SPORT NEWS OF A DAY, HOME AND ABROAD

THE RING.

Champion in Three Bout.

That Benny Leonard, lightweight boxing champion, has no intention of retiring from the ring, was the statement made the other night by Billy Gibson, manager of the title-holder. Gibson, noting the reports of Leonard's retirement, disclosed that he had just arranged another important match for the champion. Leonard will exchange blows with older Bartfield, the rugged Brooklyn "retirement" in an eight-round session at the Arena A. C., and which promoter Driscoll has arranged for his second show in the Fourth Regiment room, Jersey City. Johnny Dundee, Leonard's Italian rival, and Mel Coogan, Brooklyn lightweight, are scheduled for the first of the Dan O'Dowd of Boston, who last night fought against Bill Brennan at the opening show of this club, will engage at Roberts, the young Staten Island heavyweight.

In addition to this bout against Bartfield, Leonard is booked for two more contests. Manager Gibson has closed negotiations for a match against Jimmy Duffy at Lockport, N. Y., and another against Johnny Griffiths of Akron, Ohio. The Duffy bout will be for fifteen rounds and will be held at Tulsa, Okla., on Nov. 17, while Leonard will tackle Brennan in a ten-round event at Denver, Colo., on Nov. 20.

Boxing Bout Frederickson, D. B. writes in the way, is likely to win in New Brunswick within a short time. Since the war, athletic activities have been at a low ebb, and the general support all over America has been at a low ebb. In Nova Scotia, a fairly high-class battle has been taking place, and it is said that two or three New Brunswick bouts will be held in the near future.

Boxing Bout

Four of the players who will compete in the world's pocket billiard championship at Philadelphia Dec. 1 to 13, inclusive, were seen in action at the National Recreation Academy in Brooklyn last week. Louis Krueter, Joe Conlan, Ralph Greenleaf, and Charley Stouphenburgh played the first games in the round-robin tournament, and Krueter and Greenleaf were the winners. Some of the fact that it was the first time several months the players had shot a championship table and under championship rules.

Krueter defeated Conlan, the New York state champion, in the afternoon of a score of 125 to 98. He made a high 15. Conlan's best was 18. It took thirty-one innings to decide the match. In the nineteenth frame Conlan made three scratches in succession and forfeited the entire fifteen balls. The third was accidental. He tried pocket a ball and break the bunch at the same time. He was kissed off into a pocket.

In the evening Greenleaf won from Stouphenburgh by a score of 125 to 5 in twenty-nine innings. Greenleaf made a high 48. It was the best exhibition of pocket billiards seen in the two games, and the run he was called upon to make several treacherous combinations. Position play was excellent, and his table work was all that could be desired. Stouphenburgh made a high run of 12.

CRICKET.

MacLean Will Go to Pittsburgh.

Harry MacLean, for four years one of the stars of the Cape Breton hockey team, will leave this week for Pittsburgh, Pa., where he has accepted a position with one of the hockey clubs in the city. MacLean has all the qualities of a brilliant performer. His name is in the record books, and he formerly played U. N. B., and was to have ended his career in the term, but the offer to go to Pittsburgh was too attractive.

OWLING.

Y. M. C. I. League.

The Birds of Wisdom got very much the best of their argument with the Hawks in their first string last night, or the Owls Cleary with a score of 111 and McCurdy with 105, closely followed by Garvin with 98, contributed to a string that closely bordered on the five hundred mark. The Hawks had Powder hitting them for 106 and Kelly getting the ninety mark. This string gave the Owls a lead of thirty-six pins.

The second string followed the lead of the first and went to the Owls by fifty-four pins. In this string Moran and McCurdy scored 106 and 107, respectively. This with Cleary's 96 and Garvin's 93, gave the Owls a total of 488.

THE BOY SCOUTS

An Interesting Budget of News From the Local Troops

Bugle Band For West Side

Saturday Hikes Into the Woods—Many Successfully Pass Tests—Assisting Victory Loan Campaign.

St. Paul's Group.

St. Paul's troop of Boy Scouts seem to be hustling right along. Fred Strong, Roy Barton, Rayburn Jack, Ralph Shannon, and Lorne Bowman took advantage of the goodness of Dr. S. McDonald and called upon him to give them instructions in ambulance work, and they speak in the highest terms of his kindness and the value of his instructions.

A Wolf Pack has been organized at St. Paul's and they are fortunate in securing as cub master Walter Peters, and George C. Todd, leader, Cecil Emery, second, Buffalo Patrol, No. 2, Donald Hatfield, leader; Kenneth Shubert, second.

C. P. R. Men Roll.

C. P. R. employees bowled an interesting game last night on the Victoria alleys. The team from the sheds defeated the King street aggregation by fifty-nine pins.

McAuliffe's League.

On Victoria Alleys, last night, team No. 2 took four points from team No. 3, in McAuliffe's league. Foshay was the star for the winners, having a high average of 106.1-3. Garnett had the highest individual string, rolling 121.

Shots at the King Pin.

Four straight! Well done, Owls! After all, any team that can roll 1,486 in their third game for the season deserves to win. That's championship bowling.

During the second string the Hawks' bowling was heard melancholy murmuring this parody:

"A wise old Owl was a bowling bloke,
He spoke;
The less he spoke the more pins he heard,
He spoke;
Why aren't my Night Hawks more like this bird?"

The Hawks worked hard but 1,486 was too big a proposition for a newly organized team chiefly composed of players new to the game.

The Owls showed fine sportsmanship by giving their opponents as much applause as they did their own team.

"The Birds of Wisdom now have the three string team total record as well as the single string team total.

Last night's win puts the Owls on top of the league by a margin of nearly two hundred points.

McCurdy has certainly brought strength to the Owls. He was a little late this season in getting his eye in but now that he has got started you can look for big strings from him.

Cleary, with his average of 101 2-3, led his way to the lead for high average for the season. He now has an average of 98.

McAuliffe of the Hawks made his first appearance last night and gives promise of becoming one of the strong men of the league.

POCKET BILLIARDS.

Len Dryden Wins Match.

Len Dryden defeated Harry Gagnon in a game of pocket billiards last evening, 200 to 142. The winner is evidently recovering some of his former skill. For years he was considered one of the best players in this part of the country.

TURF.

Tommy Cotter Sold.

Tommy Cotter, 21½, has been sold by Len Dryden to John Moran of Sussex. The little pacer is well known throughout the maritime provinces.

An enjoyable tea and slower was given by Mrs. H. N. Peterson yesterday at her home, Mount Pleasant avenue, in honor of Miss Janie Stone, whose marriage to Major Fred McKean of this city will take place in New York on November 11. Miss Stone was the recipient of many beautiful gifts.

Monday and the general routine of work was carried out.

15th St. John Troop.

Centenary Methodist Troop, held its regular meeting Friday night in their troop headquarters and after their usual games, were given considerable routine work by their troop leader, after which the patrols went at the regular scout work with much zeal and energy.

Troop Leader Gordon Adams, son of M. G. Adams, 166 Waterloo street, passed his Pathfinder test this week, making 96 per cent before Wm. Macintosh of the Natural History Society, who is the examiner, and also passed his Missioner's test, making 98 per cent, before F. J. M. Appleman, who is examiner for that badge. And now, advances Troop Leader Adams to the rank of King Scout with a Grade A card, and is now classed with the higher members of the scouts having worked hard to obtain a King Scout. He is receiving congratulations on his success. Patrol Leader Stanley Goodwin, son of the Rev. H. A. Goodwin, pastor of the church, also passed his Missioner's test, making 98 per cent on his examination and is also working hard for King Scout. Ronald Hart, son of H. H. Hart, 96 Westmain street, also passed his electrician test and is working hard for first class. Scouts Lawrence Smith, Albert Winslow and the team of the scouts have been working hard to obtain a King Scout. The significance of the line has been allowed to reach the ears of the yachting critics. Very few except some close friends of Lipton, have had a chance to get a peep at Shamrock's under-body, for she has been closely boxed up at the foot of Twenty-seventh South Brooklyn, and both night and day has been under the closest surveillance.

When Beckett and Carpenter Meet

Englishman Thinks His Chances Good—Seats \$17.50 to \$125.

(By Berkeley in London Daily Mail.)

France is evidently already very much interested in the Carpenter-Beckett match, which is to take place at the Holborn Stadium on Dec. 4. We are not yet in a state of nervous tension, but I presume about his beating of Wells and notice as soon as Beckett goes into training, which will be in about three weeks' time.

I had a long conversation with Beckett after the Marchant-Honeyman affair at the club last Monday night. "Joe" had just returned from Paris, where he had seen and met the Carpenter-Beckett match, which is to take place at the Holborn Stadium on Dec. 4. We are not yet in a state of nervous tension, but I presume about his beating of Wells and notice as soon as Beckett goes into training, which will be in about three weeks' time.

German Films Show U-Boats at Work.

New York, Nov. 1.—Motion picture films taken from the archives of Grand Admiral von Tirpitz in the former Kaiser's admiralty, and showing Allied vessels being torpedoed by German U-boats during the war, were brought here by J. H. Mackzum, a Knights of Columbus secretary. The films, which were designed for exhibition by Germany on the day of its triumph, were made by camera men on a submarine which was commissioned to cruise about the Irish Sea and photograph merchant vessels. This boat used more than 40,000 feet of film.

Dutch Credit to France.

The Hague, Nov. 1. (Havas).—The senate today adopted a resolution granting a credit of 25,000,000 francs to France for the reconstruction of devastated regions.

160-FOOT MAST IN THE SHAMROCK IV.

Challenger to Tower Over American Defender With Huge Sails—Time Allowance to U. S. Boat.

New York, Oct. 31.—Since the New York Yacht Club has consented to race Sir Thomas Lipton's Shamrock IV. for the America's Cup next summer, every detail in connection with the challenger will be of interest from now on. Curious it is and an instance of the shrewdness of the Irish baronet that although the boat has been on this side since 1914 only the scantiest information about her has been allowed to reach the ears of the yachting critics. Very few except some close friends of Lipton, have had a chance to get a peep at Shamrock's under-body, for she has been closely boxed up at the foot of Twenty-seventh South Brooklyn, and both night and day has been under the closest surveillance.

Still a few bits of important information regarding her rigging and the amount of canvas she is expected to carry have leaked out, and, singularly enough, they floated along from the Old World.

To begin with, she will have a mast of 160 feet, something extraordinary for a yacht seventy-five feet on the water line. The great importance of the point must be understood when a competitor is made with the Besigue, Vanitie and Defiance, the three boats built for the defence of the cup. To go on the figures so far obtainable Shamrock's mast will tower more than thirty feet over that of the Resolute, twenty-five feet over Vanitie, and twenty feet over the Defiance. The significance of the mast is that it is the only vessel which will have to give a time allowance to whichever boat is selected to meet her, and whoever it is, more or less, will not be known until the final selection is made.

Ill-luck of Former Shamrocks.

In his three previous attempts to lift the cup Lipton's challenges were not attended with any great amount of good luck, but the tradition is that the fourth Shamrock always works the charm. The proverbial good fortune credited to a four-leaf shamrock is what most of the world has believed in since the first Shamrock was built. The fourth Shamrock, which has attracted a lot of credulity, until in a recent visit to Ireland he was reported to have stated that if he failed this time he would build a fifth challenger, and anyway that he would keep on building Shamrocks as long as he possessed a penny to buy a screw put in a race's keel.

No Yachting Contest on Earth has Produced more strikingly unlikely incidents than the America's Cup contest, and Lipton has come in for his share.

When he first grasped the idea of challenging for the trophy he wanted to represent the Royal Cork Yacht Club, the oldest sailing club in the world, but the members there were not in a position to back the challenge, and there was nothing to do but to turn to the defunct Royal Ulster Yacht Club. His next step was to secure a designer, and here again he met with a setback, for George Watson, who had designed Valkyrie II, for Lord Dunraven, refused the offer to design Shamrock I, and Lipton was forced to turn to Will Fife, of Pacific, who had little or no experience in mapping out big racing machines. Fife's boat was followed by a share of ill-luck, for in one of the races against the Columbia, Shamrock I carried away the topmast, but although successfully repaired, she never seemed to sail well afterwards. There was another unlucky angle to the series, for a spell of exceptionally calm weather set in, and the result was a long string of unavoidable postponements.

After the failure of his first attempt, Lipton was asked if he would come again, and he quickly answered that he would if he could coax Watson to design the boat.

Sir Thomas kept his word, and sent a challenge for the cup to Watson, who had induced Watson to lay down the plans of the yacht. Of all the Shamrocks the second one was the most unfortunate, and it has been said by those who seemed to be on the inside that she was the chief cause of Watson's early demise. He is said to have overworked himself experimenting with models and plans, and this, added to the disappointment he felt over her failure, worked on him to the extent that he succumbed without much of a fight, carrying her nose too much when carrying her full racing clothes, and that defect could only be remedied by

NEBRASKA MADE THE CLAIM THAT THE OMAHA RACE RIOTS WERE CAUSED, IN PART, BY IMPROPER MOVING PICTURES.

At the same convention the House of Bishops adopted resolutions asking for the appointment of a congressional committee to inquire into the alleged ill influence of certain types of motion pictures.

In the province of Quebec pictures of the character referred to by Bishop Shaw have never been shown, because they never got by the board of censors. Even as it is, the Roman Catholic church heads are not convinced, apparently, that the Quebec censorship is strict enough. Recently L'Action Catholique had an article urging a revision of the laws governing the exhibition of moving pictures in the public theatres, and advocating a stricter censorship, in general.

"It might be well to commence by doubling the number and the equipment of the official censors and giving the latter clear and precise instructions based, for example, on the definitions, which are very wide, of the criminal code. We also demand a good and efficient and obligatory—police censorship."

THE QUESTION OF PICTURE CENSORSHIP

(Montreal Herald.)

A reminder of the good effects of the strict moving picture censorship which is maintained in this province comes from the fact that at the convention of the Protestant Episcopal church in Detroit this week, Bishop E. V. Shaver of
