THE FARM.

(For the Sun.)

of the 25th inst. a letter from a promi-

nent Queens county farmer regarding

the use of land plaster. Mr. Hall's

explanation of why so much land plaster goes to the United States is

ing as to the composition of land plas

fully in the preservation of human

This element is a highly volatile gas, and is eliminated from all animal

bodies principally through the urine

It is the most valuable of all manurial

powerful irritant to the lungs and all

mucous surfaces. A simple illustra-

tion of the effects of ammonia fumes

is clearly seen in its destructive action

on the varnish of carriages and the

blacking of harness. While as a rule

people should keep their carriages and harness at a safe distance from this

ammoniacal gas, very few realize that

it is a powerful irritant to the lungs

of their horses and cattle. Undoubt-

edly many of the diseases affecting our

domestic animals arise from their close

confinement in stalls and stables with

Anyone who is accustomed to the

care of horses is aware of the strong

fumes that make the eyes and nos

smart when the bedding is shaken un

in the morning. A single handful of

plaster scattered over the bedding will absorb every bit of the ammonia,

showing conculsively its absorbent powers and how the healthfulness of

the stall can be cheaply and easily

In these days of the development of

winter dairying the use of an effectual

absorbent and deodorizer in the cow

stable is especially necessary. If we

expect a profitable flow of milk from

our cows their stable must be kept at

a temperature of not less than 50 deg

Fahr. To keep stables at this tem-

perature in cold weather we must

close them up and warm them by the heat of the animals' bodies, as the

dairy business will not afford stoves

Ex-governor Hoard of Wisconsin

in speaking of the use of land plaster

our stables up tightly the heat at

once sets free noxious and poisonou

gases. Detrimental bacteria are stim-

ulated into action. What can be done

that is within the reach of every man He can at least disinfect the stable

by using land plaster. It will absorb

While in New Brunswick our far

mers do not generally confine their

any purifying agency in their stables

during frosty weather, ye in the

very nature of things the man who

keeps cows for profit will be compel

led to stop the cracks in his stable

walls and surround the cows with

milk-making temperature. In doing

this I find from personal observation

that many men overlook the need of

sufficient ventilation and the use of

absorbents. The quality and health

fulness of the milk and butter de-

pends as much on the air the cows

breathe as on the food they eat, so

it is highly important that the air

I quite agree with my friend, Mr.

Hall, that the free use of straw for

littering will absorb all the liquids in

power of straw stops there, and we

have ammonia and other gases aris-

ing to a greater or less extent every time the bedding is disturbed, and

from the wet floor after the bedding

gases and not liquids that plaster is

economical. I beg to conclude my

case by again quoting from ex-Gov-Hoard. In Hoard's Dairyman

a farmer should purchase in the mar-

ket the same amount of ammonia

that he usually allows to go to waste

from a herd of 20 cows and a span of

horses, he would pay at least \$50 for

it at wholesale rates. Three 'ons of

land plaster, properly used in the

stable during the winter, will absorb and hold all this value. A pint to

the animal per day is about sufficien

It should be sprinkled in the gutters

behind the animals and in the bed

ding, both night and morning. Al-

ways at night when the stable is

closed. Twenty-two stalls one pound

each night and morning for six months would amount to 7,920 lbs. for the six

MINISTERS AT GALT.

Large and Enthusiastic Gathering and Address from Workingmen.

The Finance Minister Makes the Principa Speech-Warm Welcome Tendered by a Large Crowd.

Galt, an. 28.-At this town tonight the dominion ministers resumed the tour which was interrupted by the death of Sir John Thompson on December 12, and addressed a large and enthusiastic gathering. The ministerial party left Toronto on the Canadian Pacific railway at 4 p. m., and should have reached their destination at 6.01. They arrived at Galt, however, over an hour and twenty minutes late. The delay was chiefly caused by the frozen snow which had collected on the tracks just outside of Streetsville Junction. On either side lay large drifts, through which, only two hours earlier, the train leaving Toronto at 7 a. m., had fought its way, aided by a snow plough. Several ineffectual attempts were made to overcome the obstacle, after which the conductor, brakeman, engineer and fireman, aided by relief, started in to clear the track by means of shovels. Another locomotive sent out from Streetsville was then attached to the rear part of the train, and forced it

forward until the road was clear. The ministerial speakers tonight were Hon. George E. Foster, Hon. John Haggart, Hon. W. B. Ives, Hon. John Costigan and Hon. Dr. Montague. Their ranks will receive further accessions in a day or so, when Hon. J. C. Patterson, Hon. N. C. Wallace, and Hon. J. F. Wood put in an appearance. It will thus be seen that some of the western constituencies are about to be favored with a visit from one of the largest arrays of ministerial speakers that any political campaign has ever drawn together. Hon. Messrs. Costigan and Ives cannot claim an intimate acquaintance with Ontario, but they are known by reputation, and deservedly esteemed. and a closer intimacy cannot fail to add to the popularity which devotion to the public service has won for

Hon. Dr. Montague, it is pleasing to note, looks in the best of health, and now seems to have completely recovered from his recent spell of sickness. He will be in capital form for any talking that may fall to his share.

On reaching Galt the ministerial party were received on the platform by a large number of leading local politicians, by whom they were escorted to the Town hall, where the meeting took place.

Rarely has there been a larger gathering than that which assembled in the Town hall to meet the ministers. The building was crowded in every part, and numbers were unable to find admission. There was much enthusiasm, and the ministers, on making their appearance, were most heartily cheered. Hon. George E. Foster, minister of finance, was the chief speaker, and he simply excelled himself in the magnificent speech which he delivered, and which lasted for an hour and twenty minutes. The finance minister devoted himself to one branch of political discussion, and showed that the national policy had not been the bane of the country; but it had built up the dominion and had led to its development in every pos

The chair was occupied by George Pattinson, president of the South Waterloo Liberal Conservative association. In addition to the members of the dominion cabinet, there were on the platform: George A. Clare, J. Irwin, James Warnock, Dr. Vardon (mayor of Galt), Rev. A. G. King, Rev. J. Ridley, Rev. Dr. Jackson, Rev. Radford, W. R. Plum, T. Johns, Thomas Cowan, James Melross, F. D. Palmer. C. D. Kennedy, Dr. Buck, George J. Jaffray, J. E. Klotz, D. Keith, C. Squires, A. Mueller, C. Cummings, F. Moss, A. Laven, William Baird, R. McFadden, J. S. Taylor, J. McQueen, Dr. Frank, J. M. Scully, Hugh Thompson, F. Goebel, — Barnhardt, D. Ritz, L. Ritz, John Katzamier, John

Hartman, A. B. Thom, James F. Row, B.A., E. J. Bond, Joseph Strain, William Cowan, T. Hamilton, H. S. Howell, and others. The chairman, in opening the meet

ing, expressed much gratification at the large atendance. He alluded to the fact that they had on the platform with them George A. Clare of Preston, who had this afternoon been selected by the liberal conservatives of the riding to carry their banner to victory at the next election. He proceeded to pay a warm tribute to the memory of the late Sir John Thomp son, and expressed confidence in their present leader, Sir Mackenzie Bowell, who had associated with him the emi nent men who were foremost in the cabinet of the late Sir John Macdon ald, and who for a long time had taken an active part in public affairs. He had no doubt that, with such men at the head of affairs, there would b no pause in the progress and develop ment which had been accomplished in the past, but that the dominion would be carried forward still further on these paths in the future (Cheers.) While in the past they had not been able to send to Ottawa ar adherent of the government from that riding, as they would like to have done, he ventured to assert that in no part of the country were there stronger supporters of the government, or of the national policy, which they up-

George Clare, conservative candidate for South Waterloo, was then called upon to address the meeting. He wa received with cheers. In the course of a brief but practical speech he said that the convention of that afternoon not only selected him as the candidate, but they also decided to send the government a supporter at the next elec-(Cheers.) If elected, he prom ised them that he would guard the interests of the town of Galt and the riding of South Waterloo to the best

of his ability. (Applause.) C. Kennedy was then called upon to read an address to the ministers from the working men of Galt. It was couched in the following terms: "As working men, and on behalf of

those associated with us in the manu-

facturing industries of Galt, we desire to welcome you here and to express our gratification at your presence on this platform. Deeply interested as we are in the manufacturing trade of the dominion, we more heartily welcome you as the upholders of a policy that has given us working men fair play in the contest with working men of other countries, and we trust that you may long be spared to defend our present position from all attacks, and to keep a watchful eye for foes from within or without." (Loud cheers.)

MOUNT ALLISON

The Work of the Second Term-Large Number of New Students at the Ladies' College

Sackville, Jan. 29.-The work of another term has been going on quietly for over three weeks. The students of the university usually enter on their course in September, and the attendance during the second term is therefore about the same as the first. Miss Annie Sprague of St. Stephen, who has been teaching one of the public schools here for a number of years, has come into residence to pursue a B. A. course. Miss S. Lutz, another Westmorland Co. teacher, is also be ginning her arts course. Mr. Ancient, a lay-reader of the Church of England, is pursuing a special course in classics, and boards in "The Residence."

A large number of new students entered at the Ladies' college, but on account of illness and other causes an unusual number of first-term students did not return. The increase is therefore not as large as it would otherwise have been.

The Academy has gained a few new students. Principal Palmer is a most painstaking teacher. Though the order and discipline are now admirable and the staff the best in recent years. it will take the public a few years to learn what a good school the Academy now is. Since the university students are no longer in the dining hall, there is much more of home and family life in the school.

Since the term began Prof. Hammond and his associates have been rejoicing in their fine studios in the new Art building. The rooms open one into the other along the entire back of the building, with windows having a northern exposure. The front half of the building, with no windows in the walls, but lighted from the roof, contains the exhibition rooms, in which the collection of oil paintings and of water colors and of "black and white" are to be hung. These rooms are nearly finished, and before the commencement exercises everything will be set in order. Recently Prof. Hammond threw open his studio to visi-tors, when it contained a number of pictures which he was about to take up to Montreal. There were several characteristic marine views from St. John harbor and the Bay of Fundy, There was a picture of a landscape in the rear of the painter's house, which appealed especially to a Sackville public. The central picture of all was one for the C. P. R. management, a mammoth representation of the new C. P. R. Hotel de Frontenac at Quebec, showing a part of the citadel, the town below and a stretch of river and the opposite shore. Prof. Hammond's studio is a most attractive place to visit, and the large number who availed themselves of the recent in-

tion of the favor. Sedgwick Bayley of Elgin, N. B., who was recently taken so suddenly and seriously ill, is still very weak, but there is now a hope that he will recover. His sister is here and he has a brother among the students.

vitation showed the general apprecia-

no doubt every word of it true so far as it goes, but I do not think he tells Y. M. C. A. parlor on Christmas day, the whole truth, for I know of some hard-headed practical farmers over was called at the instance of a kindthere who are only "fancy" in their hearted gentleman after listening to tastes so far as it pays them to be the harrowing tale of a resident of so, and they use land plaster quite largely round their premises. Wesley street to the effect that horde of half starving men had folexperience leads me to agree lowed a load of wood into his yard with my friend that lime is cheaper and just as good as plaster and begged the privilege of sawing it up. Another gentleman, having reto apply directly to land, but I am led ceived a supply of wood some days o draw issue with him as to its profitago, met one of the registered unemable use round the stables and manployed and engaged him to cut it into ure heaps, even at the high price of stove lengths. The first day he ar-\$1.25 per barrel (250 lbs.) In defence of my opinion I beg to say that Ville, rived about 8 o'clock and worked for two hours. After dinner he brought the noted French author, in his work an assistant and worked for two or three hours more; then he wanted an on chemical manures gives the followadvance on the job. He got fifty cents ter: Sulphuric acid. 46.51 per cent .: in cash, landed in the lockup that lime, 32.56 per cent.; water, 20.93 per complete the job. Another gentleman Sulphuric acid is one of the stronghad a somewhat similar experience. est germicides and disinfectants known, and the presence of 461-2 lbs. He engaged one of a family of regis tered unemployed, made a small adof this acid in every 100 lbs. of plaster explains why the latter acts so powervance to assist in buying a pair of boots and has not seen his man since The experience of the committee and animal health when used in barns. shows two things, namely, that the destables ,privy sinks, cesspools or anyserving unemployed are few and that where that noisome or unhealthful exsistance are not of the deserving Land plaster has a powerful affinity for nitrogen in the form of ammonia

(Montreal cor. Toronto Empire.) shovel snow, and to that official's great surprise and indignation not half that number could be secured. He supposed that at least 4,000 would be offering their services but the appeal for help was made in vain. Constables were sent all over the city and from St. Henri to Hochlaga, and but 500 hands could be secured to do 'e vork require?. Three-quarters of the men who had been shrieking for bread at command were too well off in their comfortable workshops, and too well paid at that, to accept a job from the corporation, and thus it was only too evident that the army of unemployed in the city of Montreal had dwindled away. The agitators, however, will be tested in another way. Yes'erday afternoor the finance committee met and voted \$25,000 to open up quarries and thus give employment to those who were crying for this kind of work. When, however, the committee adjourned, one of its members told the Empire that the public would be surprised to find how few men would apply for work now that employment was provided them.

says: London, Jan. 30—The rumors that C. N. Armstrong has nearly completed negotiations for a railway to compete with the Canadian Pacific in Ontario and Quebec are exciting the Canadian market here. The stock exchange denied that the Canadian government had given a guarantee of interest, but it is believed the London supporters of the scheme have deposited a sufficient amount with the Canadian government to purchase an annuity and to provide four per cent. interest for a given number of years.

(From Harper's Bazar.)

("Come and take tea with me at five," is one of the most welcome sounds one can hear in dirty, foggy London. The greater the fog, the more cheerily rings that sound. Nothing in the whole British constitution has a more solid raison d'etre than tea. No one who has not felt the London fog penetrate to his very marrow can appreciate the full force of this statement; words would be as useless in his case as they are needless in that of the inexperienced sufferer. Tea is real; tea is a ercestity growing out of the very nature of things; tea is a "function" in very truth, and, to my mind, a most vital function of life in England. Americans would be as nervous as peasa in a rot if the with me at two. Montreal, Jan. 30.-The Star cable

She Had For Several Years Charge of the Boarding School at Rothesay.

The death occurred at Titusville Pa., on the 20th ult., of Mrs. Ellen Watkins, who for several years had charge of a boarding school at Rothe-

say and afterwards at Hailfax. She left here sometime in the vicinity of fifteen years ago. The Titusville Herald says:

and awoke in the Paradise of God. To all her many friends and dear ones we tender our sympathy and consolation, we know how great is their loss, but they must think of her gain, of her blessed entrance into the rest of the saints. Of her beautiful and happy death it can be truly said:
"Is that a death-bed where the Christian

lies? Yes, but not his; 'tis Death itself there dies.' AN ENGLISH SOCIAL FUNCTION

Tea at Five.

tion of life in England. Americans would be as nervous as pease in a pot if they drank tea at home as much and as often as the English do here; but only come to England and the most American of Americans will gladly strike his colors to tea. The stimulant is a necessity, second only to dinner. No one thinks of omitting it, but wherever he is, whatever he is doing, tea beckons at five like the finger of fate. The Church of England may become disestablished, but never tea.

like the finger of fate. The Church of England may become disestablished, but never tea.

"What! not wait for tea! Why, I should have headaches all day long if I did not have my tea." Thus the Englishwoman, who straightaway rings her tea-bell on hospitable thoughts intent. Then the maid or butler brings in the tea table, covers it with a dainty white cloth of damask or embroidered linen, and pulls out shelves from underneath whereon are displayed the plates of thin bread and butter, cakes and biscuits, which are always served with tea. I have never seen these little tea tables in America, with silding or unfolding shelves underneath for the bread and cakes, leaving the whole top of the table for the tea service alone; but here they are quite common, and are certainly very handy. I have also seen the bread or cake served on a little circular bamboo or light wood stand of three or four shelves just large enough for a plate; this is passed around and each guest may take what he prefers without confusion or waiting. Hot muffins are sometimes served, and sometimes those delicious English scones, something like our soda biscuit, buttered and piping hot from the oven. Bread and butter is cut very thin and left just as sliced from the loaf. I have not yet seen it doubled into sandwiches. Cake is never omitted, but is tradition itself. I find it too sweet and destructive of flavor to go well with a delicate tea. Sometimes four and left just as sliced from the loaf. I have not yet seen it doubled into sandwiches. Cake is never omitted, but is tradition itself. I find it too sweet and destructive of flavor to go well with a delicate tea. Sometimes four or five different things are served, and tea becomes quite a hearty meal.

I have always seen the tea service brought in on a tray, and never the tea table ready laid in the drawing room, as it so often stands at home. The bell is rung for it, or the servant brings it at five without being told. Coffee is sometimes served with it. The other day I saw a most fascinating little hott-water kettle in a tea service. It was an exact reproduction in silver of one of the archaic Greek vases in the British museum, with its queer imperfect shape, flaring spout like the muzzle of a blunderbuss, and incised design of grotesque lions.

HOW TO TREAT INK SPOTS.

Ink stains are hard to deal with, but much Ink stains are hard to deal with, but much may be accomplished if they are only treated in time. One good remedy is to tear blotting paper to pieces and hold the rough edge on the ink when it is freshly spilled. If there is no blotting paper at hand cover the spot with Indian meal, or liquid ink may be absorbed by cotton batting. When ink is spilled the first care should be to prevent it from spreading.

Another way of preventing ink stains is to immediately wash the stained article in

to immediately wash the stained article in several waters and then in milk, letting it soak in the milk for several hours. Another manner of removing all ink stains is to wash the article immediately in vinegar and water and then in soap and water. No matter what is used for removing ink the stain must be rubbed well

PAINTED LOBSTERS.

It has been found necessary to take measures to put a stop to the coloring of lobsters

C. P. R. for Montreal, and will go from thence to Hamilton. They were the recipients of many handsome presents, and were showered with congratulations and well-wishes from a host of friends. The bride is a popular young lady, and she will be greatly missed in society circles.
