Cowardice and Courage.

One of the most interesting phases of human nature is illustrated by the deeds of heroism that are done from motives of utter cowardice. Capt. Pointz, in 'School," tells Naomi, when she is endeavoring to draw from him an account of his military career, that he did not run away from the enemy because he was too cowardly to do so, and there are many instances of men facing death, without the soldier's sense of honor and duty, because they lacked the moral or physical courage to face or energy of the soldier's sense of honor and duty, because they lacked the moral or physical courage to face or energy of the soldier's sense of honor and duty, because they lacked the moral or physical courage to face or energy of the soldier's sense of honor and duty, because they lacked the moral or physical courage to face or energy of the soldier's sense of honor and duty, because they lacked the moral or physical courage to face or energy of the soldier's sense of honor and duty, because they lacked the moral or physical courage to face or energy of the soldier's sense of honor and duty, because they lacked the moral or physical courage to face or energy of the soldier's sense of honor and duty, because they lacked the moral or physical courage to face or energy of the base and the candle sacker, and the candle candle inexpensive Convention, but the Parliaments of Wanter, the baker, and the candle candle inexpensive Convention, but the Parliaments of Wanter, the baker, and the candle candle inexpensive Convention, but the Parliaments of Wanter Association, whose object, the baker, and the Contact. But when the hour arrived the sky was threatening and the wind was squally and blowing in the direction of Norway. M. Duruof, seeing that not only was a trip to England impossible, but any ascension almost certain death, postponed his aerial ascent to the next day, and the majority of the people departed for their houses. A few angry, drunken and disappointed people remained, however, and clamored for the show which they had come to see, taunting the acronauts with cowardice, and delinging them with jibes and ridicule.
